

ABB-free@home®

The latest in home automation technology

Free choice

Live as your heart desires

ABB-free@home® transforms your house or apartment into an intelligent home. Whether blinds, lights, heating, air-conditioning or door communication – comfort, safety and efficiency can finally be remotely controlled. Via a switch on the wall, via voice control or with a smartphone, tablet or personal computer.

**Liberating**

As an innovative home automation system, ABB-free@home® offers an endless number of possibilities for creative design. This allows the home to be equipped with personal concepts and preferences. Both today and in the future.

Advantages

Easy installation by the electrician. Easy operation for the user, via app or remote control.

The pleasure of simplicity

ABB-free@home® makes daily life easier. You can manage blinds, lights, heating, air-conditioning and door communication using just one system. The smartphone becomes the remote control in the house. It allows you to raise the blinds and switch on the radio in the kitchen with the touch of a button while you are still in bed – or to deactivate all lights and devices via a switch when leaving the house. Very convenient. Extremely comfortable. Highly energy efficient.

The easiest way to switch off

Our smart home solutions adapt the heating, lighting and blind control individually to your daily living habits and activate them only when required.

Easy remote control

Always in the know about what is happening at home. Via the app you can check any time whether all the windows are closed or if someone has forgotten to switch off the lights. This makes it possible to maintain control, even while on holiday.

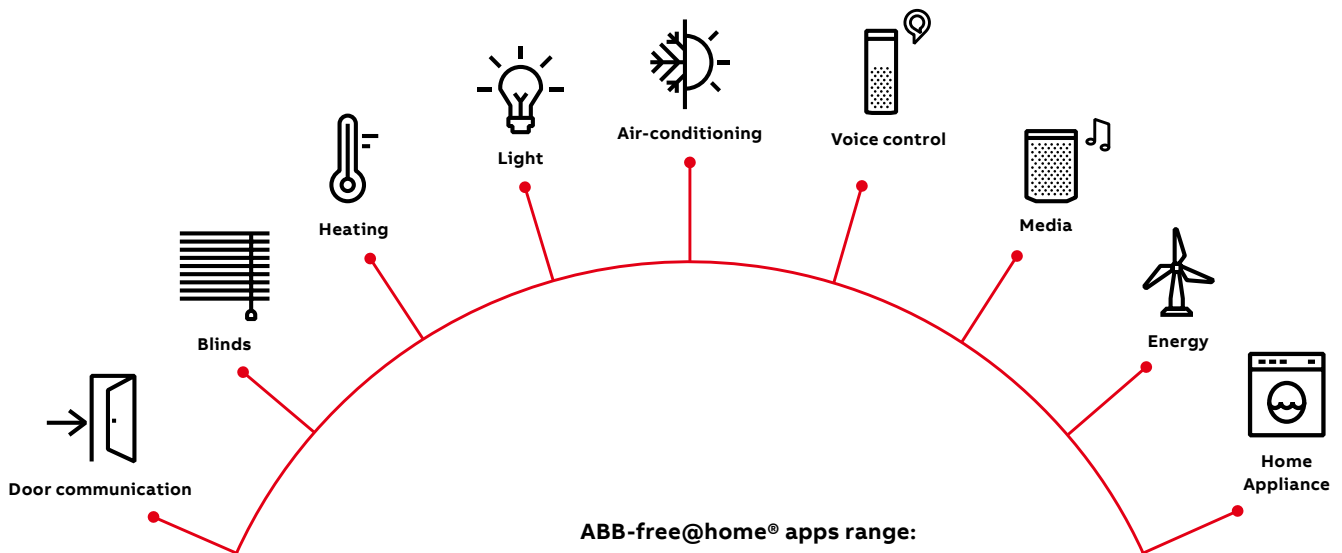

ABB-free@home® apps range:

Lighting Control, Blinds, Heating, Air Conditioning, Weather Station, Philips Hue, Sonos, Amazon Alexa, Google Assistant, Door Communication, Touch Screens, Appliances, Timers, Scenes and Presence Simulations, Geofencing, Solar Integration.

Just as you like it

The smart home

The perfect daily routine. With ABB-free@home®, the entire home can be controlled not only with switches, but now even more practically: by smartphone or tablet and via touch or voice control. This allows home automation to be managed in a way that's mobile and smart, precise and flexible. For example, if the light atmosphere needs to be changed, tapping on the touchscreen or a simple voice command moves the blinds or changes the colours of the lights. Experience the future of smart living today.
