

LOYALTY OFFER | ENERGY INDUSTRIES CANADA

ABB Care Contract Loyalty Offer

Seamless evolution for the next generation of Harmony Rack control and IO products

In the long history of Harmony Rack products, the next step to modernize your system is by upgrading with Symphony® Plus SDe Series control and IO.

Save 30% off your SPC controllers and bridges.

SPECIAL 2024 OFFER! Additionally save 20% off your ENTIRE PROJECT if you purchase any of the SPC controllers.

ABB has repackaged decades of Symphony development into SDe control and IO, continuing the commitment to ABB Harmony Rack systems. This preserves your INFI90/Harmony/Symphony investment and infrastructure, flattens communication and control architecture with modern Ethernet, preserves application logic developed over many operating years and will replace existing MFC's/MFP's/BRC's and communications without impacting installed IO.

SDe's easy, low risk, upgrade solutions allow you to keep your existing cabinets, existing termination units, existing cabling and does not require field wiring to be lifted from installed termination units.
