Electrification portfolio

ABB is a global leader in power and automation technologies that enable utility and industry customers to improve performance while lowering environmental impact. ABB in India serves customers in process, manufacturing and consumer industries, utilities, the oil & gas sector and infrastructure markets through a wide manufacturing and marketing network.

ABB offers a full range of low-voltage and medium-voltage solutions to connect, protect, control and measure a wide range of electrical systems for all major industries, including the residential sector.

The business improves the reliability and efficiency of electrical installations through modular substation packages, distribution automation products, switchgear, circuit breakers, measuring and sensing devices, control products, wiring accessories, and enclosures and cabling

systems, including KNX systems designed to integrate and automate a building's lighting, ventilation, heating, security and data communication networks.

ABB's product range serves the diverse needs of customers, offering value-for-money and high levels of quality and reliability. These products are backed by the technological expertise of ABB's centres of excellence across the globe, each of which excel in a specific range of low voltage products.

ABB's electrification products offering in India are designed, manufactured and tested in-house in conformance with requirements of the ISO 9000 series. These products conform to the latest IEC standards, EN specifications, national standards such as IS, BS, VDE, etc., in addition to the "CE" mark.

Table of contents

Smart Power products

11	ABB's comprehensive range of breakers and switches
12	SACE Emax 2
13	SACE Tmax XT
14 - 19	ABB Ability™ Energy and Asset Manager
20	ArTu K
21 - 31	Tmax power distribution circuit breakers
32 - 33	Tmax XT motor distribution circuit breakers
34 - 39	Tmax XT accessories
40 - 42	SACE Formula Air
43 - 45	SACE Formula DSP
46 - 47	SACE Formula DSA
48 - 49	Arc flash protection and mitigation solutions
50 - 58	LV products for Photovoltaic application
60 - 61	Fuse links and base, DIN-type & BS-type
62 - 63	OESA/OS switch disconnecter fuse, DIN-type & BS-type
64	Accessories for OESA/OS switch disconnecter fuse, 32..800 A
65	OT Plus switch disconnectors
66 - 68	OT switch disconnectors & accessories
69 - 72	Enclosed switches
73	Kabeldon low voltage switchgear system
74 - 75	OT Plus changeover switches
75	OT manual changeover switches
76	OT motorized changeover switches
77	Compact ATS & OT Automatic Transfer switches
78 - 79	OTM_DPT Automatic transfer switch
80 - 83	TruONE ATS

85 - 89	Motor starting and protection
90	Smart Communication Card
91	M Mini contactor relay
92	Auxiliary contactors
93	3 pole contactors: AX09...AX370 : AC operated
94	3 pole contactors: AC operated
95	4 pole contactors: AC operated
96	3 pole contactors AL range: DC operated
97	Contactors for DC circuit switching: AC/DC operated
97 - 99	Accessories for contactors
101 - 102	Novolink™ – smart function and sensor modules for AF contactors - New
103	3 pole contactors AF range: Wide band AC/DC operated
104	4 pole contactors: Wide band AC/DC operated
105	Contactors for special application-capacitors switching
106 - 107	Accessories for AF contactors
108 - 109	AFC contactors for AC control applications
110 - 113	ESB and EN Installation contactors
114	Mini contactors
115	DOL and star delta starters
116 - 119	Manual motor starter
120 - 122	Thermal overload relays
123	Electronic overload relays class 10, 20, 30
124 - 126	Push-in Spring motor starting solution
127 - 131	Softstarters
132	AFS contactors with front-mounted auxiliary contact blocks
133 - 134	M mini contactors and contactor relays
135	Electronic compact starters: HF range

Table of contents

136 - 137	Limit switches
138 - 150	Pilot devices
151	Electronic products and relays - range
152	CT-C/CT-S CT-X Product Portfolio
153 - 156	Electronic products and relays
157 - 159	Switch mode power supplies - CP range
160 - 161	Smart temperature monitoring relay - New
162 - 167	Intelligent motor management system - UMC100.3 & accessories
168 - 177	ABB safety

Smart Building products

178 - 181	Electrical installation solutions for buildings
182 - 188	Miniature Circuit Breaker SB200 M
189 - 191	Miniature Circuit Breaker SB200 DC
192 - 194	Switch Disconnecter SDB200 and E200
195 - 197	Residual Current Circuit Breaker FB200 and F200
199 - 201	Residual Current Circuit Breaker with overcurrent protection DSB201M series AC Type
202 - 203	Residual Current Circuit Breaker with overcurrent protection factory fitted DSB202M and DSB204M
204 - 205	AP-R type (high immunity) RCCB F200/RCBO DS201M
206 - 216	System pro M: Auxiliary elements for MCB's-SB200M, S200M, RCCB's-FB200, F200 and RCBO's-DS201M, DSB201M
217 - 220	Wiring diagram & Overall dimensions
221 - 223	Arc fault detection device (AFDD) - New
224 - 225	Surge protection devices - OVR QuickSafe®
226 - 227	DBT Timer digital time switches
228 - 229	SMISLINE TP plug-in system
230	ELR, Earth leakage relay - (DIN & front panel mountable)

232 - 261	Energy meter Portfolio
262 - 265	Circuit monitoring systems SCU100, SCU200
266 - 275	ITUS series enclosures
276 - 281	Classic series enclosures
282	Mistral IP 65 enclosures
284 - 291	Wiring Accessories - Millenium
292 - 299	Wiring Accessories - Zenit
300 - 315	Wiring Accessories - IVIE
316 - 325	Wiring Accessories - Tvisha, Tvisha white & Anti-bacterial
326 - 340	Wiring Accessories - LIORA
341 - 343	Busch-Presence detectors

Table of contents

Installation products

344 - 347	Type 2 co-ordination

357 - 358	General conditions of sale

75 YEARS OF MANUFACTURING & INNOVATION IN INDIA

Since its inception in 1949, ABB India has facilitated nation's automation, digitalization, and electrification.

ABB technology is seamlessly entrenched in the fabric of Indian life

900+ Electric locos for Indian Railways

300+ renewable energy projects across India

80% of India's metro networks

60% of mobile phone manufacturers

30% of hyperscale data centers

We have earned a place to be a trusted partner in India's growth story:

First of its kind AI enabled gas distribution network

Motors and drives saved 20 TWh energy annually over the last decade

A first-of-its-kind Industry 5.0 factory for electrical equipment

Supported India's Water Network with accurate flow measurement in over 15 cities

An industry-first introduction of robotics PixelPaint for automotives

With each step, we build a sustainable future:

>80% reduction* in Scope 1 and 2 GHG emissions since 2019

*Till December 2024

100% renewable electricity use in manufacturing locations

All 5 manufacturing locations certified as 'Green Factory Buildings'

50% of our facilities are Water-positive and Zero Waste to Landfill

100% Single use plastics free campuses**

**non process areas

The next 75 years: Our vision for a smarter, sustainable, and digitally empowered India of tomorrow

Commitment to India's smart infrastructure and mobility goals

Focus on energy transition, digitalization, electronics & advanced manufacturing

Deepening our R&D

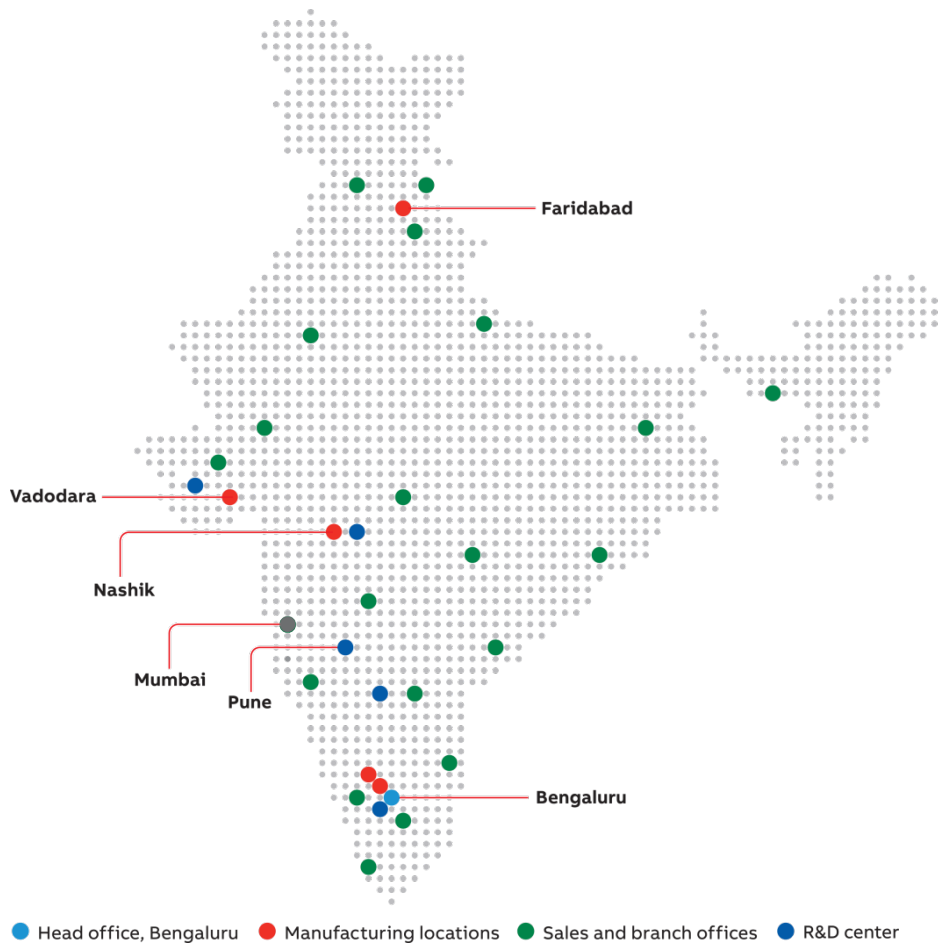

Local for local strategy

Fostering diversity, inclusion, and skilling future engineers

ABB India Footprint

5 Manufacturing locations
25 Plants

Serving Customer
~150 Cities
Exporting to
30+ countries

28 Sales offices
750+ Channel partners

10,800+
Employees

5,500+
Third-party employees

22%
Gender Diversity

ABB's comprehensive range of breakers and switches

The range of ABB breakers and switches ranks amongst the most extensive on the market with a full range of innovative solutions for various applications, helping to optimise resources, reduce energy costs, boost productivity.

- Air circuit breakers
- Molded case circuit breakers
- HRC fuse & fuse base
- Switch disconnecter fuse
- Switch disconnectors
- Changeover switches - manual & motorized
- Auto transfer switches
- Cable distribution cabinet - Kabeldon
- Fuse gear - easyline and inline (Fuse switch disconnecter)
- Switch disconnecter for DC and photovoltaic application
- MCCB for DC and photovoltaic application

SACE Emax 2

The all-in-one innovation

The world of electrical power distribution changes fast and major new trends such as renewables, energy storage and microgrids are now crowding onto the stage. These trends lead to new customer and application demands.

To meet these demands, ABB has now unveiled the innovative Emax 2 all-in-one, the evolution of the Emax 2 into a multi-functional platform that is able to manage the next generation of electrical distribution systems such as microgrids.

Emax 2 all-in-one is the first circuit breaker that meets new grid requirements. It enables a direct communication to the new energy management cloud-computing platform ABB Ability™ Energy and Asset Management.

Smart plug and play architecture makes Emax 2 all-in-one easy to use. Leveraging also unmatched electrical performances, Emax 2 sets a new circuit breaker benchmark for the needs of today and tomorrow.

SACE Emax 2, the all-in-one solution to manage "low-voltage distribution systems".

Efficiency

New advanced functionalities, together with Protection trip units, Communication and system devices contribute to make SACE Emax 2 the circuit breaker that maximizes efficiency in all low-voltage electrical installation.

Control

SACE Emax 2 circuit breaker is the first single device ready to manage all the dynamics of a low-voltage electrical installation.

Managing loads in any condition is now possible, thanks to Advanced Functionalities such as:

- **Power controller**

Patented algorithm to reduce the peak of power consumed, allowing savings on electricity bills.

- **Embedded ATS functions**

An automatic transfer system used in all applications, where continuity is essential and where there are multi-source supplies.

- **Synchro-reclosing**

Synchronization and automatic reconnection of the Microgrid to the main grid when the power is back.

- **Interface protection system and Interface Device**

Check of grid-connected operation that shall be immediately and automatically interrupted in case of outage of the distribution grid or when the voltage and frequency values of the grid itself are out of the range of values defined by the Distribution System Operator (DSO).

- **Adaptive protection**

Network changes recognition and automatic set of thresholds to guarantee protection and co-ordination in on-grid and off-grid conditions.

The SACE Tmax XT range at a glance

The world of circuit breaking and circuit protection in your hands

SACE Tmax XT1

Small, reliable, versatile. Your reliable partner for all standard applications.

NEW

SACE Tmax XT2

Compact yet powerful. It fits everywhere and is able to deal with all complex tasks.

SACE Tmax XT3

Small and experienced. For standard applications that need few efforts.

NEW

SACE Tmax XT4

A forward-thinking, multitasker. It finds solutions for all levels of complexity.

NEW

SACE Tmax XT5

Compact, extremely powerful and flexible. It shows the world what a circuit-breaker of the future can do, today.

NEW

SACE Tmax XT6

Built to last. It completes all assignments it has been entrusted with.

NEW

SACE Tmax XT7 / XT7 M

The ultimate choice. It deals with the most heavy-duty demands effortlessly.

Data and connectivity

SACE Tmax XT sets new standards in plant and energy management with remote access, monitoring, and control.

Performance and protection

Continuity of service and equipment protection – SACE Tmax XT sets standards when extreme breaking capacity is needed.

Local connection and Remote communication

Bluetooth connectivity, Ekip Connect software, and multiple protocols make commissioning and device settings effortless.

Electrical performances

SACE Tmax XT is designed and tested to meet any installation requirement, even the most critical ones.

Cloud connectivity

Ekip Com HUB enables cloud connectivity for full ABB Ability™ Energy and Asset Management services.

Safety and reliability

With a focus on safety and reliability, cutting-edge design and expert engineering set new industry standards.

Ease of use and installation

Simplified selection, versatile accessories, and intuitive design enable quick upgrades for any project.

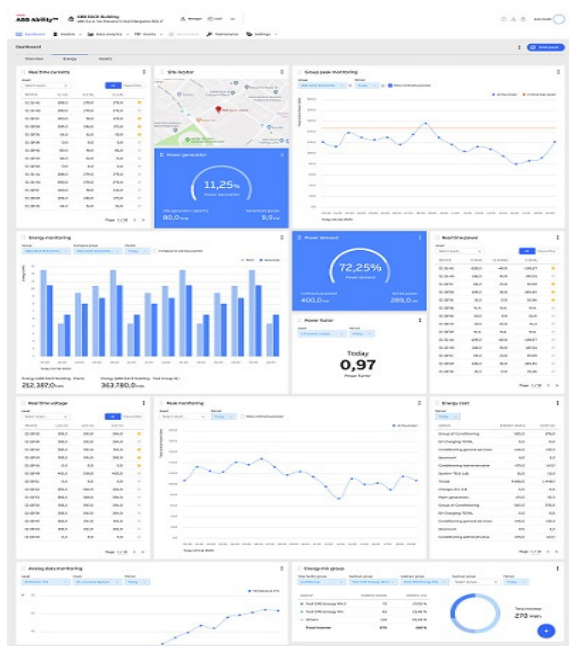

ABB Ability™ Energy Manager

Strike your sustainability and efficiency target

ABB Ability™ Energy Manager is the state-of-the-art cloud solution for monitoring and analyzing site equipment. This intuitive solution has the ability to optimize your site's electrical distribution system and other utilities, resulting in improved performance, efficiency and safety.

Through its scalable and flexible design, ABB Ability™ Energy Manager ensures comprehensive accessibility and is ready-to-use with low- and medium voltage electrical distribution as well as of water, gas or heating equipment.

Every facility has different energy needs and targets, which is why the ABB Ability™ Energy Manager uses configurable widgets to meet the needs of your organization. And you can define, compare and access relevant results with maximized efficiency.

Reporting

Power quality

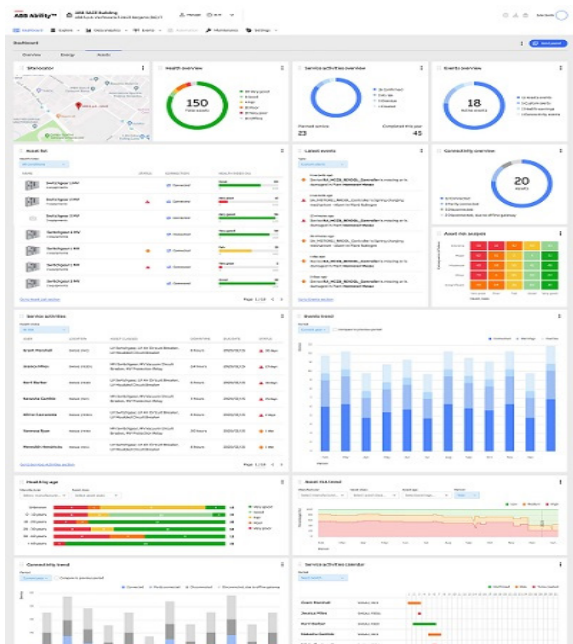

Alerts

ABB Ability™ Energy Manager is an innovative cloud-based energy management tool that gives you the power to monitor, analyze, control and optimize your electrical system reaching energy efficiency and sustainability goals.

It helps you to reduce energy costs, improve your energy efficiency and manage your carbon footprint, with high flexibility of application.

The energy manager and asset health add-ons can be purchased separately or together, depending on your needs. Monitoring can also be segmented down to individual pieces of equipment and/or sub-systems-such as an elevator, a single HVAC system, or a production line.

ABB Ability™ Asset Health

Every facility sets different asset performance targets, and that's why the ABB Ability™ Asset Health widgets can be customized for the specific needs of your business. And you can define, compare and access the most relevant results with maximized efficiency.

