Introduction

Features

- Compact size
- Mechanical operation indication
- Heavy duty contacts with double interruption
- Wide range of auxiliary supply range
- Low power consumption

Applications

The auxiliary relay type CV2 is intended for use in control and protective systems in industrial plants and power stations, where it is mainly used in conjunction with control systems, particularly where a contact multiplication and visual indication of a given function is required.

The relay supports functions as indicated in Table 2.

Table 1. Application and supported functions

Functionality	Relay type	ANSI	IEC
DC operated auxiliary relay with single element, Flush mounting	CV2DJ	30x, 63x	Aux. relay
DC operated auxiliary relay with two element, Flush mounting	CV2D2J	30x, 63x	Aux. relay
AC operated auxiliary relay with single element, Flush mounting	CV2AJ	30x, 63x	Aux. relay
AC operated auxiliary relay with two element, Flush mounting	CV2A2J	30x, 63x	Aux. relay
DC operated auxiliary relay with three element, Flush mounting	CV2D3Z	30x, 63x	Aux. relay
DC operated auxiliary relay with six element, Flush mounting	CV2D6Z	30x, 63x	Aux. relay
AC operated auxiliary relay with three element, Flush mounting	CV2A3Z	30x, 63x	Aux. relay
AC operated auxiliary relay with six element, Flush mounting	CV2A26Z	30x, 63x	Aux. relay

Design and principle of operation

The indicating relay type CV2 is an instantaneous hinged-armature relay with two contacts.

These may be either two normally open contacts, or one normally open and one normally closed.

The magnetic system comprises the fixed core and the hinged-armature which actuates the contacts. When the coil is de-energised, the armature is reset to its original position by a spring.

The operation knob pops out when relay picks up. When the relay is in its normal state i.e. prior to pick up the knob is black, when relay picks up there appears an orange ring. The indicator can be reset by pressing knob back in.

The terminals on 1/2'S' flush mounting case have an opening of diameter 3.8 mm for external connections. These can accommodate two wires with a cross section of 2.5mm².

Table 3. Auxiliary Power supply

Description	Value
Uaux nominal	24, 30, 48, 110, 220, 250 V DC 110, 240 V AC, 50 Hz with rectifier
Uaux variation	80...110% of Uaux
Pick-up voltage (%Uaux)	< 75%
Drop-off voltage (%Uaux)	> 15%
Operation time at Uaux	20-35 ms
Maximum power consumption	3.0 W DC and 2.5 VA for AC for single, two element relay 9.0 W DC and 7.5 VA for AC for three, six element relay
Application with AC auxiliary voltage	In case relay is supplied through UPS step-wave or square wave, interposing transformer / surge suppressor is needed to limit aux. supply peak voltage below the upper limit of the relay

Dimensions and Mounting

The panel cut-out for flush mounting:

a) Single, two element relay

- Height: 112.0 ± 1.0 mm (140.0 ± 0.3 mm between center of mounting holes)
- Width: 88.0 ± 1.0 mm

b) Three, six element relay

- Height: 112.0 ± 1.0 mm (140.0 ± 0.3 mm between center of mounting holes)
- Width: 88.0 ± 1.0 mm

b) Three, six element relay

Selection and Ordering Data

Selection and ordering data

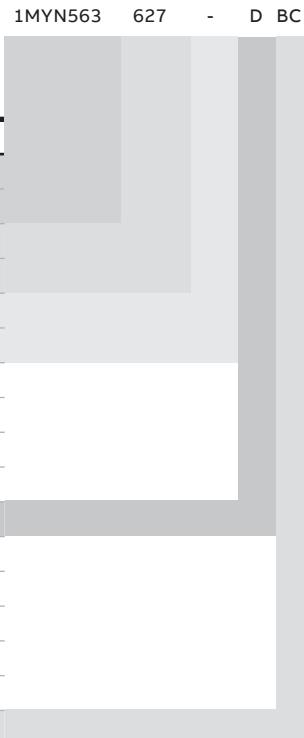

The relay type and serial number label identifies the relay. An order number label is placed on the side of the relay. The order number consists of a string of codes generated from auxiliary supply of the relay.

Use the ordering key information in Fig. 6 to generate the order number when ordering complete protection relay.
