02 Diagram showing the three zones in a food processing plant

**Innovative Updates**

Ty-Rap Detectable Cable Ties specially formulated material compound now has higher metal content which has improved detectability for safer food preparation.

The upgraded cable tie encompasses increased metal density throughout the cable tie for critical detection. Plus the product line now has more colors to choose from for easier food processing zone separation and to contrast against blue belts.

**Features and Benefits**

- Contains a unique, patent-pending compound detectable by metal detectors and x-ray equipment
- Available in 3 different colors (blue, gray and brown) and in nylon and polypropylene
- Colors can be used to identify different food processing zones

**Zone 1**—Direct food contact area

**Zone 2**—Indirect food contact area

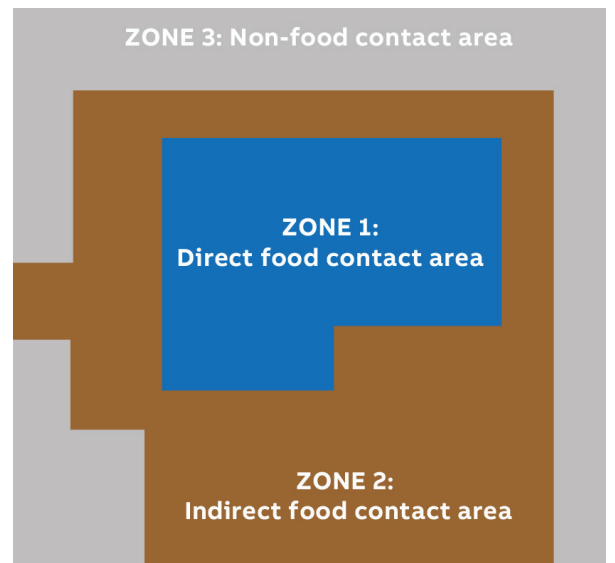

**Zone 3**—Non-food contact area