Condition monitoring
Granular visibility of your asset behavior in real-time for both LV and MV environments

Digital twin
Access asset data, documentation, historical data and more

Maintenance planning
Root-cause analysis of asset condition enables predictive maintenance

Events and notification
Set up alerts and notify key personnel remotely when an action needs to be taken

Health analysis
Get the full picture of your connected assets' health with clear categorizations for appropriate action, from "Very poor" (mostly failed, urgent action required) to "Very good" (as new, no action)

Reporting
Access a wide range of reports to gain a better understanding of how your assets are performing and identify any key trends

Predict function

Predictive Maintenance is a sophisticated algorithm that leverages real time inputs, and an analysis of the product's health conditions that considers:

- Age
- Installation date
- Environmental conditions
- Utilization conditions
- Maintenance activities
- Contact Wear

Moving from preventive to Predictive Maintenance, customers can reduce:

- Maintenance frequency
- Related costs
- Extend the life of electrical systems
- Ensure 24/7 continuous operations

Insights

Make better data-driven decisions

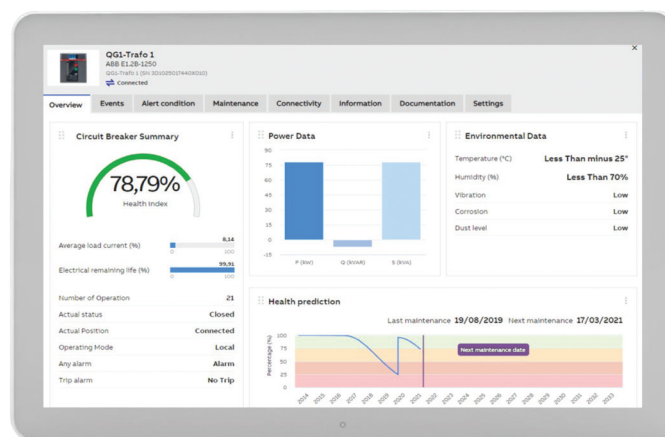

Remediate issues proactively

Improve availability and reliability

Reduce costs

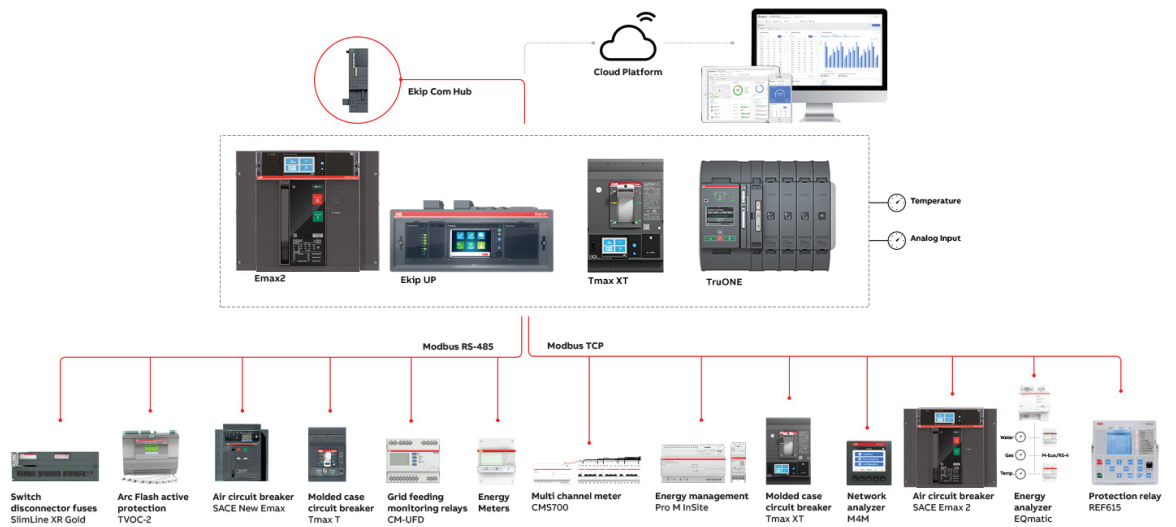

Architecture

Truly plug & play

Embedded solution with Ekip Com Hub

Emax 2, Ekip UP and TruONE equipped with the new Ekip Com Hub establishes the cloud connection for the whole switchboard.

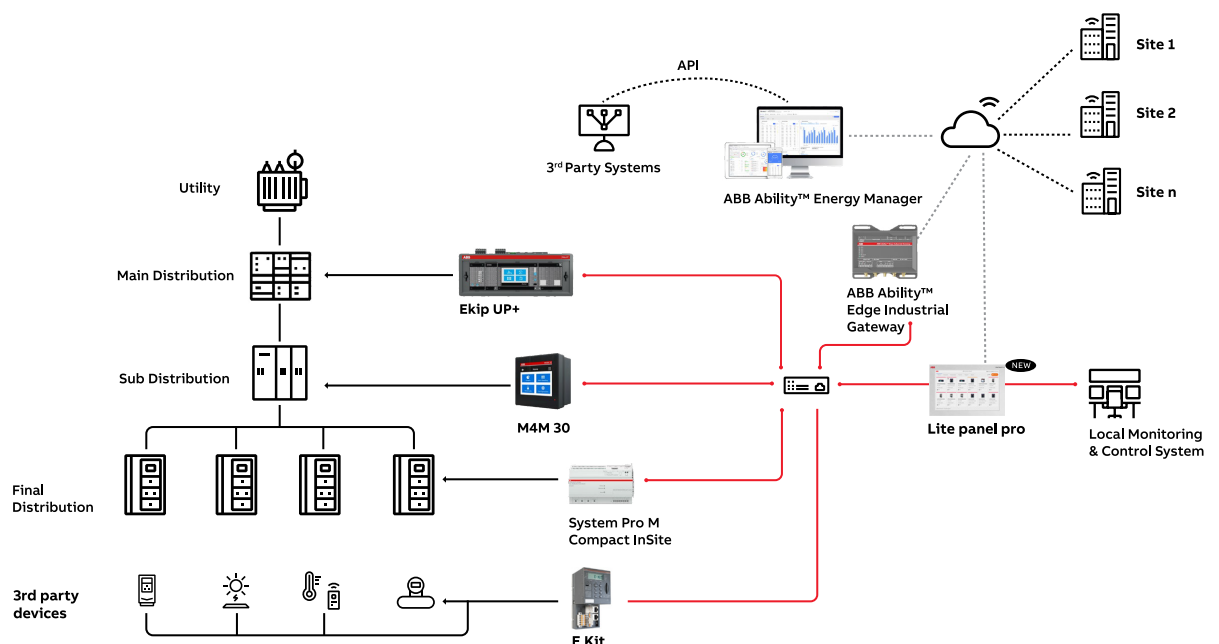

This dedicated cartridge-type communication module just needs to be inserted into the terminal box and connected to the internet.

External solution with ABB Ability™ Edge Industrial gateway and lite panel pro

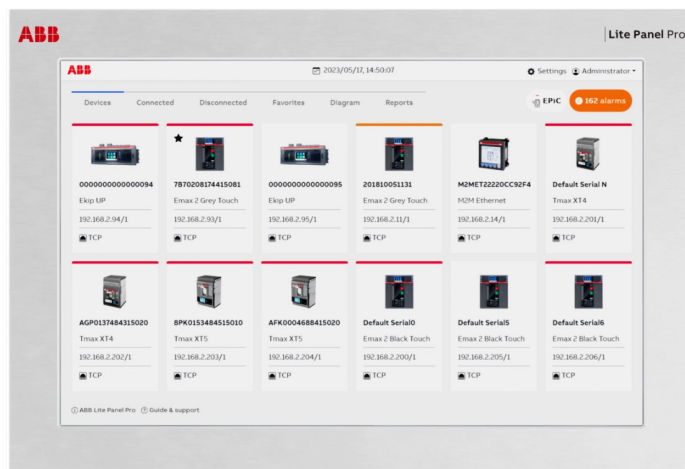

The ABB Ability™ Edge Industrial gateway module can be mounted on DIN-Rail to collect data throughout the system. You can also connect sensors to measure environmental

parameters (temperature, water, gas) via both analog and digital I/O. ABB Ability™ Edge Industrial gateway has enhanced connectivity functionalities, providing Wi-Fi or 3G/4G connectivity.

Lite panel pro **NEW**

One Panel, a multitude of features

12" touchscreen

Ease of use with large display in-line with market requirements

Energy efficiency granted by ABB Ability™ Energy Manager ready

Future-proof hardware supporting product evolution with new software-enabled functionalities

Versatile switchboard panel display able to monitor and control connected Low Voltage devices

Simplified commissioning Automatic scanning and identification of ABB devices*.

From Local Device Monitoring to Energy Management in the cloud

Integrated webserver

All HMI functionalities can be accessed remotely from any computer on the same network for a more convenient operation.

Reports

On-demand and scheduled reports are available (daily/weekly/monthly).

Single Line Diagram

Users can upload a single line diagram and tag connected devices to keep an eye on the whole switchboard.

Cloud ready

Provisioning of all connected devices to ABB Ability Energy Manager is possible directly from the panel, without the need for extra hardware (gateway).

Mobile ready

EPiC Mobile App is supported via the provided Wi-Fi dongle.

Local data storage

Data from connected field devices is saved onboard and available for user consultation at any time.

Third party device support via templates

Brownfield installations featuring non-ABB devices are supported using configurable device templates.

Protocol translator

Modbus RTU devices connected to the panel are rendered available for integration with 3rd party systems (e.g. SCADA, BMS) via Modbus TCP.

ABB Ability™ Enabled Products

ABB showcases a further evolution in the low-voltage distribution business, establishing a new benchmark in terms of simplicity and performance.

ABB Ability™ Energy and Asset Manager enables the collection of relevant information from the ABB devices installed in the low-voltage power distribution system.

These devices can be connected to the cloud-computing platform to share data with Emax 2 (equipped with Ekip Com Hub) or with ABB Ability™ Edge Industrial gateway via Modbus RS-485, Modbus TCP and Ekip Link.

ArTu K

Born certified

Fully checked and certified (IEC 60439-1 and IEC 61439-1 and 2 Standard) by an external independent organisation (Acea Lovag, CPRI & ERDA), the ArTu switchgear is a synonym of safety and quality. The certification is the fruit of severe tests carried out on the whole configuration, consisting of metalwork structures, circuit-breakers and busbar system.

The ArTu K series switchgear is ideal for primary distribution board, motor control center, power control center etc. upto 6300A with air and molded-case circuit-breakers and any internal segregations up to Form 4, and for floor-mounted secondary distribution switchgear with molded-case and modular circuit-breakers. The switchgear has been tested for Internal Arc (as per IEC 61641) and Seismic (as per IEC 60068).

Smart Low Voltage switchboard

The ArTu switchgear is noted for the following features:

- Integrated range of modular metalwork structures up to 6300 A with common accessories.
- Possibility of fulfilling all application requirements in terms of installation (floorstanding, modular and corner versions) and degree of protection (IP31, IP41, IP 42, IP54 & IP65).
- Maximum integration with modular apparatus and the molded-case and air circuit-breakers, so that additional drilling or adaptations are not required.
- Minimum switchgear assembly time, thanks to the simplicity of the kits, standardization of the small assembly items, self-supporting elements and the presence of clear reference points for assembly of the plates and panels – Segregations in kits up to Form 4.

The use and installation of the kits according to the instructions provided means that assembly and cabling times can be reduced to a minimum, for example, thanks to the reference points for positioning the panels and plates, and that respect of the insulation distances and the rated characteristics of the circuit-breakers are guaranteed.

Tmax XT is the latest generation MCCB up to 1600 A / 690V AC

- IEC 60947-2 certification
- Adjustable overload, selective short circuit/ Instantaneous Short circuit protection
- LEDs on the front provide information about protection tripped
- The trip unit records and stores trip history
- Switchable thermal memory
- Trip unit upgradable for advance protections
- Communication of MCCB status possible on Modbus RTU/TCP using Ekip Com STA Module
- Front connector allows the connection of Ekip TT and Ekip T&P for testing and programming

Tmax XT switch disconnectors

SACE Tmax XT switch-disconnectors

- IEC 60947-3 certification utilization category
- These devices are mainly used as:
 - General disconnection devices in sub-switchboards;
 - Switching and insulation devices for lines, busbars or groups of apparatus;
 - Bus ties.
- Switch-disconnector must be protected on the supply side by a coordinated device which safeguards it against short-circuits.
- Able to withstand The dynamic, thermal and current stresses with the right Making capacity(lcm)

Tmax XT Power distribution circuit breakers

Breaking new grounds : Ekip Touch series

XT2 / XT4 (LCD display)

XT5 (Touch display)

- **Communication and connectivity:** Supports 7 onboard communication protocols :
Modbus RTU
Modbus TCP
Profibus
Profinet
Ethernet/IP
Devicenet
IEC61850
- **Digital upgrade:** Digital upgrading of measurements and protections using software package
- **Ease of use Interface:** LCD display for XT2/XT4 and Touch display for XT5. BLE (Bluetooth low energy enabled)
- **Commissioning:** The setting, testing and downloading of reports can be carried out directly from a smartphone, tablet or PC
- **Watchdog:** Tmax XT ensure high reliability thanks to an electronic circuit that periodically checks the continuity of the internal connections, such as the trip coil, rating plug and each current sensor (ANSI 74). In the event of an alarm, a message is shown on the display.
- **Internal over temperature protection:** Ekip Touch/ Ekip Touch measuring also features self-protection, which ensures the correct operation of the unit in overtemperatures (OT) inside the protection trip unit.
- **Maintenance features:**
Information of last 30 trips and 200 events.
No. of mechanical operations. Total operating time (in hours).
Contact wear and tear in %.
Date of maintenance operations performed.
Indication of maintenance operation needed.
Failure of circuit-breaker to open (ANSI 50BF)

Protections

L,S,I & G protections
Neutral protection
2nd instantaneous protection (2I)
MCR (making current release) - Closing on short circuit protection
Current unbalance
Harmonic distortion
2nd time delayed over current protection (S2)
Current thresholds
ROCOF (Rate of change of frequency)
Synchrocheck
Residual current protection (Rc)

AIR CIRCUIT-BREAKERS

SACE Formula Air

Simplicity and safety, up to 50kA

Formula Air is an ideal solution for main installation requirements, from distribution switchboards to onboard compartments. This comprehensive range offers the most suitable solution for each specific set of requirements. Easy to use Formula Air products are also easy to order.

Possibility to change, on site, the orientation of the rear terminals from horizontal to vertical or vice versa which allows adaptability to accommodate last minutes changes busbar design.

Front terminals are available for breakers up to 1600A in fixed version to have switchboard with compact dimensions.

With High Mechanical and electrical life Formula Air circuit breakers offer high longevity to the installation.

The ACBs are available in 3 sizes up to 4000A with performance level up to 50kA which are equipped with Ek 1 and Ek 2 trip units.

Ratings available

Frame	630A	800A	1000A	1250A	1600A	2000A	2500A	3200A	4000A
FA1	•	•	•	•	•				
FA2					•	•			
FA4							•	•	•

Communication made easy. Formula Air circuit breakers can communicate the status on Modbus TCP protocol through a Ekip signalling 10k signalling module. It can control up to 5 ACBs and communicate status of 5 breakers.

SACE Formula Air

Product details

- Range from 630A to 4000A in 3 frame sizes and 2 types of protection release
- $I_{cu} = I_{cs} = I_{cw}/1 \text{ sec} = 50\text{kA}$ at 440V
- Available in fixed and draw out versions
- Trip history - Last 20 trip history and Last 100 events with time stamping
- Switchable thermal memory
- Fully rated neutral with built-in protection
- Terminal orientation changeable at site for ease of termination
- New push-in type accessory terminal box
- Clear marking of accessory cabinet and terminal box for easy identification
- Interchangeable protection units

Note:

- All fixed parts are supplied as HR-HR configuration, however, it can be converted to HR/VR configuration
- All fixed ACBs are considered with rear HR-HR Terminals which can be converted to HR/VR configuration as per requirement
- All ACBs are suitable for floor mounting
- To arrive at the disconnecter (MS Version) price, please reduce the LP of breakers with LI release by ₹15,000/- and add the price of the Aux. contact, if required. Safety shutter is inbuilt as standard in the fixed part.
- All requirement of Electrically operated ACBs (FA1-FA4 frame) with required control voltage will be factory fitted with Shunt Opening Coil, Shunt Closing Coil, Motor Operator as standard supply.
- ATO (Assembly to order), ACB with accessories fitment can be supplied from the factory fitted while ordering to ABB.

** Price considered is for 240V, for other voltages, please contact the nearest sales office

For FA1 below material needs to be considered with AUX 15Q
 Plate for fixed - floor mounted - 1SDA079783R1
 Plate for withdrawable - 1SDA079784R1

SACE Formula DSP P1-P4

Performance made simple

The new SACE FORMULA DSP family consists of four frames (P1, P2, P3 and P4) reaching up to 160A, 250A, 630A and 800A respectively. The four frames are available with thermal-magnetic trip units to cover the most common AC and DC fields. Availability of most requested accessories guarantees the possibility to fulfil the main applications needs.

Easy to install

Click-in fixing for accessories to guarantee time saving and fast installations.

Quality

ABB long experience in molded-case circuit breakers design is a guarantee of quality.

Simplified selection

Availability of a short list of codes enables simplified product selection and easy ordering.

Sustainability

Compliance with the international regulations of product materials and environmental health and safety.

