

Heat transfer
optimization in a
feedwater heater?

Certainly.

Power and productivity
for a better world™ **ABB**

The KM26 Magnetic Level Gauge and the AT200 Magnetostrictive Level Transmitter provide continuous level measurement and transmission of an analog and/or digital signal of condensate levels achieving feedwater heater operation at the greatest level of efficiency. Learn more about why ABB Level Measurement is your solution for the power industry. www.abb.com/level
