

CER-UP-L1

Certification Update Level 1 ABB Analytical Measurements

The experienced ABB team offers comprehensive training for service engineers required to commission complete FT-IR systems and solutions and maintain an FT-IR installed base.

Pre-requisites

Service engineers who have successfully completed the Level 1 Certification

The certification update is mandatory for 2012. All certified service representatives are required to attend one of the training sessions.

Please consult the service training schedule for details of locations and dates.

Service training will be offered at the factory, in Europe and Asia

Topics covered during the session:

- Update of the latest products released, including but not limited to: Horizon MB, Horizon QA, FTSW100.
- Latest troubleshooting techniques for BMXS and firmware update
- Hands-on exercises

Certification granted upon successful completion of the examination:

Certification is valid for a period of two years.