- Compliance to IEC 60947-2 standards
- Offering from 40A to 800A in 4 frame sizes
- Available upto 50kA performance levels (Icu = Ics)
- Circuit breakers for AC and DC applications
- Double insulation
- Isolation behaviour
- Positive operation
- Accessories covering the main standard applications and needs

Formula DSA Molded case circuit breaker

New low voltage molded case circuit breakers up to 630A

General characteristics

- Conforms to IEC 60947-2
- Fixed thermal magnetic release throughout the range
- Compact dimensions
- Common range of accessories
- Available in 1P, 2P, 3P & 4 pole versions
- Line-load reversibility
- Suitable for DC application till 250Vdc
- Operation voltage till 550VAC, insulation voltage of 690VAC and impulse voltage of 6KV

FORMULA A1

- Rated current, In 15...125A
- 1, 2, 3, 4 pole versions
- Icu = 10, 18, 25, 36KA

FORMULA A2

- Rated current, In 125...250A
- 2, 3, 4 pole versions
- Icu = 18, 25, 36KA

FORMULA A3

- Rated current, In 320...630A
- 3, 4 pole versions
- Icu = 36, 50KA

FORMULA link system

- FORMULA link in accordance with IEC 61439 Standard
- FORMULA link is a component of a power distribution system which divides the main power supply over different users
- The FORMULA link is characterised on the supply side by a main circuit-breaker which protects the whole distribution system, and on the load side by smaller sized circuit-breakers, dedicated to the individual users
- FORMULA link assembly for total discrimination between upstream and downstream devices

Arc flash protection and mitigation solutions

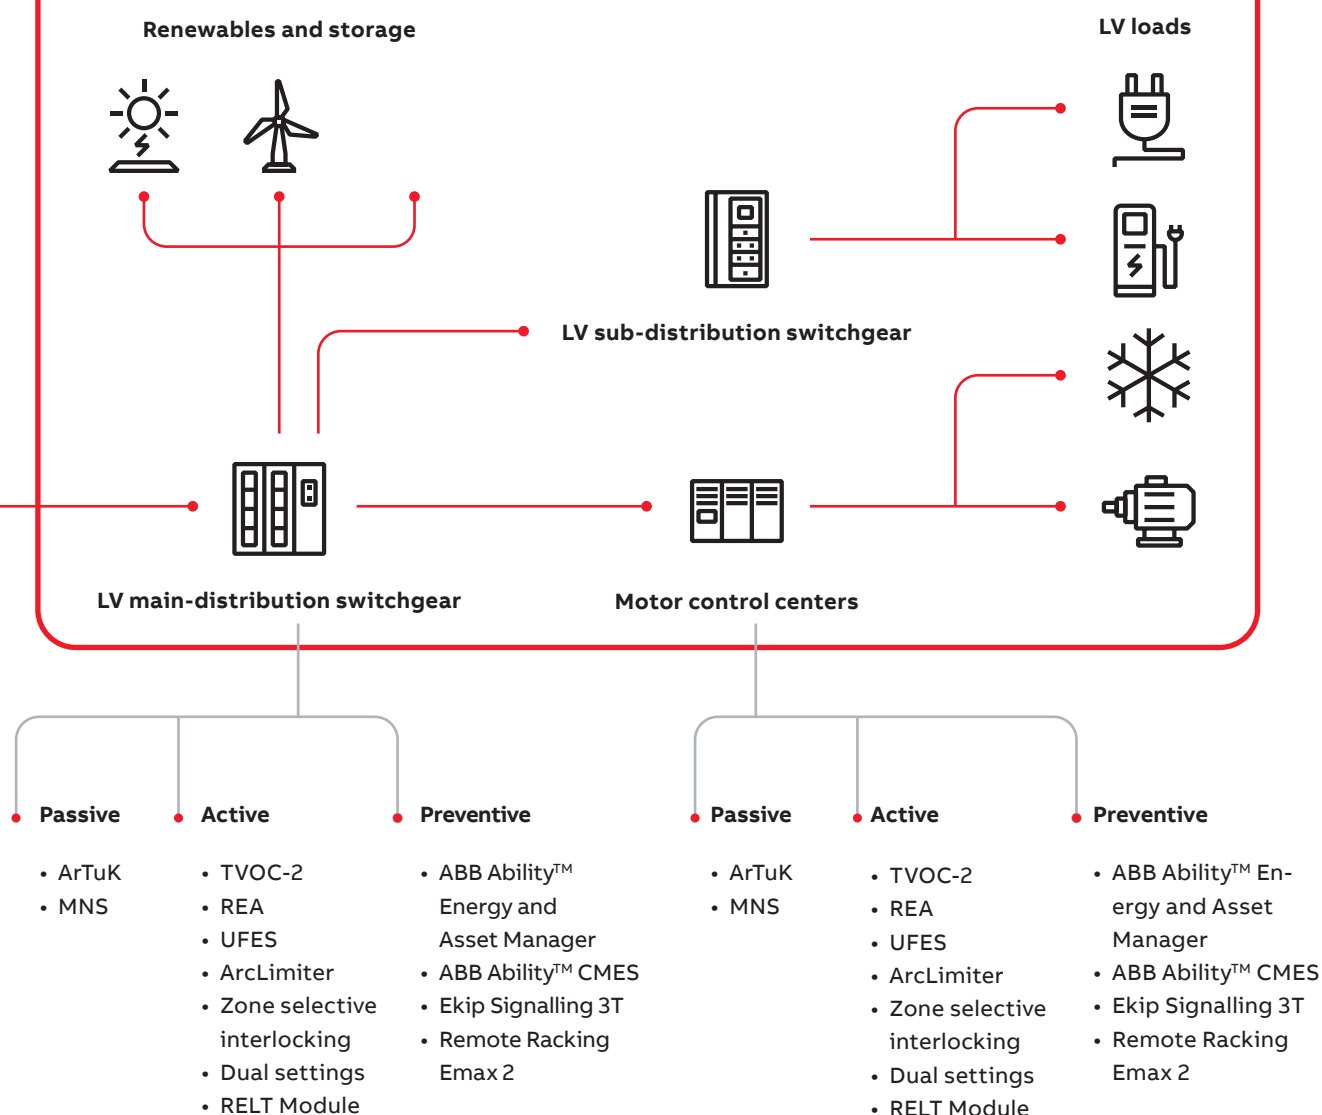

Passive, active and preventive

Most short circuit faults in LV and MV switchgears are accompanied by an electric arc. An arc fault always leads to considerable damage to equipment and personnel unless it is distinguished very fast. The fault should be disconnected as fast as possible and in less than 0.1 s to avoid serious damages and give involved person a fair chance to survive the accident without severe damages. This is a demand found in the electrical safety rules in all CE countries, ref. IEC364-4-42.

The Arc Guard System TVOC-2 is an aid to quickly detect an arc fault and trip the incoming circuit-breaker. The main advantage with the Arc Guard System is that it can trip instantaneously, i.e. override other tripping functions.

ABB's comprehensive range of LV products for Photovoltaic application

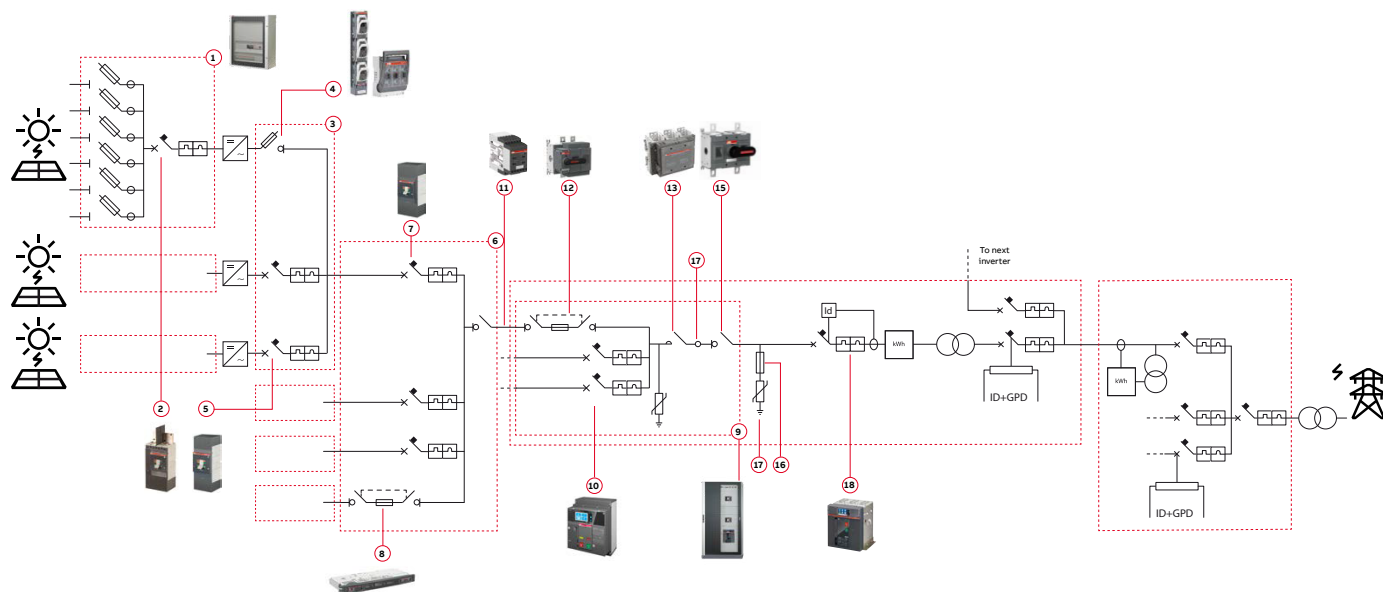

ABB drives the transition to renewable energies with a portfolio of applications for solar and grid systems. Our application packages were designed by domain experts to address your specific challenges. Discover our intelligent distribution applications for remote solar plant monitoring, outage prevention, and reduced maintenance downtime, along with tailored solutions for switching and protection. ABB's portfolio for photovoltaic and energy storage systems (ESS) focuses on delivering continuous operation, higher reliability, and return on investments, enabling customers to take full advantage of savings by adopting 1500V DC and 800V AC technologies.

Balancing renewable power supply and enduser demand has always been a challenge, but as the renewable share of total generation in many countries is growing, this challenge is increasing. In response to this, ABB supports its customers along the complete renewables power value chain, from consulting, generation, balance of system, storage, and connection up to transmission, monitoring, and control, as well as maintenance and optimization.

Application overview

Utility scale system String inverters

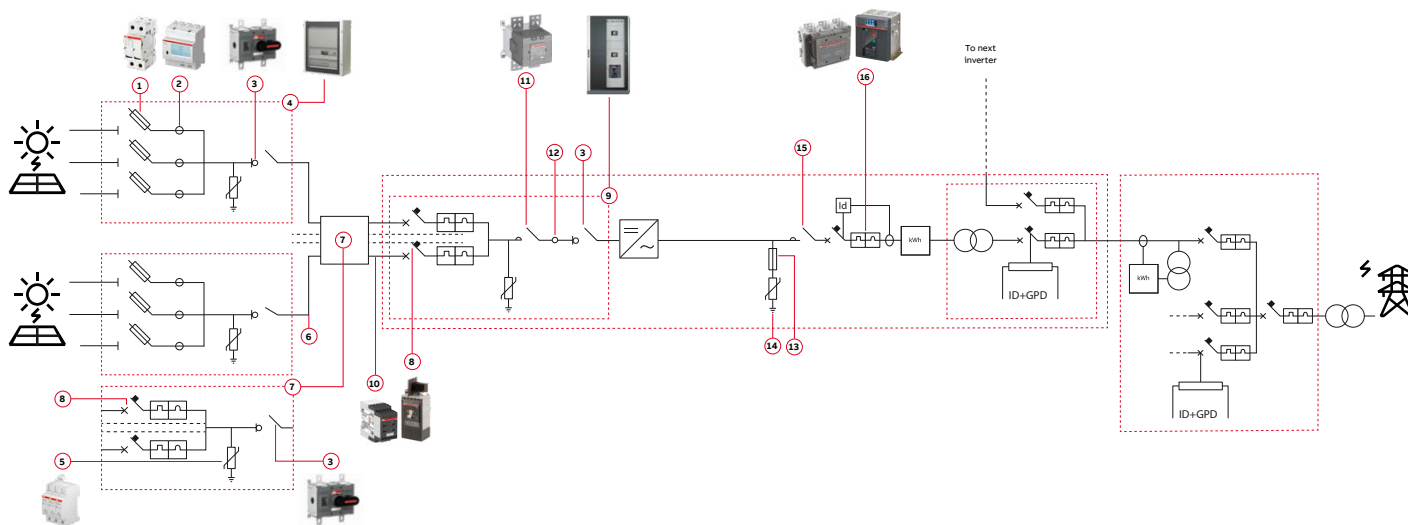

Low-voltage products:

1. String Combiner
2. MCCBs Tmax PV
3. Recombiner
4. Fuse Switch Disconnectors: InLine II and EasyLine
5. MCCBs for AC applications
6. Switchboard
7. MCCBs for AC applications
8. Switch Disconnectors Fuse: SlimLine XR

9. Switchboard

10. MCCBs: Tmax XT
11. Insulation monitoring devices: CM-IWx
12. Switch Fuse (up to 690V AC): OS
13. Contactors: AF seriesv
14. GFDI Application: S804U-PVS5
15. Switch-disconnectors: OT
16. Fuse disconnectors: E 90
17. Surge protection devices: OVR T1 / T1-T2 / T2 QS
18. MCCBs: Tmax XT, Tmax T ACB: Emax 2

Utility scale system Central inverters

Low-voltage products:

1. Fuse disconnectors: E 90 PV; Fuses: E 9F PV
2. Current measurement system: CMS
3. Switch-disconnectors: OTDC
4. String combiners: 1000V DC/1500V DC Switchboards
5. SPDs: OVR PV QS
6. String Monitoring Controller
7. Recombiner
8. MCCBs: Tmax PV

9. Switchboard

10. Insulation monitoring devices: CM-IWx
11. Contactors: GF and GAF series
12. GFDI Application: S804U-PVS5
13. Fuse disconnectors: E 90
14. SPDs: OVR T1 / T1-T2 / T2 QS
15. Contactors: AF Series
16. MCCBs: Tmax XT, Tmax T ACBs: Emax 2

SACE Emax 2/E9 and /E10

Range IEC circuit breakers at 800-900V and 1000V

Common data

Rated service voltage Ue	[V]	800-900 (/E9), 1000 (/E10)
Rated insulation voltage Ui	[V]	1000
Rated impulse withstand voltage Uimp	[kV]	12*
Frequency	[Hz]	50 - 60
Version		Fixed - Withdrawable
Suitable for isolation according to		IEC 60947-2
Ultimate short circuit breaking Icu	[kA]	Upto 100**
Short circuit withstand current Icw	[kA]	Upto 90

(*) 15kV for E4.2/E10

(**) Icu value mentioned for 800V

- Smart, plug-and-play architecture, easy to use
- The best performance up to 1000V of any device on the market
- The first smart circuit-breaker that enables direct communication with ABB Ability™ EDCS
- Emax 2/E9 & / E10 all-in-one is the most compact circuit-breaker on the market

For further detail, consult
the Emax 2/E catalogue
for ACB >690Vac

SACE Emax 2/E12

Range IEC circuit breakers at 1000-1150-1200V up to 1380V

Common data

Rated service voltage Ue	[V]	1200
Rated insulation voltage Ui	[V]	1500
Rated impulse withstand voltage Uimp	[kV]	15
Frequency	[Hz]	50-60
Number of poles		3
Version		Fixed- Withdrawable
Suitable for isolation according to		IEC 60947-2
Ultimate short circuit breaking Icu	[kA]	Upto 65
Short circuit withstand current Icw	[kA]	Upto 65

The SACE Emax2/E12 automatic circuit breakers have been certified according to IEC 60947-2. Three levels of performances are offered: "S" with essential performances, "H" with advanced breaking capacities (85kA@1000V, 65kA@1200V), and "V" with extended voltage range up to 1380V.

Devices are available in fixed and withdrawable versions, and can be fitted with a vast assortment of electrical and mechanical accessories already available for the standard SACE Emax 2 range.

For further detail, consult
the Emax 2/E catalogue
for ACB >690Vac

SACE Emax 2 MS/DC-E

Range IEC Air switch disconnectors at 1500 V DC

The SACE Emax 2 MS/DC-E IEC range has been developed for installations up to 1500V DC and 4000 A, with short-time withstand current up to 100 kA. The SACE Emax 2 MS/DC-E is compliant with DC-PV2, the most demanding Utilization Category according to IEC 60947-3 Annex D, since it requires the ability to connect and disconnect PV circuits where significant overcurrents may occur and where current flow can be in either direction; these are common characteristics of centralized PV systems.

Because of dedicated shorting busbar (jumper) kits, all four poles can be connected in series to isolate a single polarity source, or alternatively for a dual polarity source 2 poles can be configured in series for the positive supply and the other 2 poles in series for the negative supply. SACE Emax 2 MS/DC-E can be fitted with a vast assortment of electrical and mechanical accessories already available for the standard SACE Emax 2 range. The IEC version has also achieved China CCC certification.

Rated impulse withstand voltage Uimp	[kV]	12
Number of poles		4
Version	Fixed - Withdrawable	
Suitable for isolation according to	IEC 60947-3	
Utilization category	DC22A, DC-PV2 (Annex D)	

For further detail, please consult the SACE Emax 2 MS/DC-E technical catalogue

Tmax PV: Photovoltaic range molded case switch disconnecter upto 1500V DC

Tmax PV is the latest Generation product up to 1600 A/1100 V DC/1500V DC.

- IEC 60947-3 certification
- 4 different sizes
- T7, available in the two versions, with lever operating mechanism and motor operator
- Rated insulation voltage up to 1150 V DC/1500V DC
- Advantages like
 - excellent performance-dimensions
 - vast and complete range of accessories for all requirements
 - complete remote control with MOE options

Tmax PV: Photovoltaic range MCCB upto 800 V AC

Tmax PV is the latest Generation product up to 800A/800V AC/1000V AC/1150V AC.

- IEC 60947-2 certification
- 2 different sizes
- Rated insulation voltage up to 1000V AC/1150V AC
- Protection settings available in thermal-magnetic, electronic trip unit (for power distribution & motor protection application)
- Advantages like
 - excellent performance-dimensions
 - complete range of accessories for all requirements
 - remote control with MOE options

DC switch disconnectors for PV application

OTDC 10A....1000A

- ABB offers a compact DC switch range for single and multi-circuit disconnecting
- Carefully designed arc plates and dual magnetic breaking, breaking power is optimized across the entire current range
- As a result of symmetric pole design, the connections are independent of polarity. The user can make the connections in both ways
- OTDC is the only DC switch in the market that has visible contacts
- The mechanism can be located between the poles or on the side of the switch
- Special four pole versions can be made for double circuit applications
- The operation of the switch is not vulnerable to voltage peaks and it is independent of the user (quick make quick brake)
- The switches are available in direct mounting handle version as well as external door mounted handle version
- The power losses are very low, results in high efficiency

* Handle needs to be considered extra

Fusegear

Easyline - XLP

Fuse Switch Disconnecter 1, 2, 3 & 4P for both AC and DC application 160...630A

EasyLine range got a sturdy, uniform design that is operator friendly and safe with IP 30 from front in closed position and IP 20 in open position.

Features

- All the XLP cable terminals can be delivered with integrated bolts for cable lugs or with integrated bridge clamps (BC) for easy direct cable connection
- Type tested according to EN60947-3
- Easy to recycle/EN14001 standards
- Quick-make operation device
- Integrated IP20 cable termination
- IP30 degree of protection from the front
- Replacement compatible to similar types in the market
- Voltage measuring from the front
- V-0 plastic materials

EasyLine Fuse Switch Disconnectors are developed and type tested according to IEC60947-3.

Applications

- UPS: Uninterruptible Power Supply, used for the power supply for computer/servers, storage devices, communication network systems, industry control systems, etc.
- Telecom power supplies
- General protection in smaller distribution panels using 1-pole or 2-pole configurations AC or DC

InLine II - ZLBM/ZHBM

Robust and reliable switching and protection

Latest technology of Fuse Switch Disconnectors to ensure the best stability and highest safety in the power distribution network. The new generation InLine II also offers the highest level of personal safety during operation and service.

Features

- Available as 160A, 250A, 400A, 630A, 800 and 1250A types in combination with NH/DIN HRC Fuse Links acc. to EN/IEC 60269
- Type tested in accordance to EN/IEC 60947-3
- 1 - pole and 3 - pole variants
- For vertical and horizontal installations
- Designed for 185 mm busbar distance
- IP30 degree of protection from the front
 - Padlocking in open and closed position at the 3 - pole version
 - Padlocking in closed position at the 1 - pole version
- Park position with possible padlocking at the 1 - pole type
- Compatible dimensions to equivalent products in the market

Applications

- Cable Distribution Cabinets (CDC)
- Low voltage distribution in compact secondary substations (CSS)
- Distribution boards for industry, housing and office buildings

Switches

ABB has a wide portfolio of low voltage switches. They are suitable for diverse applications, in motor control centers, in switch boards and as main switches in various equipment and machines. From single to 8 poles and combination switches for change-over, automatic transfer, bypass, reversing, etc.

