The energy storage module (ESM) CSS solution with integrated energy storage provides a buffer of power and energy in parallel to the grid. Typical application is the peak power demand control and energy back-up. The ease of installation of a pre-wired solution drastically reduces site activities in terms of man-hours, excavation and civil work activities. The different versions of the pre-engineered and industrialized ESM allow scalability, high reliability and reduced project execution times.

Features of solution
- Available in multiple enclosure materials:
  - Steel for rural areas
  - Glass reinforced polyester (GRP) for harsh and challenging environmental conditions
- Internal arc tested design assures high safety standards for service personnel and public
- Lockable enclosure to prevent unauthorized entry
- Compact design to reduce footprint installation
- Fire tested according to ISO 834
- Flammability according to UL 94
- Toxicity according to EN 45545

Equipment description
The CSS typically houses medium voltage switchgear (up to 40.5kV), transformers (oil or dry type), low voltage switchboard with protection devices e.g. circuit breakers or fused disconnects, and integrated energy storage. The CSS is compartmentalized to isolate the sections to reduce risk of accidental handling.

Technical data

<table>
<thead>
<tr>
<th>Key specifications</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Medium voltage level</td>
<td>from 2.4 – 40.5 kV</td>
</tr>
<tr>
<td>Typical ratings (kVA)</td>
<td>up to 1250 kVA</td>
</tr>
<tr>
<td>Secondary voltage</td>
<td>400-480 V</td>
</tr>
<tr>
<td>Storage power</td>
<td>Up to 1000 kW</td>
</tr>
<tr>
<td>Storage capacity</td>
<td>Up to 1000 kWh</td>
</tr>
<tr>
<td>Trafo type</td>
<td>Oil or dry</td>
</tr>
<tr>
<td>Protection degree</td>
<td>IP 54/23D (MV SWGR, LV and storage /trafo)</td>
</tr>
<tr>
<td>Applicable standards</td>
<td>IEC, GB, AS, GOST, ANSI, CSA, and more</td>
</tr>
</tbody>
</table>
**Optional equipment**
- Seismic certifications
- IP35 or IP45 protection
- Ventilation area chosen for different climate conditions
- SCADA ready
- Remote monitoring
- Remote monitoring and control
- Energy management systems

**Installation**
- One-piece delivery factory assembled and tested
- MV and LV connection needed at site
- Reduced site works
- Compact design for reduced footprint
- No heavy crane needed
