C1901
The C1901 is a single pen, fully programmable circular chart recorder. The instrument’s straightforward operator controls and robust construction make it suitable for a variety of industrial environments.

Designed to survive
NEMA 4X protection ensures the C1901 can survive in the harshest environments and makes the recorder ideal for use in panels which are regularly hosed down. The tough, acid-resistant case and secure cable-entry glands maintain the NEMA 4X rating for wall-mount or pipe-mount instruments.

Easy to install
A choice of mounting options enables simple installation of the recorder in a panel, on a wall or on a pipe. Mains isolation can be provided by an optional power switch within the instrument.