Switch disconnectors 16 – 4000 A

The switch disconnector is largely used as the main switch in low voltage switchgears for distribution of power, starting and stopping motors and isolating loads during maintenance.

The range from 16 to 125 Amps are either base plate or door mounted by snap-on or screw fitting front operated 3, 4, 6 and 8-pole are available as standard.

From 160 to 4000 Amps the switch disconnectors, also called load break switches, are designed as pole modules and they are available as 1, 2, 3 and 4-pole versions, front or side operated.

Switch disconnectors OTDC upto 1000 A

The OTDC range of switch-disconnectors is specially designed for DC applications upto 2000 VDC. Thanks to a compact design, efficiency and reliability, OTDC switches bring photovoltaic installations to the next level.

Switch disconnector fuses 16 – 1250 A

The switch disconnector fuse is used as the main switch in low voltage switchgears in industry for distributing power and protecting motors, cables and other devices against short circuits and over loads.

The switch disconnector fuses are available for all types of fuse links, DIN, BS, NFC, UL, CSA.

The range includes single pole to four pole versions, front-or side-operated. The pole module design enables location of the operating mechanism in any position

together with the direction of the terminals giving flexibility to installation in different types of cubicle designs.

Change-over and transfer switches 16 – 3200 A

ABB's change-over and transfer switches are designed to transfer loads from one power source to another in a wide variety of applications.

The range includes switches from 16 to 3200 Amperes, which can be operated manually, remotely by using a motor or automatically.

ABB's change-over and transfer switches are tested according to IEC 60947-6-1 and IEC 60947-3 standards. The switches have ratings in AC31 and AC33 utilization categories, up to 415 V. In motorized switches, the motor operators have a wide voltage operation range.

Enclosed switches 16 – 1600 A

The ABB enclosed switches are suitable for power distribution in factories and buildings, as local motor isolators and as main switches. Each incoming supply shall be provided with a hand operated main switch-disconnector according to the Machine Directive EN 60204 and isolate reliably the electrical equipment from the supply.

ABB enclosed switches are designed and tested to meet these requirements and complies with IEC 60 947-3.

The enclosed switches are easy to install and safe to use in industrial, public and residential environments. The indication of the handle is always reliable and lockable in the OFF-position with a standard padlock. ABB's long experience in switch disconnects guarantees a long and safe use.

Auto Transfer Switches 40 – 4000 A

Technologies for external environment - Complete range 40-4000 A. ABB offers a wide selection of automatic transfer switches (ATS). They have the features and functionality that make them suitable for diverse applications.

OFAF HRC fuse links and base, DIN-type

DIN -type fuse links, gG, 500 V, 80 kA

Safety switches & enclosed switch-disconnectors

Wide range of enclosed heavy duty switches
From 16 to 1600 Amperes, 690 V

Reliable in extreme conditions

All our enclosed safety switches are built to last and resist the wear of harsh operating conditions. The enclosures are made of high-quality, UV-resistant materials and the degree of protection is up to IP65. All switches are suitable for use both indoors and outdoors.

Safety and protection

Our design is based on ensuring safety and preventing electrical accidents. To make maintenance and installation as safe as possible, we have included features such as padlockable handles, cover interlocks and gas pressure relief functions to our products.

Speed up your project

We can help speed up your project by making the selection of the right switch as quick and easy as possible. Our web-based selection tool, e-Configure, enables you to select the best switch for your particular application in the easiest way possible.

Safety switches & enclosed switch-disconnectors

Enclosed switches are designed and used as main switches for applications, which need to be isolated from the network. The range includes front operated and side operated switch disconnectors, switch fuses and changeover switches enclosed in plastic, steel sheet or stainless steel sheet and aluminium enclosures. They are rated for utilization categories including disconnecting as well as making and breaking the load. In addition, the switch fuses equipped with fuse links protects the application and the cables from overload currents and short circuits.

Plastic enclosures

The plastic enclosures are most suitable for locations with high chemical and moisture requirements. In addition, they are light and easy to install and handle.

Steel sheet enclosures

The steel sheet enclosures are hot dip galvanized and the surface is polyester powder painted. The enclosures are durable and robust for various environments.

Stainless steel sheet enclosures

The stainless steel sheet enclosures are made of AISI 304 stainless steel. They are used particularly in the food and beverage industry and in locations where high hygiene is required. The smooth surface does not require any painting and is easy to clean.

Aluminum alloy enclosures

Aluminum enclosures have very good impact strength and protection against UV light. They are suitable both for indoor and outdoor use in medium to heavy-duty applications.

Safety for personnel – reliable position indication

- Padlocking in the OFF-position with one, three or six (with the shackle L6) padlocks against unintentional start-up. The handle cannot be padlocked in the OFF-position if one of the contacts is not in the OFF position
- The cover cannot be removed if the handle is padlocked
- Door interlock in the ON-position
- Arc proof, short circuit durability function: Expander washers in aluminium enclosures with $I_e > 160$ A and door locking release in large metal sheet enclosures type MSC
- Door interlock defeatable with rectangular and pistol type handles

Enclosed switch disconnectors - ONE20

ONE20

Switches can be used as main switches or for local isolation in various applications, such as HVAC, residential water pumps and heat pumps or commercial lighting.

Features

- Available in 2-, 3- and 4-pole versions
- Thermal current (I_{th}) 20A
- Color options: light grey, dark grey, red-yellow
- Weather proof enclosure due to high IP class (IP67) and
- UV resistant material

Fire rated enclosed switch-disconnectors

The answer to your fire safety needs

Fire rated enclosed switch-disconnectors maintain the power supply to fans or other smoke extraction equipment in case of fire. Typical environments are tunnels, highrise buildings, parking spaces or commercial buildings.

Fire rated switch-disconnectors maintain the power to the essential equipment such as smoke extraction or ventilation fans to facilitate safe evacuation of buildings, car parks, constructions or other public areas in case of fire. These switch-disconnectors are generally installed near the extraction fan for isolation of power supply and have been tested in conjunction with fan equipment to meet the stringent thermal requirements of fire safety.

We offer fire rated enclosed switch-disconnectors from 20 A to 800 A, available in 2-, 3-, 4- and 6-pole versions, in IP65 aluminium or steel sheet enclosures. All the switches are supplied with padlockable handles. Depending of version they can be padlocked in both OFF- and ON-position. The F200, F300 and F400 series are EMC compatible when equipped with EMC-cabling accessories.

Our fire rated enclosed switch-disconnectors have been tested by a third-party laboratory according to the standard EN 12101-3. According to this standard, the switch should lead current after the test, but the switch does not have to be operated. We offer three different classes of fire rated enclosed switch-disconnectors:

- F200
200°C in 120 min
- F300
300°C in 120 min, in order to also cover F200 applications
- F400
400°C in 120 min

Fire rated enclosed switch-disconnectors

The answer to your fire safety needs

Public safety is a priority for ABB. With the new fire rated enclosed switch-disconnectors, we provide a solution to meet all the thermal requirements to keep public areas smoke-free, facilitating a safe evacuation in case of fire. They are ideal for the ventilation or smoke extraction system to keep the air smoke free.

Safety and protection

Public safety first

Our rated enclosed switch-disconnectors maintain the power and provide isolation to essential smoke extraction and ventilation equipment. Padlocking is possible in OFF- or ON/OFF-positions depending on the version.

Reliable in extreme conditions

Designed to perform

The material has been specially designed for installations where the power supply must be maintained even at high temperatures. To ensure a safe and reliable operation in abnormally hot environments, our switches have been tested according to the standard EN 12101-3.

20 A to 800 A, available in 2-, 3-, 4- and 6-pole versions in IP65 aluminium or steel sheet enclosures.

Auxiliary contacts are included in the F200 series and depending on the version, also in F400 series.

The F200, F300 and F400 series are all EMC compatible when equipped with EMC cabling accessories.

All the switches are supplied with padlockable handles. Depending on the version, they can be padlocked in both OFF- and ON-position.

Kabeldon low voltage switchgear system

Features of the Kabeldon IP-system are its simplicity and reliability. These are the most important factors when you want to achieve low operating costs and high delivery reliability in a distribution system.

- Busbars of continuously-extruded aluminium sections, insulated with a layer of polyamid.
- The busbar has a touch-proof contact slot.
- Blade fuses in all of the fuse-switch disconnectors.
- The switching devices can be arranged in any order, regardless of rated current.
- All parts, busbars and devices, fulfil IP2X protection in accordance with IEC 60529*).
- Switching devices 100-1600 A.
- It is easy to add new switching devices to existing distribution boards.
- Switching devices are mounted on and connected to the busbar system in the same operation.
- Switching devices can be connected when the system is live.
- Always voltage-free ("dead") when changing fuses.
- Busbars are available with rated currents from 400 to 1600 A.
- Switching devices, connectors and busbars combine to form a modular system. Each module is 12.5 mm. The modular system makes planning easier.
- The compact design of the switching devices makes them suitable for use in many different types of distribution boards.
- All switching devices have a utilisation category.

OT Plus change-over switches NEW

One giant leap to progress

The OT plus change-over switch range offers a smarter, safer and more reliable performance to suit needs from 16A to 160A with 3 and 4 pole options. With greater adaptability, the OT plus change-over switches are able to cater to a broad range of applications than ever before.

G2 frame - 63A-100A

G3 frame - 30A-160A

Adaptable

Support more applications thanks to adjustable fourth-pole timing, which allows two different time offsets within the same switch: simultaneous or early-make / latebreak. Find the right fit and install faster with overlapping current ratings, and user-friendly auxiliary contacts.

Sustainable

Go greener with a range that cuts power losses by up 27%, that is designed for a circular economy and made with high portion of recycled materials. Additionally, the OT Plus switch is over 95% recyclable.

Reliable

Improve safety for people and assets, thanks to our true fourthpole design, which reduces the risk of faults. Simplify and strengthen security with pre-installed lockable operating handle

OT Plus change-over switches

Front operated change-over switches, base and DIN-rail mounting.
Including padlockable direct mounted handle, and protected terminal clamps IP20 from front. External operating handle and shaft are not included.

Operational voltage: <415VAC

OTM_C_D Dual Power Automatic Transfer Switch

- Rated current up to 2500A
- Equipped with 20D/21D controllers
- Features isolation functionality
- Clearly visible switch break for instant status indication
- Capable of short-term overload and short-circuit current handling
- Supports load switching capability
- Reliable mechanical and electrical interlocks ensure electrical safety
- Allows for manual, electric, and automatic operation
- Patented built-in clutch design for smoother manual operation
- Offers 3 stable switch positions: I-O-II
- Single-phase detection capability
- 21D enables Modbus RTU communication functionality

The world's first true ATS is here Introducing TruONE.

A critical breakthrough for critical power

What makes TruOne® unique

- Full product offering up to 4000 A and 600 V AC
- IEC/UL1008 approved
- Solenoid Operated mechanism for fast and reliable switching
- Fast Switching less than 50 ms with in-phase transfer
- Readily available emergency manual operation
- Overlapping/Make first break last Neutral
- Generator Start and Stop Signal
- Elevator pre and post signal
- High current protection and alarm load shedding programmable contacts
- On load and Off load testing
- Generator exercisor with real-time clock
- Embedded Power measurements
- Predictive maintenance
- Faster commissioning with Ekip Connect 3 software
- Compatible with 6 industrial communication protocols
- 24/7 monitoring and customizable text or e-mail alerts available with ABB Ability™ Energy and Asset Manager

TruONE® general overview

1. Automatic transfer switch
2. Embedded ATS control unit and mechanism
3. Detachable HMI unit, three types of control interfaces Level 2 (DIP), Level 3 (LCD) and Level 4 (Touch)
4. Slide switch (Hand - Locking - AUTO) for selection of the operation mode
5. Padlocking the automatic transfer switch to prevent automatic and manual operation
6. Handle for manual operation
7. Position indication
8. Terminals for control circuit connections (behind the cover)
9. Place for connectivity modules (aux power supply, communication and signaling)
10. Place for sensor module (included as standard with Level 4 controls)
11. Place for auxiliary contact block
12. Location of product identification label
13. Programming port, only for Ekip Programming module and Ekip Connect software

Automatic transfer switches - IEC

Ordering Information

Delayed transition – Open style, Level 2 Level 3 & Level 4 controls

I-O-II –operation with stable OFF position between positions I and II.

Delivery includes handle for manual operation, 2 m RJ45 connection cable between detachable HMI and ATS frame.

Terminal connection kits (bolts, nuts and washers) available as accessory.

Bottom entry - Source 1 and Source 2 connections on bottom, load connections on top

* The OXEA1 auxiliary power supply module is used for: a) connecting connectivity modules (signalling and communication) to the switch b) powering the ATS controller and connectivity modules from auxiliary 12-24 Vdc power supply, to keep them operational during power failures.

TruOne® Bypass ATS

Continuous power supply and innovation

The TruOne® bypass ATS is a dual-bypass isolation type ATS launched by ABB, which adopts an integrated design combining the ATS and the manual bypass switch to perform power supply in a safe, reliable, continuous and stable manner.

Application of bypass ATS

The bypass type ATS may be used to manually switch the load to the bypass switch for power supply when the ATS needs to be powered off for maintenance or repair on the customer's site within a short time. The operating mechanism is performed to disconnect the ATS from the main circuit for electric isolation and then the ATS is removed for maintenance. After the maintenance is completed, the ATS can be moved to the test position for functional testing and normal power supply to protect the critical load of the customer from power outage during the maintenance.

Applications

- Large data centers or Class A machine rooms
- Particularly important places with the diesel as a backup power source
- Semiconductor factory
- Large banks, trading centers, hospitals, airports

TruOne® Bypass ATS

ABB's bypass ATS adopts an independent dual-bypass design. Different from the single bypass structure of similar products, the dual-bypass structure can ensure the maintenance for ATS without power outage of primary or standby power supply to realize true dual protection! It consists of a main ATS and a bypass ATS, both of which adopt an independent seamless design with integrated mechanical and electrical interlocks to prevent possible human misoperation.

TruOne® Bypass ATS

Proactive outage prevention

- Contact wear monitoring¹ including real-time status and predicted contact end-of-life
- Minimum 3 embedded temperature sensors
- High current protection and alarm
- 24/7 monitoring and customizable text or email alerts available with ABB Ability™ Energy and Asset Manager

24/7
monitoring

Minimum
3
embedded
temperature sensors

Simplified service

- Quick swap HMI
- 95% fewer spare parts than legacy Zenith offering
- ABB HMI navigation and programming tool common to all ABB LV components

95%
fewer spare parts

Easier to install, commission and operate

- Color touchscreen HMI with intuitive menu navigation, measurements display, and 250 event log
- Ekip Connect software helps reduce commissioning time by 50%
- Five factory programmed packages available; IO can be re-programmed in seconds

Up to
50%
faster commissioning
with Ekip™ Connect

High performance

- High time-based withstand and closing ratings (WCR) and even higher co-ordinated WCR, minimum of 100kA in each frame
- Short-time withstand ratings in every frame
- Fast controller response to outage recovery and fast switching (<50ms)

Fast switching
<50ms

¹ Contact wear monitoring features available only on 100-1200A OT and DT range. Additional features to track overload operations and average transfer current are available as standard on all ZBTS products.

ABB's comprehensive range of LV control products

The range of ABB control products ranks amongst the most extensive on the market with a full range of innovative solutions for control & protection, motor starting, intelligent motor management, measurement, monitoring and safety applications.

The business unit is comprised of 3 main product families:

- Control & protection
- Electronic relays
- Safety products

Our products

Our products are already among the most extensive in the market and we are constantly adding new products in order to meet ever changing customer needs. Quality and reliability are built into every device to ensure total performance satisfaction, even in the most demanding applications.

We offer a very modern and competitive range of contactors, starters, manual motor starters, a wide range of electronic relays and overload relays, together with an extended range of pilot devices.

Our offering

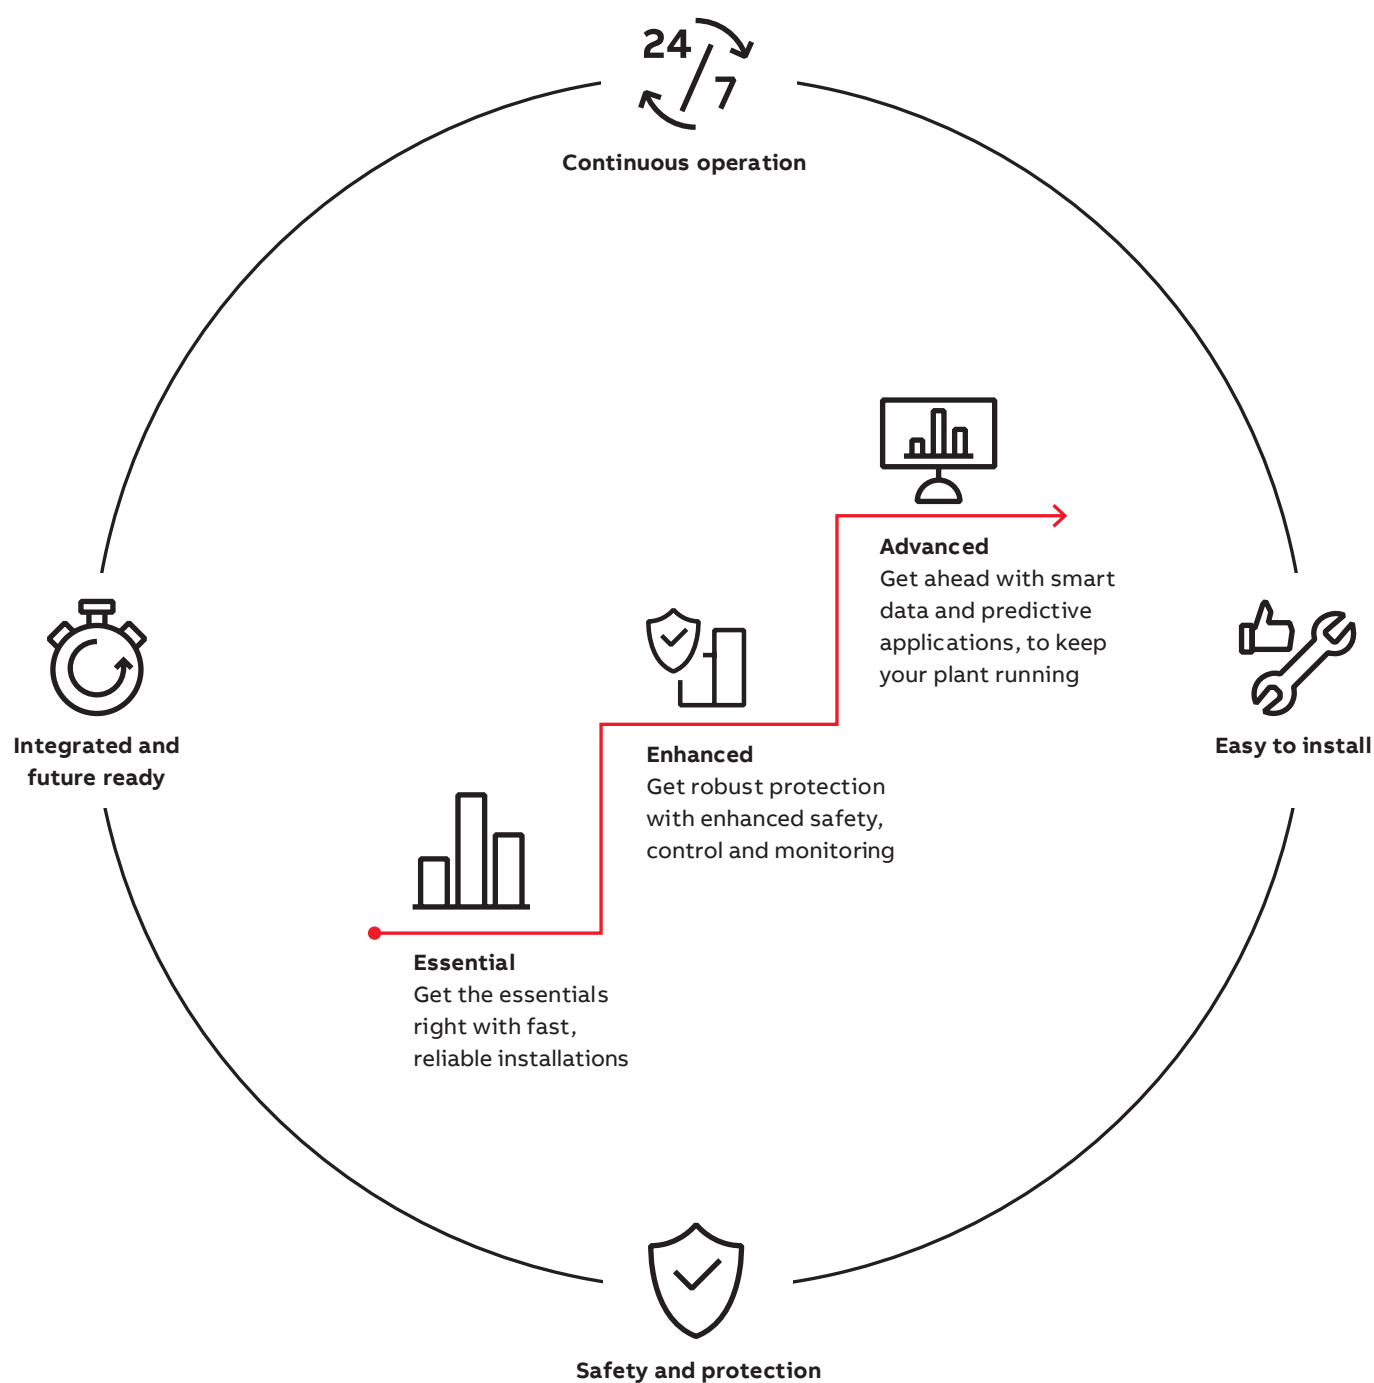

- Contactors
- Manual motor starters
- Thermal overload relays
- Electronic overload relays
- Intelligent motor management systems
 - Universal motor controllers
 - Communication fieldbus plugs
- Electronic products and relays
 - Timers
 - Measuring and monitoring relays
 - Power supplies
 - Interface relays & optocouplers
- Jokab safety systems
- Pilot devices
- Softstarters
- Hybrid starters

Motor starting and protection

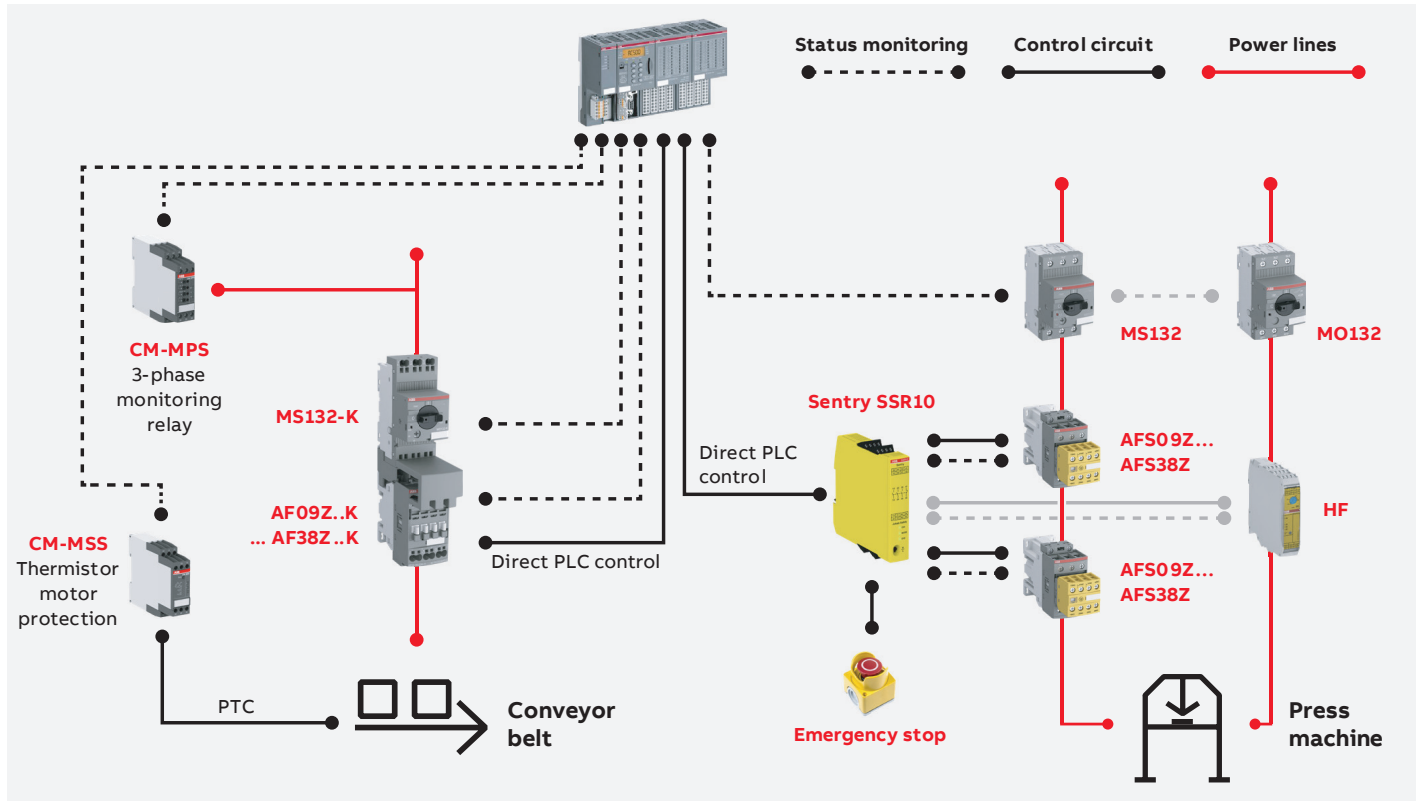

Keep things moving with protection and control - at every level.

Our broad portfolio of motor starting and protection solutions are fully scalable, allowing you to keep things moving whatever the extent of your operations.

Enhanced solutions

Get robust protection with enhanced safety, control and monitoring

Safety and protection

Enhanced safety and protection for solutions with higher specification requirements.

- Integration in machine manufacturer's systems complying with main standards EN ISO 13849, EN 62061 and IEC / EN 61508
- Trouble-free and economic operation of machines and installations, thanks to the monitoring of all important parameters in your three-phase network
- Prevent overheating, overload and insufficient cooling. Irregularities are signaled early to avoid plant downtime

Speed up your projects

Reduce time in planning, designing, assembly and delivery of custom panels to market.

- Use the same starters in Europe, Asia and North America as one contactor coil now handles 100 V – 250 V AC / DC, 50 / 60 Hz
- Push-in Spring allows you to insert both ferruled and rigid cables without the need to use any tools, boosting your productivity like never before
- With more than 1800 tested and validated co-ordination tables available in the SOC tool, you can quickly and easily choose the right ABB solution

Space-saving

Space is usually very limited for control panels, but our compact solutions are designed to easily fit into your application.

- Motor starters can be controlled directly by PLC thanks to AF contactor versions with low consumption coil, external or built-in PLC interface. No need for interface relays, which requires extra space
- Motor starters up to 3 kW / 3 hp require 90 % less space thanks to ABB's HF electronic compact starter. At just 22.5 mm width, it still provides motor starting functionalities with embedded protection and safety

Advanced solutions

Get ahead with intelligent, predictive operations, thanks to integrated data and advanced connectivity

Universal motor controller UMC100.3

Novolink modules for AF contactors

Softstarter PTSX

Integrated and future ready

Data and precise measurements accessible via flexible communication options ensure reliable operations and efficient energy management. Adapt to future needs without big investments.

- The UMC100.3 is compatible with more communication protocols than any other motor controller. This allows you to have software that enables predictive maintenance and acts as an intelligent data hub

Continuous operation

Detect problems earlier and prevent plant stand-stills with integrated protection functions as well as extensive diagnostic and status information.

- Protect your motors at all times with the UMC100.3, even if your control or communication system (Ethernet or Fieldbus) breaks down
- Softstarters help increase your motors lifetime by protecting it from electrical stress. Starting currents are easily optimized to your load, application and motor size

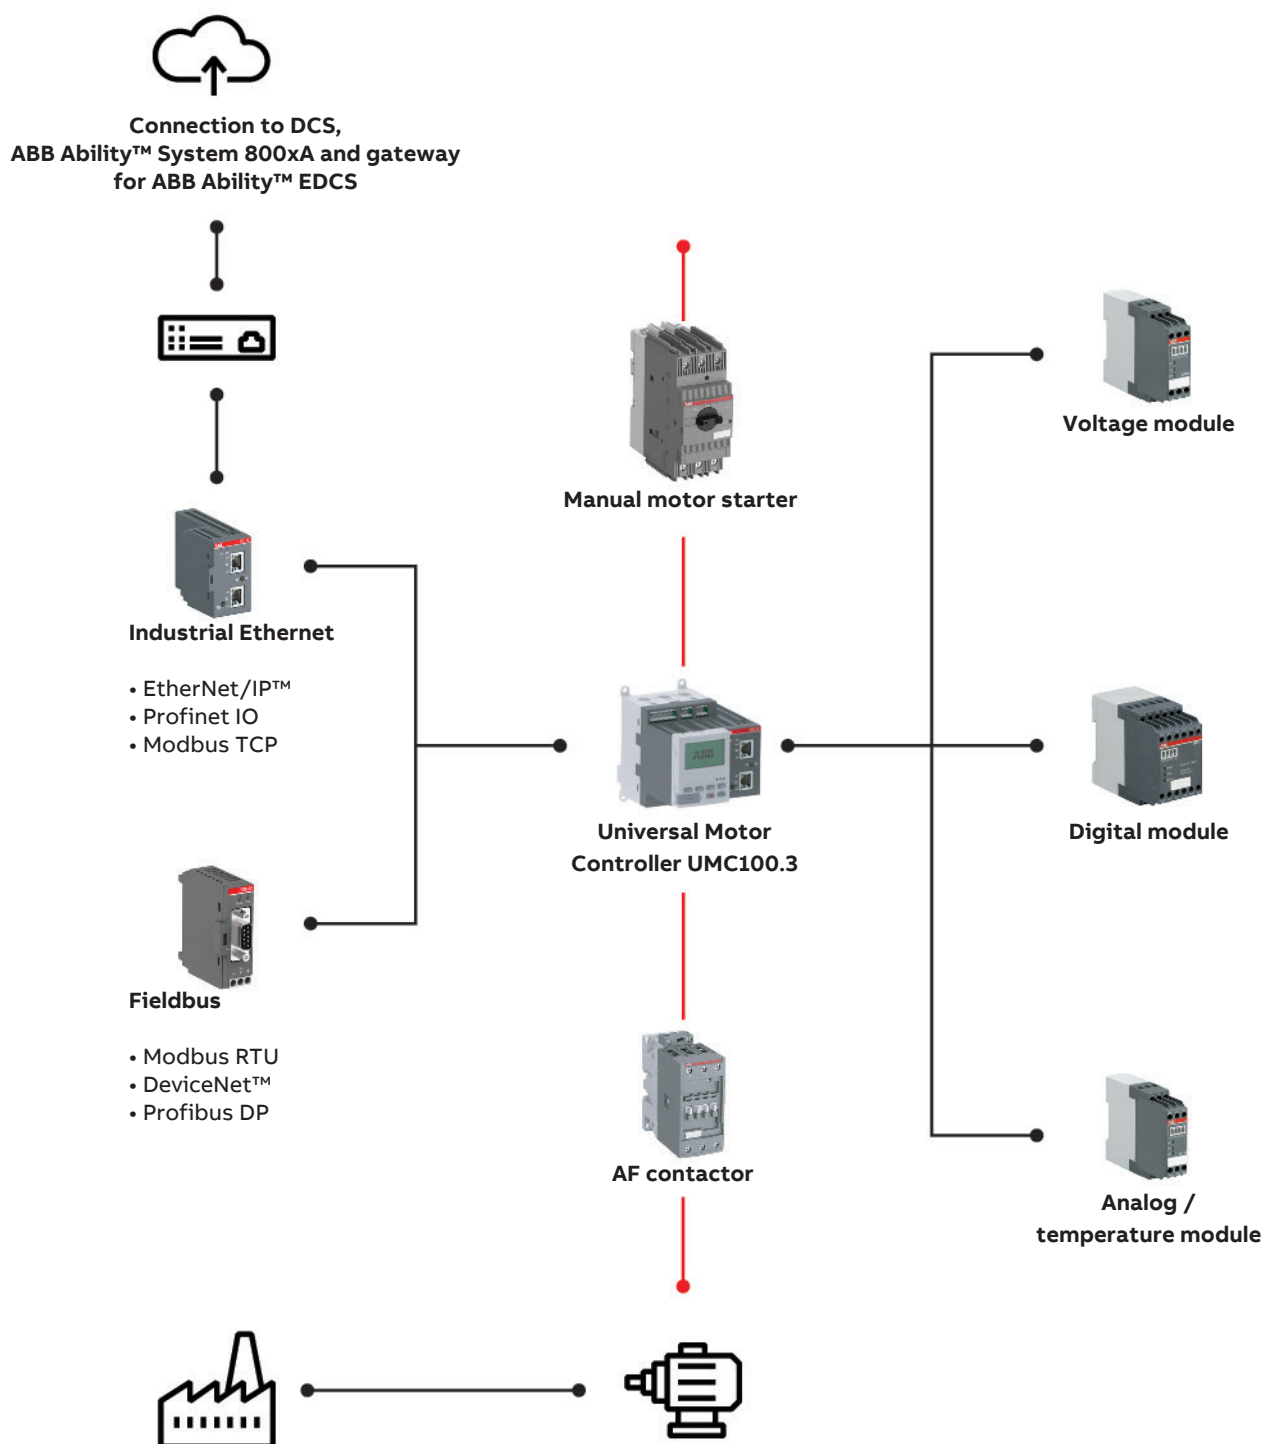

Speed up your project

Design, commissioning, and maintenance are easy, cutting costs and saving you time. ABB's flexible designs allow you to have a tailor-made solution.

- With the UMC100.3, simple software configuration means that you are always in control. Parameters can be set via quality FDI-based software or directly using the operating panel
- Reduce your installation time and panel size by having all features you need built into your softstarter

UMC100.3 application examples

Complete solutions for control panels

ABB's broad portfolio offers all you need for your application, at every level.

Smart Communication Card NEW

A piece of cloud for everyone

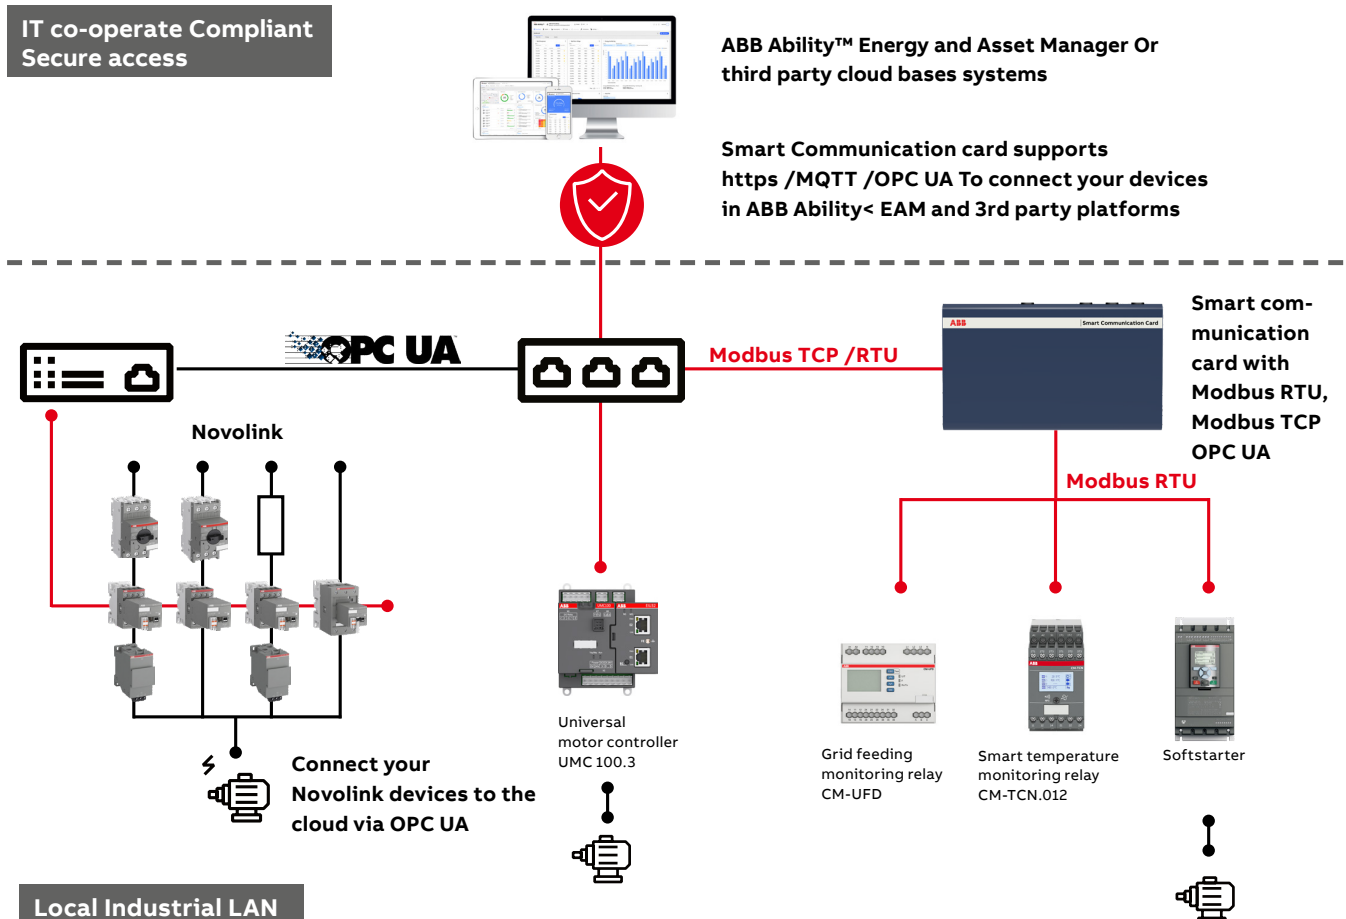

Digitalization is not the future – it is there.

Introducing Smart Communication Card to enable connecting your devices to the ABB Ability™ Energy & Assets Manager and third party cloud-based portals.

Connect your devices to ABB Ability™ and other cloud-based platforms by selecting one of multiple options including MQTT, https, OPC UA.

Speed up your project with user-friendly web-based tool to configure and commission the Novolink Communication Card.

AX Contactor

AX contactors are mainly used for controlling 3-phase motors and power circuits up to 690 V AC.

These contactors are of the block type design with:

- 3 main poles and built-in auxiliary contact
- Control circuit: AC operated
- Add-on auxiliary contact blocks for front or side mounting and a wide range of accessories

Contactors: 3-pole – AC operated

Mechanical latching units description

For converting standard contactors into latched contactors. The WB75-A block contains a mechanical latching device with electromagnetic impulse unlatching (AC or DC) or manual unlatching.

Contactors: Wide band AC/DC operated **AF technology**

Conventional AC coil

Reliable in all networks

The electronic system within the AF contactor continuously monitor the current and voltage apply to the coil. The contactor is safely operated in an always optimized condition and hum free.

Reduced coil consumption

AF coil and energy consumption is reduced up to 80%. This allows a reduction of the temperature rise, the size of control transformers and size of cabinets.

AF coil

Wide control voltage range

With conventional contactor technology, different contactors are needed for different network voltages. Thanks to the wide operating range of the AF contactor, it can operate just as well in Europe as in Asia or North America. The core coil of the AF contactor range covers 100-250 V AC / DC, 50 / 60 Hz.

Built-in surge suppression

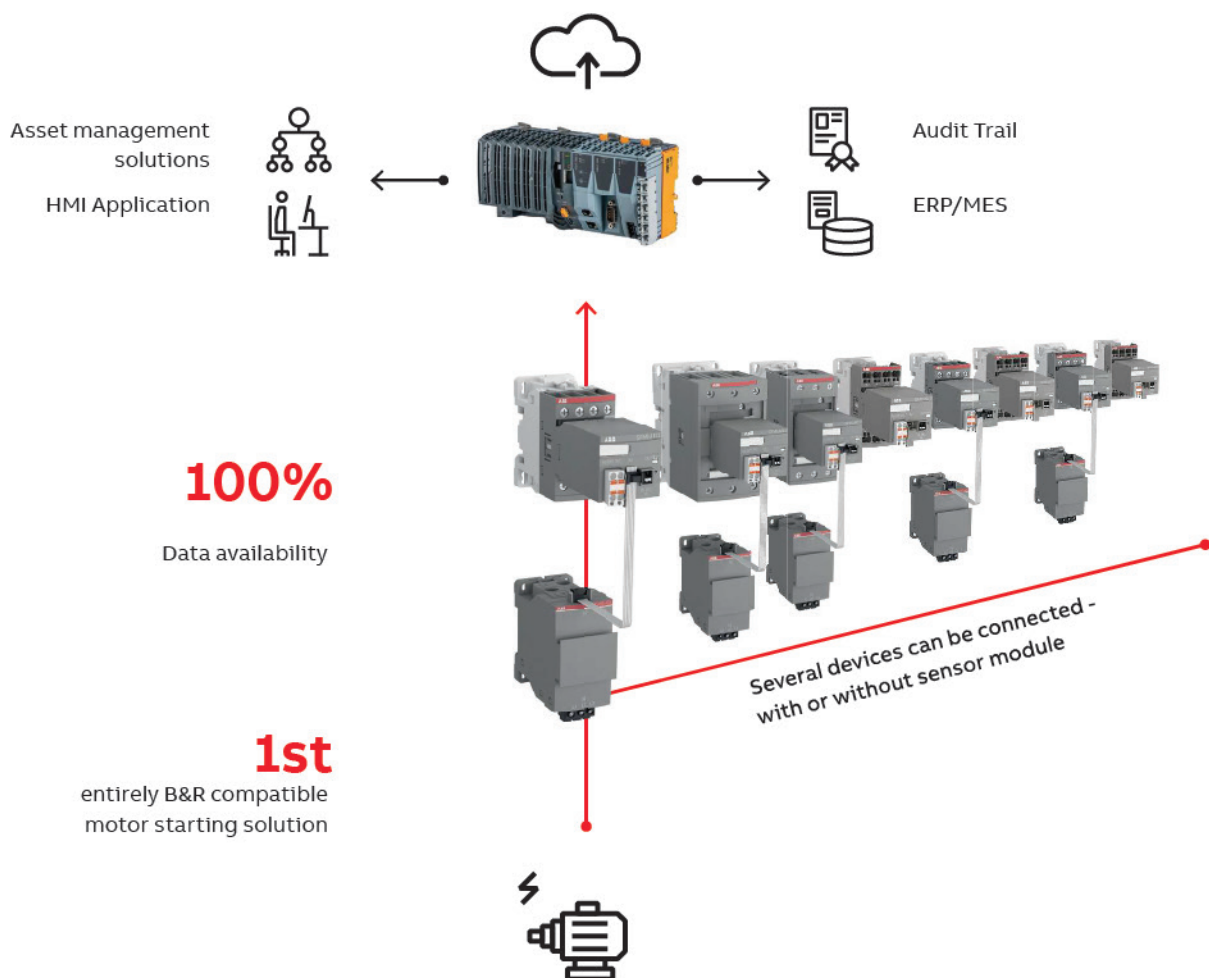

With conventional contactor technology, it is recommended to use an external surge suppressor, an accessory that could cost as much as half of the contactor. With the AF technology, the surges are handled by the contactor and never reach the control circuit. One less product and one less complication to worry about.

INTRODUCING **NEW**

Novolink™ – smart function and sensor modules for AF contactors

Integrated into the B&R X20 system

Engineering efficiency - only two configurable components cover a wide range of applications, reducing devices where otherwise auxiliary devices are needed.

Preventive machine maintenance uses live data from relevant motor parameters

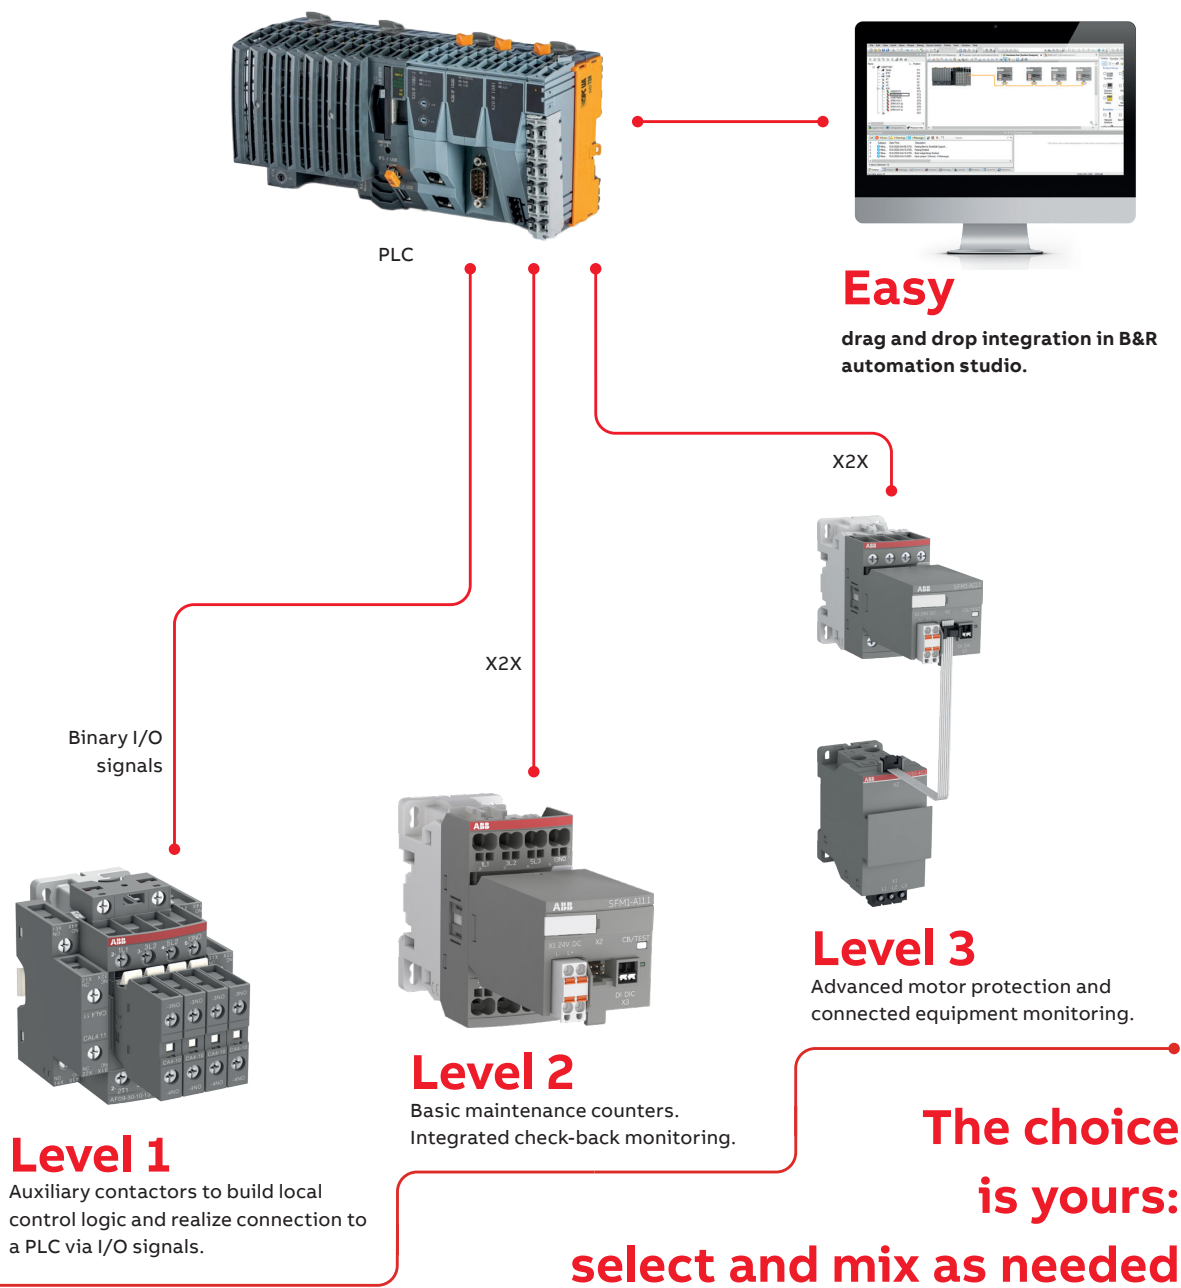

Digitalization allows remote contactor control and condition monitoring

Speed of installation
Reduction of control side wiring. Integration of multiple functions into one device. Reduction of required PLC I/O signals.

Digitalize one of the best motor starting portfolios on the market

You have the choice

AFC contactors for AC control applications **NEW**

Flexible and safe

Part of the AF platform

AFC contactors are an extension of the AF platform. Sharing same footprint and having equivalent electrical performance, installation design and maintenance are easier and faster. Protection devices (manual motor starters, overloads relays), accessories (auxiliary contacts, electronic timers, ...) and connection kits (direct-on-line, reversing, start delta) are common to the entire platform.

Great flexibility for coil terminal access and surge suppressor

AFC contactors offer free choice of coil terminal access from top, bottom or front. Surge suppressor can be mounted from top or bottom.

Compatible and easy to use accessories

1-pole, 2-pole and 4-pole auxiliary contact blocks (front or side mounted) are available with screw and Push-in Spring terminals: They can be mounted on every contactor of the AF platform, whatever its terminal connection type.

Easy, fast and secure starters assembly

The AF contactor range is perfect for motor starting applications and for solutions where space is limited. You can create any motor starting type and save assembly time with a complete range of accessories and connection sets.

Protect from overload in all conditions

Select thermal overload relays (trip class 10) or electronic overload relays (trip class 10E, 20E, 30E in the same product) to protect your motors against overload and phase failure.

AFC contactors: AC operated NEW

Contactors: 3-pole – AC operated

Powerful light switching made easy

ESB and EN installation contactors

ABB's hum-free installation contactor designs offer a wide range of ratings from 16 A to 100 A. With an innovative AC/DC coil design that eliminates hum, a broad selection of common accessories as well as manual and automatic versions, ESB..N contactors cover all your needs in both domestic and residential applications. Find out more at abb.com/lowvoltage

ESB and EN Installation contactors

Hum-free operation

Tool-free to save time

**More choice,
less inventory**

Comprehensive solution

Optimum interface

Easy to install

**Group mounting
saves space**

**Global
availability**

Easy identification

ESB and EN Installation contactors

ABB's installation contactor range comes with a host of features to make installation and maintenance easier. A mechanical indicator shows the status in green or red color to make system diagnostics quicker. Some speciality types also feature a manual override functionality with a toggle switch providing independent control. Accessories such as auxiliaries, space holders, as well as safety covers can be mounted tool-free onto the contactor.

MS132-T circuit breakers for transformer protection

Description

MS132-T Circuit breakers for transformer protection are electro-mechanical protection devices specially designed to protect control transformers on the primary side.

The short-circuit current setting is fixed to 20 times the operating current to handle the high inrush current generated by transformers.

Manual motor starter

MS116, MS132, MO132, MS165 and MO165

General accessories

Description
With this solution of door coupling rotary mechanism, it is possible to operate a Manual Motor Starter in the back of a switch cabinet from outside. The door coupling mechanism prevents opening of the door of a switch cabinet with the Manual Motor Starter in ON position. The complete mechanism includes handle, shaft, driver, shaft alignment ring and shaft supporter. All accessories fit for 6 mm shafts with a maximum length of 180 mm. The degree of protection for handles MSHD is IP64.

Push-in Spring solution

Complete range, complete efficiency

The Push-in Spring motor starting solution products provide you with a range of benefits.

2-in-1

Benefit from both Push-in mode and Spring mode and use ferruled cables or cables without ferrules in the same terminal.

Tool-free connecting links

100% tool-free mounting connecting links.

Compatible with screw range

Mount accessories for control circuits on the screw range up to 45 kW AC-3 400 V on manual motor starters and up to 45 kW AC-3 400 V, 130 A AC-1 on contactors.

Tool-free busbars

Parallel connection of manual motor starters without the need for tools (also certified for UL Type E/ Type F applications)

Just one tool for everything

You only need a 3 mm screwdriver in Spring mode as well as for de-wiring the complete solution.

Higher connecting capacity

The solution ranges up to 18.5 kW 400 V AC-3 and 50 A AC-1 (25 hp 480 V and 45 A 600 V general use).

Just push it!

NEW

The next evolution in motor starter solutions is here.

So up to 18.5 kW, one push is all you need!

Direct on-line Starter

Reversing Starter

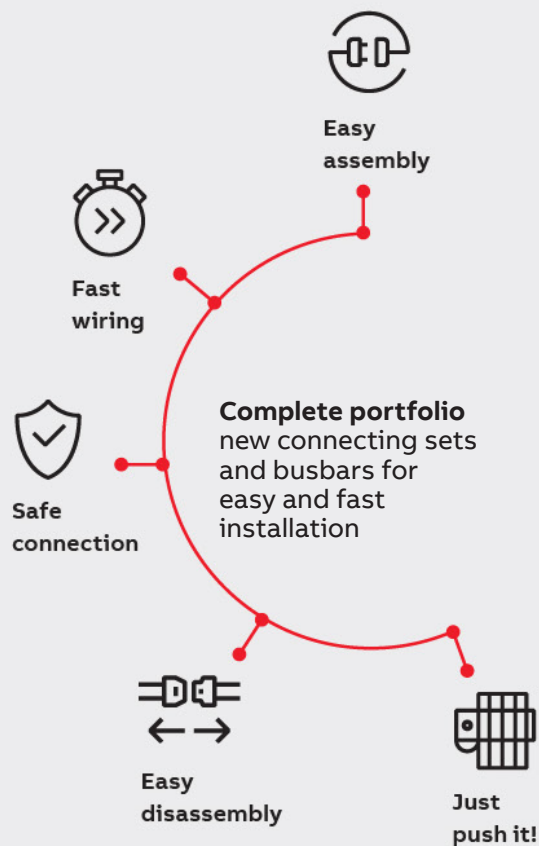

Star-Delta Starter

Save up to 50% wiring time with Push-in Spring compared to conventional spring solutions. And the connections are just as reliable. So for speed, ease and reliability, just push it.

NEW

Benefits / Features

- Fast and intuitive wiring
- Tool-free mounting
- Vibration & shock proof
- Robust design for higher up-time
- Future proof connection technology
- Terminals accessible from the front
- One-hand mounting
- 2-in-1 Push-in / Spring
- Higher connection capacity
- No mounting plate required for starters
- Enabled for automated wiring

CA4..K, CAL4-11K 1, 2 and 4 pole auxiliary contacts

HK1-K, HKF1-K auxiliary contacts

SK1-K and SK1-ARK signaling contacts

PS1-...-65K busbars for 2, 3, 4 or 5 manual motor starters

TS1-M3-K terminal spacer for UL Type E/F combination motor controllers

BEA16-4KF and BEA38-4KF connecting links with manual motor starters

BER16-4KF and BER38-4KF connecting links for reversing starters

BEY16-4KF and BEY38-4KF connection sets for Star-Delta starters

VEM4K electrical and mechanical interlock

15BC100.445S0201

Softstarters portfolio

Overview

PSR - The compact range

PSR is our most compact softstarter with basic benefits and values. PSR can handle up to 100 starts per hour. Suitable for small motors.

Current: 3 A... 105 A

Main voltage: 208 V... 600 V

Application features

PSE - The efficient range

The new generation PSE is a true general purpose softstarter. It's a perfect balance between high starting capacity and cost efficiency. Now featuring built-in fieldbus communication.

Current: 18 A... 370 A

Main voltage: 208 V... 600 V

Application features

PSTX - The advanced range

PSTX is the most complete alternative for any motor starting application. Featuring built-in Modbus and anybus modules that support all major communication protocols.

Current: 30 A... 1250 A

Main voltage: 208 V... 690 V

Application features

Softstarters

Motor starting matters

ABB softstarters offering consists of three ranges, covering every need. The products help you secure motor reliability, improve installation efficiency and increase application productivity.

PSR – The compact range	PSE – The efficient range	PSTX – The advanced range
<ul style="list-style-type: none"> • When soft start and stop benefits and values are requested • When operating a small motor • When up to 100 starts per hour are requested 	<ul style="list-style-type: none"> • When there is limited space • When common softstarter functions and protections are needed • When communication is needed 	<ul style="list-style-type: none"> • When full control and motor protection is needed • When an advanced softstarter with an extensive functionality is needed • When motor is connected inside delta or in 690 V

Softstarters benefits and features

SECURE MOTOR RELIABILITY

Increase your motors' lifetime...

With ABB softstarters, starting currents are easily optimized to your load, application and motor size.

...by protecting it from electrical stresses.

Over ten motor protection features are included to keep your motor safe from overloads and network irregularities.

Softstarter features	PSR	PSE	PSTX
Current limit	–	●	●
Current limit ramp and dual current limit	–	–	●
Electronic motor overload protection	–	●	●
Dual overload protection	–	–	●
Underload protection	–	●	●
Power factor underload protection	–	–	●
Locked rotor protection	–	●	●
Current/Voltage imbalance protection	–	–	●
Phase reversal protection	–	–	●
Customer defined protection	–	–	●
Motor heating	–	–	●
PTC/PT100 input for motor protection	–	–	●
Overvoltage/undervoltage protection	–	–	●
Earth-fault protection	–	–	●

● = standard, O = option, – = not available

IMPROVE INSTALLATION EFFICIENCY

Reduce your installation time and panel size...

ABB softstarters are easy to install, thanks to their compact design and many built-in features.

...by having everything that you need built in.

Built-in bypass saves energy and space while reducing heat generation: a complete motor starting solution in one unit designed and verified by ABB.

Softstarter features	PSR	PSE	PSTX
Built-in bypass	●	●	●
Inside-delta connection possible	–	–	●
Graphical display and keypad	–	●	●
Detachable keypad	–	–	●
Motor runtime and start count	–	–	●
Programmable warning functions	–	–	●
Diagnostics	–	–	●
Overload time-to-trip	–	–	●
Overload time-to-cool	–	–	●
Analog output	–	●	●
Fieldbus communication	O	●	●
Event log	–	O	●
Multiple languages	–	–	17
Electricity metering	–	–	●

● = standard, O = option, – = not available

INCREASE APPLICATION PRODUCTIVITY

Reduce the number of production stops...

ABB softstarters reduce mechanical stress on your application which increases uptime.

...by letting the softstarter do more than just starting.

Torque control, pump cleaning, motor break and many more features enables you to use your process to its full potential.

Softstarter features	PSR	PSE	PSTX
Torque control	–	●	●
Torque limit	–	–	●
Coated PCBA	–	●	●

AFS contactors with front-mounted auxiliary contact blocks

Dedicated for safety applications

ABB's complete range of safety components make protection systems easier to build. Designed for machine safety applications, AFS contactors come with fixed

front auxiliary contact blocks, making them ideal for monitoring and controlling circuits. Mechanically linked and mirror contacts help make your system safer.

Safety and protection

Safety in all things

ABB's AFS contactors can be easily integrated in machine manufacturer's systems complying with main safety standards EN ISO 13849 and EN 62061 guaranteeing the safe use of your machinery and equipment. The AFS contactor range is an integral part of ABB's comprehensive range of safety products.

Continuous operation

Secure uptime

The AFS contactor secures system uptime. It allows direct control by relay outputs of safety PLCs and safety relays to ensure the safety performance customers require. A low energy auxiliary contact guarantees system status feedback.

Speed up your projects

Simplify design

Perfect design makes integration easier. ABB's distinctive yellow auxiliary contact block makes identifying the right product quicker. By reducing the contactor coil's power consumption, panels can also be made smaller and transformers more compact. In addition, all the safety data for the contactors are readily available using safety design tools.

Note: Contact our nearest sales office for more information

M mini contactors and contactor relays **NEW**

Reliability, always

The M contactors range is a performance-dimension optimized solution for all the purposes. Its high reliability, even in extreme conditions, combined to the small sizes and the safe connections lead to easy design and compact panels.

Space-saving

Small dimensions for big projects

The M range devices are a great solution when high performances are needed but the space is limited. The small dimensions of the products and the possibility to mount them side by side will maximize the cost efficiency of the cabinets without making compromises.

Reliability in extreme conditions

Made for all the applications

The technology used in the design of the contactors and the wide set of variants available guarantee reliability of operation with heavy working conditions as well. Instability of the network, high altitude and extreme temperatures will not be a limit anymore.

Optimum interface

Never without a solution

A wide set of coils is provided for matching all the requirements: pure AC or DC for very fast switching, with low energy consumption for direct control by PLC and with extended operating limits to face voltage fluctuations. A complete offer for realizing your projects.

M Mini contactors with screw connection NEW

Electronic compact starters: HF range

A compact solution with great functionality

ABB's electronic compact starter, up to 3 kW / 400 V, is a 22.5 mm wide product. Even though it is compact, it has, direct-on-line, reversed starting, motor overload

protection, and emergency stop all included. It is well suited for paper machines, conveyors or machine tools.

Space saving
Up to 90% less space required

Safety and protection
Integrated safety function

Easy to install
Up to 75% reduced time in wiring

Limit switches

ABB limit switches are the easiest reliable way to convert mechanical movements into electrical signals. Use our wide offer to match your application.

Reliable in extreme conditions

Ready for anything

Plastic or metal casing limit switches are designed to operate in the most difficult environments. A high degree of protection up to IP67 and the positive contact opening, guarantee reliable operation.

Continuous operation

Keep your installation running 24 hours a day

Limit switches secure your uptime. Their high mechanical durability can handle up to 30 million operations with contacts that are mechanically linked to actuators.

Easy to install

Easy to use

Limit switches are easy to install and to use, thanks to their three different types of electrical connections and cable length, in order to satisfy every design specifications.

Limit switches

Pilot devices

Pilot Devices Offering

ABB Pilot Devices offer both modular and compact range of pushbuttons. Both feature the same front-of-panel design and appear consistent when combined.

Modular range, features a wide range of operators that can be combined with high flexibility. The unique snap-on design promotes simple and fast assembly.

Compact range features an all-in-one construction and rugged design for added simplicity and ease of installation.

Technical data compact range

Standard and approvals	
IEC / EN 60947-1	Low-voltage switchgear and controlgear - Part 1: General rules
IEC / EN 60947-5-1	Low-voltage switchgear and controlgear - Part 5-1: Control circuit devices and switching elements - Electromechanical control circuit devices
IEC / EN 60947-5-5	Low-voltage switchgear and controlgear - Part 5-5: Control circuit devices and switching elements - Electrical emergency stop device with mechanical latching function
IEC / EN 60073	Basic and safety principles for man-machine

Electrical ratings

Contacts

Ratings as per IEC 60947-5-1

Rated insulation voltage, U _i	300 V	
Rated thermal current, I _{th}	5 A	
Rated operational current, I _e utilization category AC-15	at: 240 V	1 A
Rated operational current, I _e utilization category DC-13,	at: 24 V	0.3 A
	at: 125 V	0.2 A

Ratings as per UL, CSA, NEMA

	C300 AC	R300 DC
Rated insulation voltage	250 V	250 V
Rated thermal current	2.5 A	1 A
Rated operational current	at: 120 V at: 125 V at: 240 V at: 250 V	1.5 A 0.75 A 0.22 A 0.11 A

Short circuit protection

Max. fuse at 1 kA	gG 10A
Make-and-break contacts	

LEDs (for both compact and modular)

Service life for LED's means number of service hours until the brightness has been reduced down 50 %. Service life: 50 000 h

White LEDs	x=0.31 Y=3.2 means the position of color in the ICI Chromaticity Diagram
Over voltage on LEDs	10 % over voltage is acceptable without affecting the service life
Voltage peaks on LEDs	Voltage peaks up to 1000 V Current peaks up to 500 mA during a few msec
Gloaming light	All integrated LEDs have a function built-in to cut leakage currents

Mechanical data

Mechanical life

Pushbuttons, selector switches	500,000 operations
Emergency stop pushbutton	50,000 operations

Metallic enclosures	IP 66, 67, 69K	-

Temperature	
Ambient temperature during operation	-25 to +70 °C
Storage temperature	-40 to +85 °C

Technical data	
Terminals	
Plus-minus Pozidriv No.2 screw with DIN-washer	
Connectable area	min. 1 x 0.5 mm ² AWG 20 max. 2 x 2.5 mm ² /2 x AWG14

Tightening torque	
Operators, M22	Min. 2 Nm / Max. 2.3 Nm
Cable terminals	0.9 Nm
Recommended maximum number of blocks: 6	

Electrical data	
Standards contact blocks	
Mechanical endurance	10 million operations
Self-cleaning contacts of silver, NC contact with positive opening. At voltages and currents below 24 V and 5.6 mA, we recommend our micro switch blocks or as an alternative, gold plated contacts.	

Ratings as per IEC 60947-5-1		
Rated insulation voltage, U _i		690 V
Rated thermal current, I _{th}		10 A
Rated operational current, I _e	at: 120 V	8 A
utilization category AC 15,	at: 230 V	6 A
	at: 400 V	4 A
	at: 690 V	2 A
Rated operational current, I _e	at: 24 V	5 A
utilization category DC 13,	at: 125 V	1.1 A
	at: 250 V	0.55 A

Ratings as per UL, CSA, NEMA		A600 AC	Q600 DC

Contact resistance	< 25 mΩ	
Compulsory function test	at: 5V, 16 mA	
Micro switch block / ratings as per IEC 60947-5-1		
Rated insulation voltage, U _i		125 V
Rated thermal current, I _{th}		3 A
Rated operational current, I _e utilization category AC 14,	at: 125 V	0.5 A
Rated operational current, I _e utilization category DC 13,	at: 24 V	0.3 A
Rated operational current, I _e utilization category DC 12,	at: 24 V	0.1 A
Minimum switching capacity	3 V DC	1 mA

Ratings as per UL 508		
	125 V AC	3 A
	60 V DC	0.2 A
	48 V DC	0.1 A

Short circuit protection	
Max. fuse at 1 kA	gG 16A
Note: LEDs see technical data compact range	

Mechanical data	
Mechanical life	
Pushbuttons, momentary mushroom	2 million operations
Selector switches. Present standard (no operation of center contact)	500,000 operations
With operation of center contact	250,000 operations
	150,000 operations
Maintained mushroom, pushbutton, key operated selector switch and double pushbutton	500,000 operations
Emergency stop	100,000 operations
Toggle switch	1 million operations

Pilot devices

Modular range

Modular product features

- Widest range of integrated LEDs on the market
- Parts of Range IP 66, 67, 69K
- All range & UL Type 1, 3R, 4, 4X, 12, 13
- Snap-on feature reduces installation time
- Quick release contact holder
- Several bezel colors
- Unique low energy solutions, including wiping action

How to order standard operators:

- Non-illuminated operator
- + holder
- + contact block(s)
- Illuminated operator
- + holder
- + contact block(s)
- + lamp block

*Only for illuminated operator

How to order Bezel:

Bezel options	Type	Ordering code
Black plastic	MPX-10X	1SFA611 10X R1XXX

Color codes

	Red ●	Green ●	Yellow ●	Blue ●	White ○	Black ●	Grey ●

Electronic products and relays

The product range

Time relays, CT range

Four ranges of electronic timers provide timing functions for all applications: the CT-X immersing market range timers offers 1c/o version in 17.5 mm housing; CT-D range with a width of just 17.5 mm offers compact yet an effective solution for the building segment ; the CT-C range, the ideal solution for several applications; the CT-S range has both screw and push-in type of connection terminals and is ideally suited for universal use. The CT range has a wide variety of timing functions (from ON or OFF delay to star-delta changeover). The time relays are available with output relays, solid-state outputs and precise direct time adjustment.

Measuring and monitoring relays, CM range

State-of-the-art monitors for single and three-phase systems. Monitoring of: voltage, current, frequency, power factor (motor load), thermistors, temperature, liquid level, insulation resistance, and grid feeding. ABB has one of the world's widest product ranges of measuring and monitoring relays. The CM range is a key product line of the EPR range.

Power supplies, CP range

Modern power supply units are a vital component in most areas of energy management and automation technology. As your global partner in this area, ABB pays close attention to corresponding requirements. Innovation is the key to the substantial enlargement of our power supply product range. ABB offers four different product lines for single and three-phase supplies, output voltages 5/12/24 and 48 VDC in plastic and metal enclosure, as well as various accessories.

Interface relays and optocouplers, CR range and R600

Interface relays and optocouplers are widely used in various industrial applications. As an interface, they link the controller, e.g. PLC (programmable logic controller), PC or field bus systems to the sensor/ actuator level. Here, they have various functions: switching AC or DC loads with different resistive, inductive and capacitive parts, switching voltages from a few mV up to 250 V, switching currents from a few mA up to 16 A, amplification of weak control signals, electrical isolation of control and load circuits, and signal multiplying.

Temperature monitoring relays CM-TCS & CM-TCN

Monitor overtemperature, undertemperature, or temperatures between two threshold values (window monitoring) with PT100 sensor. As soon as the temperature falls below or exceeds the threshold value, the output relays change their positions according to the configured functionality and the front-face LEDs display the current status. Regardless of the selected configuration, the device is monitoring its measuring circuit for interrupted wires or short circuits.

CT-X Time Relays NEW

CT-X The Immerging Market Range

Space savings

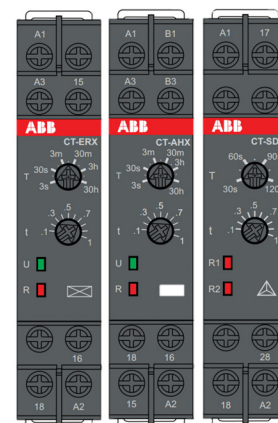

Cost effective solution

- 22% space savings compared to other time relays
- 1 c/o versions in 17.5 mm wide housing
- 75% less order codes which leads to a stock resuction compared to other ranges
- Giving you te confidence of world-wide sourcing - no matter where you build, install or operate your equipment
- LED for status indication
- Pre-and fine adjustment of the timing range

- CT-ERX.14 (ON-delay)
- CT-AHX.14 (OFF-delay)
- CT-SDX.25 (Stat-Delta)

Primary switch mode power supplies

CP-Range

- Five power supplies families from single- to three-phase and economic- to high end versions for every industrial application
- ABB power supplies – preferred by engineers – for their compact, space saving design and ability to accept almost any input voltage

CP-D range

Distribution panel design. The CP-D range of power supply units in MDRC design (modular DIN-Rail components) fits into all domestic installation and distribution panels. With their width between 18 to 90 mm only, the CP-D range switch mode power supplies are ideally suited for installation in distribution panels. The range is optimized for world-wide applications: The CP-D power supplies can be supplied with 90-264 V AC or 120-375 V DC. The continuously adjustable output voltage (CP-D > 10 W) ensures optimal adaption to the application, e.g. compensating the voltage drop caused by a long line length. Additional redundancy unit CP-RUD available to establish true redundancy is available.

CP-E range

Economy range. The CP-E range offers enhanced functionality while the number of different types have been considerably reduced. Now all power supply units can be operated at an ambient temperature of up to +70 °C. The CP-E range 24 V devices over 18 W offer an output/ contact for monitoring of the output voltage and remote diagnosis. Optimized for world-wide applications, the CP-E power supplies can be supplied within a wide range of AC or DC voltage. The output voltage is continuously adjustable, ensuring optimal adaptation to the application, e.g. compensating the voltage drop caused by a long line length. For decoupling of parallel connected power supplies below or equal 56 V, redundancy modules are available in order to achieve true redundancy.

CP-S.3 power supplies:

High efficiency and reliability delivered in a compact footprint. with 3 phase input range of 3 x 320 - 575 V AC and output range available in 24V DC - 5A, 10A, 20A and 40A. Designed for a huge variety of applications, including machine building segments, wind, solar and marine applications.

Approvals / Marks: CB scheme, CE, UKCA, cULus, DNV, RCM

CP-S.DC power supplies:

CP-S.DC range can be used in multiple installations in the world.

With wide DC input voltage range of 420 - 870 V DC and output voltage of 24 V DC and current up to 20A. Suitable for a variety of application including marine. Approvals / Marks: CB scheme, CE, UKCA, cULus, DNV, RCM

CP-S.1 power supplies

High efficiency and reliability delivered in a compact footprint. Designed for a huge variety of applications, including machine building segments, this advanced range boosts an integrated 150% power reserve for five seconds and operates at an efficiency of up to 94%. With overheat protection, active power factor correction, a broad certified AC and DC input range and extensive worldwide approvals including marine, the all-new CP-S.1 power supplies are a preferred choice for multiple industrial applications.

CP-C.1 range High-performance range

The CP-C.1 power supplies are ABB's high-performance and most advanced range. With excellent efficiency, high reliability and innovative functionality, it is prepared for the most demanding industrial applications. These power supplies have a 150% integrated power reserve and operate at an efficiency of up to 94%. They are equipped with overheat protection and active power factor correction. Combined with a broad AC and DC input voltage range and extensive worldwide approvals the CP-C.1 power supplies are the preferred choice for professional DC applications, giving the power to control.

CP-B range Short time buffers

ABB offers an innovative and completely maintenance-free product range for buffering the 24 V DC supply in case of interrupted mains on the primary side of the switch mode power supply. • Ultra cap based buffer modules for short time UPS systems • Rated input voltage 24 V DC • Rated currents 3 A, 10 A and 20 A • Expandable with CP-B EXT.2 module • LEDs for status indication • High efficiency, higher than 90% • Signaling and status outputs • Buffering times at 100% load current from 13 s to 38 s (depending on device)

Smart temperature monitoring relays

Setup via display or smartphone app

The temperature monitoring relays can measure temperatures of solids, liquids and gaseous media in up to three sensor circuits using various types of sensors.

One...

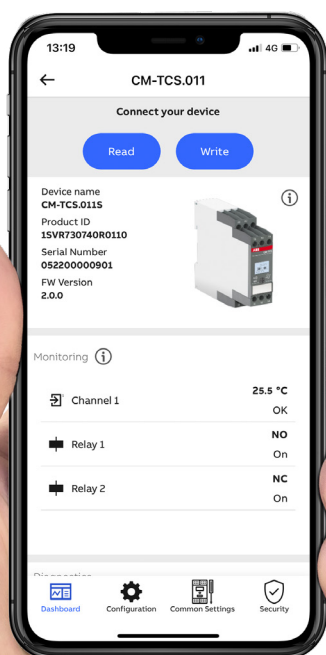

look to have the information needed
the display shows the measured values and relay status at a glance. The symbol-based menu structure and pre-settings make parametrization simple.

touch for up to 80% faster setup
for easy parametrization and copying of settings between multiple devices via NFC with the ABB EPiC smartphone app – even if the relay is not powered.

NFC

device for thermal protection and condition monitoring

Just one relay to cover many different applications, monitor their condition, improve safety and ensure uptime.

Temperature monitoring relay

Temperature range -200..+850°C, over temperature, under temperature, window monitoring, digitally adjustable with 24-240V AC/DC control voltage

Intelligent motor management system - UMC100.3

Ordering details - Universal Motor Controller UMC100.3

UMC100.3 DC

UMC100.3 UC

UMC100-PAN

Description

Intelligent motor management system for single and three-phase motors with $I_e = 0.24 - 63 \text{ A}$ in one single device. Compact housing with integrated current transformer for cable cross-section up to 25 mm^2 (max. \varnothing with Insulation 11 mm). Higher currents with additional external current transformer. Thermal overload protection according to EN/IEC 60947-4-1, selectable trip classes 5E, 10E, 20E, 30E, 40E. Some functions require an additional expansion module.

- **Motor protection functions:**
Over-/underload, over-/undercurrent, over-/undervoltage, rotor blocking, phase failure/imbalance/sequence Earth fault detection integrated or with external sensor CEM11
Hot motor protection with thermistor or temperature measurement
- **Motor control functions:**
Easily configurable motor control functions: direct, reverse, star-delta starter, pole-changing, overload relay, actuator mode, softstarter mode. Additionally free programmable application specific logic with function blocks
- **Service and diagnostic data:**
Operating hours, number of motor starts and overload trips, energy, standstill and operation hours supervision, motor status, faults and warnings, fault history (16 events)
Motor current, phase voltages, thermal load, power factor (cos), active power, apparent power, energy, total harmonic distortion (THD).
- **Integrated I/Os:**
6 digital inputs, 1 PTC input, 4 digital outputs. Maximum number of I/Os with expansion modules: 14 digital inputs, 1 PTC input, 9 digital outputs, 6 analogue inputs, 1 analogue output
- **Communication interfaces for fieldbuses and ethernet networks, interface for operator panel UMC100-PAN, bus interface for connection of expansion modules**
Versions for supply voltage 24 V DC and 110 – 240 V AC/DC and with ATEX approval

Operating panel UMC100-PAN

Operator panel for Universal Motor Controller UMC100. Backlit graphical and multi-lingual full text display, LEDs for status. Assembly directly on UMC100 or on the control cabinet door via extension cable and door mounting set.

Functions:

- **Monitoring:** Shows motor status and diagnostics
- **Operate:** Start, stop, fault reset
- **Parametrize:** Setting and changing of motor and fieldbus parameters (password protection possible)
- **Copy settings**
- **USB port for up/download of parameters and logic**

Supports 8 languages: English, French, German, Italian, Spanish, Polish, Portuguese, Russian
Replaces all former UMC100 operator panels

Intelligent motor management system - UMC100.3

Ordering details - Expansion modules

DX122

Description

Up to 4 expansion-modules can be connected to one UMC100.3

- 1 digital expansion module DX111 or DX122
- 1 voltage expansion module VI150 or VI155
- 2 analog/temperature expansion modules AI111 (possible)

Supply voltage is 24 V DC; the 110-240 V AC/DC version of the UMC100.3 provides the 24 V DC supply for expansion modules

AI111

DX111

I/O-expansion module with 8 digital inputs 24 V DC, 4 relay outputs, 1 analog output 0/4-20 mA or 0...10 V

DX122

I/O-expansion module with 8 digital inputs 110 / 230 V AC, 4 relay outputs, 1 analog output 0/4-0 mA or 0-10 V

VI15x

Voltage modules for the determination of phase voltages, power factor ($\cos\phi$), apparent power, energy, total harmonic distortion (THD).

For use in grounded networks (VI150) or in all networks (VI155), 150-690 V AC

AI111

Analog / temperature expansion module, 3 inputs PT100, PT1000, KTY83, KTY84, NTC, 0-10 V, 0/4-20 mA

1 or 2 modules AI111 can be connected to an UMC100.3.

Fieldbus interfaces

Ordering details

PDP32.0

MRP31.0

PDR31.0

Description

Fieldbus communication interfaces enable the UMC100.3 to communicate via fieldbus.

The interfaces can be used in two ways:

- Mounted directly on an UMC100.3 – the interface is supplied from the UMC100.3 and no additional accessory is required
- Mounted separately on a SMK3.0 adapter in the cable chamber of an MCC, the interface plugged on SMK3.0 requires a 24 V DC supply. Ready-made cables for applications in withdrawable systems are available, as well as terminal blocks for other cables:
CDP18.150: Cable for use inside the drawer CDP24.150: Cable from SMK3.0 to drawer outside

PDP32.0

- Communication interface for PROFIBUS DP; supports the protocols PROFIBUS DP/V0 and V1
- PNO-certified PROFIBUS slave
- Data transfer rate up to 12 Mbit/s
- Diagnostic LEDs
- Fieldbus connection via nine-pole Sub-D connector or terminal blocks
- GSD download from UMC100.3 webpage

MRP31.0

- Communication interface for Modbus RTU
- Data transfer rate up to 57.6 kbit/s
- Diagnostic LEDs
- Fieldbus connection via terminal blocks

PDR31.0

- External active fieldbus termination for Profibus DP; the PDR31.0 needs to be mounted on a SMK3.0 adapter and supplied by 24 V DC

PNU32

PNU32+SMK3.0

Description

Ethernet communication interfaces enable the UMC100.3 to communicate via an Ethernet network. There are two types of interfaces:

Interfaces for the connection of one to four Universal Motor Controllers UMC100.3:

- MTQ22-FBP.0 for Modbus TCP
- PNQ22-FBP.0 for Profinet IO

Interface for a single universal motor controller UMC100.3:

- EIU32.0 for EtherNet/IP™

MTQ22-FBP.0

- Protocol Modbus TCP
- For one to four UMC100.3
- Master supervision with timeout control
- for up to four masters
- Micro USB-port for configuration via PC (configuration software downloaded from UMC100.3 webpage)
- Integrated Ethernet switch
- Supports all network topologies
- Ring topology with redundancy (MRP protocol)
- Easy to use in withdrawable applications
- No special Ethernet connectors required in MCCs
- 24 V DC supply voltage
- DIN-Rail mounting

PNQ22-FBP.0

- Protocol Profinet IO
- PNO-certified
- For one to four UMC100.3 devices
- Integrated Ethernet switch
- Supports all network topologies
- Ring topology with redundancy (MRP protocol)
- Easy to use in withdrawable applications
- No special Ethernet connectors required in MCCs
- Fully integrated into ABB 800xA
- Time-stamped events with ABB 800xA
- 24 V DC supply voltage
- DIN-Rail mounting
- GSDML downloaded from UMC100.3 webpage

EIU32.0

- Protocol EtherNet/IP™
- ODVA-certified
- For one motor controller UMC100.3
- Mounting directly on an UMC100.3 (supplied by UMC100.3) or remotely on a SMK3.0 adapter (24 V DC supply required)
- Integrated Ethernet switch
- Supports all network topologies
- DLR (Device Level Ring) function for redundancy
- Easy to use in withdrawable applications
- No special Ethernet connectors required in MCCs
- EDS download from UMC100.3 webpage

Highlighted features:

- The PNU32.0 Ethernet adapter module, provides Ethernet connectivity for the motor controller UMC100.3
- Through the PNU32.0 Ethernet Adapter module it is possible to:
 - give control commands to the device (Start, Stop, Auto, etc.). The commands' meaning depends on the connected device
 - read status information and actual values from the device
 - change parameter values
 - read maintenance counters
 - reset a trip
- The PNU32.0 supports the Profinet S2 redundancy function
- Configuration from within the control system by using start-up parameters (similar to block parameters of PROFIBUS)
- A built-in two-port switch allows the flexible usage in bus, star or ring network topologies
- The Media Redundancy Protocol (MRP) is implemented (client). MRP is standardized in IEC/EN 62439-2 and offers cable redundancy in case of a single failure
- Location supervision for the detection of interchanged drawers in withdrawable systems
- Time stamped diagnosis: ABB proprietary Sequence of Event (SoE) support (800xA)

Earth fault monitors, current transformers

Ordering details

CEM11-FBP.xxx

2CDC345011F0008

Earth fault monitors CEM11-FBP.xxx for use with the Universal Motor Controller UMC100.3

The CEM11-FBP.xxx device monitors if the sum of the currents flowing through it is zero (factorial addition). If the sum is zero, no residual current is present. If the residual current is above an adjusted threshold value, the output signal of the CEM11-FBP.xxx changes. It can be used in motor feeders to detect leakage currents, as well as ground faults, caused for example by insulation breakdowns.

- CEM11-FBP.xxx is connected to a digital input of the UMC100.3
- Earth fault current threshold can be set in eight steps with a screwdriver
- Test position for easy control of the wiring

CEM11-FBP.xxx is delivered with adapters for DIN-Rail or wall mounting.

CEM-11.FBP.120 is for wall-mounting only.

Miniature Circuit Breaker SB200 M

The details make the difference 

Technical Features

General data

Standards	IS/IEC 60898-1
Poles	B: 1P, 1P+N, 2P C: 1P, 2P, 3P, 4P, 1P+N, 3P+N D: 1P, 2P, 3P, 4P
Rated short-circuit capacity (Icn)	10 kA
Tripping characteristics	B, C, D
Reference temperature for tripping characteristics	30°C
Energy limiting class (B-,C- Curve)	3
Rated voltage Ue	1P : 240/415 V AC 1P + N : 240 V AC 2...4P : 415 V AC 3P + N : 415 V AC
Rated current In	B: 6, 10, 16, 20, 25, 32, 40 A C&D: 0,5, 1, 1,6, 2, 3, 4, 6, 10, 16, 20, 25, 32, 40, 50, 63 A
Rated frequency	50/60 Hz
Max. Power frequency recovery voltage (Umax)	1P: 264 V AC; 60V DC; 1P+N: 264 V AC; 60V DC; 2...4P : 457 V AC; 2P: 120V DC; 3P+N: 457 V AC; 120V DC;
Min. operating voltage	12 V AC
Rated insulation voltage Ui acc. to IEC/EN 60664-1	250 V AC (phase to ground) , 440 V AC (phase to phase)
Rated impulse withstand voltage Uimp. (1.2/50µs)	4 kV (test voltage 6.2kV at sea level, 5kV at 2000m)
Dielectric test voltage	2 kV (50 / 60Hz, 1 min.)
Overvoltage category	III
Pollution degree	2
Electrical endurance	In < 32A: 20.000 ops.(AC), In ≥ 32A: 10.000 ops.(AC); 1.000 ops. (DC); 1 cycle (2s - ON, 13s - OFF, In ≤ 32A), 1 cycle (2s - ON, 28s - OFF, In >32A)

MCB SB200 M

B characteristic

SB201 M B 16

SB200 M B characteristic

Function: protection and control of the circuits against overloads and short-circuits; protection for resistive and inductive loads with low inrush current.

Applications: residential and commercial.

Standard: IS/IEC 60898-1

Icn=10 kA

Miniature Circuit Breaker SB200 DC

Right product for right application

The range impresses with its performance, approvals and high in-built short-circuit breaking capacity for

DC application. Can be used in SP version at 250V DC and DP version upto 500V DC.

Polarity marking.

IP20 - finger safety.

Captive screws:
don't lose what's
important for you.

Approvals and
standard.

Whatever your application
need is – applicable with a
wide range of accessories.

State-of-the-art design (Aesthetics & Ergonomics)

Elegant in appearance and the knob is designed for easy operation.

Laser marking

All printing of the SB200 MCBs, like the approvals on the product identification, are printed by a laser. The laser printing ensures a friction, scratch and solvent resistant marking on the MCBs. Easy identification of the products in case of maintenance or replacement, due to safe laser printing.

Housing cover with fire retardant material

High performance 100% recyclable plastic material with fire retardant, high melting point, low water absorption & high dielectric strength properties. ABB is taking care of the environment... with the latest generation of thermoplastics, it is possible to recycle the MCBs – especially the thermoplastic housing material can be re-used. SB200 is 100% free of halogens.

IP20 protection

IP20 - finger safe terminals. The System pro M compact® MCBs are equipped with 25 mm² cage terminals, suitable for both cable and pin type busbar upto 10 sqmm.

Labelling area

Provision for providing label enables easy identification and polarity marking of circuit during installation, operation & maintenance.

Accessories mountable

Wide range of add-on accessories having 30 different types of accessories. Max. possibility of mounting: 4 different accessories on the right side and 1 on the left side ensures highest flexibility of functions. Universal contact, motorised unique accessory like mechanical tripping devices available only with ABB.

Switch Disconnecter SDB200

The details make the difference

Easy product coding – easy identification: basic technical information already integrated into the name.

IP20 - finger safety.

Fully compatible with all System pro M devices and accessories.

Patented housing design: Environment-friendly and performance-optimized.

Patented housing design

By using state-of-the-art housing material, ABB is taking care of the environment. With the latest generation of halogen-free thermoplastics for SDB200, it is possible to recycle the switch disconnectors completely without environmental pollution. The material works for the stability.

Highest performance

With a rated voltage of 253/440 V AC, a rated conditional short-circuit current of 25 kA, terminals with protection from misconnection, a “Real CPI” switching position display, as well as full compatibility with all MCB accessories, the SDB200 is unique in its field of application. SDB200 complies with IEC/EN 60947-3.

IP20 protection

IP20 - finger safe terminals. The System pro M compact® MCBs are equipped with 25 mm² cylinder lift twin terminals, a well-proven and reliable technology - designed for sophisticated industrial use. The cross wiring can be easily done by inserting the System pro M compact® busbars into the rear terminal part and then the incoming wires into the front part of the terminal.

Laser printing

All labels on the SDB200, as the approvals on the dome, technical details and the product identification, are printed by a laser. The laser printing ensures a friction, scratch and solvent resistant marking on the switch disconnectors for easy identification in case of maintenance or replacement. For control and acceptance procedure, it is important to see all markings also in the mounted position.

ISI and CE marking

In addition to the International standards and markings IEC, the product is certified as per latest Indian Standards (ISI)

Wide range of accessories

SDB200 is fully compatible to the complete range of System pro M compact accessories like:

- Auxiliary contacts, to be mounted on the left side, the right side or bottom fitting
- Shunt trips
- Undervoltage release
- Motor operating devices

Residual Current Circuit Breaker FB200

A range designed to ensure efficiency and protection

ISI and CE marking

In addition to the international standards and markings IEC, the product is certified as per latest Indian Standards (ISI).

High performance

- Rated breaking capacity and rated residual breaking capacity laser printed on the device:
 $I_m = I_{\Delta n} = 1000 \text{ mA}$
- Co-ordination with a 63 A rated current with conditional short-circuit capacity $I_{nc} = 10000 \text{ A}$.

Accessories mountable

Wide range of add-on accessories having 30 different types of accessories. Max. possibility of mounting: 4 different accessories on the right side and 1 on the left side ensures highest flexibility of functions. Universal contact, motorised unique accessory like mechanical tripping devices available only with ABB.

Termination

The availability of two terminals offers different connection solutions, thanks to the possibility to connect two independent cables in the same device: the second terminal can be used for an auxiliary circuit or for the supply of devices with small section cables without connecting them together with the main circuit.

Auto reclosing

The FB200 can be coupled with the auto reclosing unit F2C-ARH in order to ensure continuity of service for the whole installation of your home, avoiding lack of supply.

Dual termination

Two terminals are available, the fore one for cables up to 25 mm^2 , the back one for cables up to 10 mm^2 or for busbars.

RCCB FB200 and F200 higher rating

AC  type

FB200 AC and F200 type function: protection against the effects of sinusoidal alternating earth fault currents; protection against indirect contacts and additional protection against direct contacts (with $I\Delta n=30$ mA).

Application: residential, commercial, industrial.

Standard: IEC/EN 61008-1; IEC/EN 61008-2-1

Marking: according to EN 61008-1; EN 61008-2-1

RCBO DSB201 M

Compact solutions for a complete protection

Easy installation

The terminals available on DSB200M make easier the supply operation in parallel with cables and busbars as they are composed by two different seats: a front seat for 25 mm² cables and a back seat for 10 mm² busbars. Supply is possible either from top or bottom side.

Mounting clip

Stable fixing on DIN rail, easy and fast mounting and dismounting operations thanks to the standard mounting clip.

Combination of auxiliary elements with DSB200M

Accessories can be mounted directly in few steps combination possible with the same motor operating device suitable for SB200M combination possible with auxiliary contacts for bottom fitting making DSB200M series suitable for retrofitting and application with space constraints

ISI Marking

RCBO DSB200 M series features ISI marking to signify adherence to latest quality standards

Additional laser printing

Additional information are laser printed on the lateral side of the device, including also the wiring diagram for an easier installation and for an easier stock management.

Residual current circuit breaker with overcurrent protection

RCBO - DSB201M series AC Type ( marked)

DSB201M 1P+N

Features

- Product Standard : IS 12640 (Part 2) : 2016, IEC 61009-1
- Type (wave form of the earth leakage sensed) : AC
- Tripping characteristic : C
- Poles : 2 Poles, 2 Modules
- Rated Current I_n (A) : 6, 10, 16, 20, 25, 32, 40
- Rated sensitivity $I_{\Delta n}$ (mA): 30, 100, 300
- Rated frequency (Hz) : 50
- Rated voltage U_n (V) : 240 V
- Operating voltage of circuit test U_t (V) : 110
- Breaking capacity, I_{cn} (A) acc. to IEC 61009 : 10 kA
- Rated Impulse withstand Voltage : 4 kV
- Electrical life (operations) : 10000
- Mechanical life (operations) : 20000
- Ambient temperature (with daily average $\leq +35^\circ\text{C}$) : $-25...+55^\circ\text{C}$
- Auxiliary devices : Compatible

Solution for unwanted tripping - AP-R type (high immunity)

RCCB / RCBO

The ABB range of AP-R anti-disturbance residual current circuit-breakers and blocks was designed to overcome the problem of unwanted tripping due to overvoltages of atmospheric or operation origin.

The electronic circuit in these devices can distinguish between temporary leakage caused by disturbances on the mains and permanent leakage due to actual faults, only breaking the circuit in the latter case.

AP-R residual current circuit-breakers and blocks have a slight delay into the tripping time, but this does not compromise the safety limits set by the Standards in force (release time at $2 I_{\Delta n}=150$ ms).

Compared with standard type breakers, AP-R residual current breakers are therefore characterised, for any given sensibility, by:

- Higher residual trip current
- Tripping time delay
- Better resistance to overvoltages, harmonics and impulse disturbances

Guaranteeing conventional residual current protection, their installation in the electrical circuit therefore allows any unwanted tripping to be avoided in domestic and industrial systems in which service continuity is essential.

This delay makes the AP-R residual current devices especially suited for installations involving motor starters/variable speed drives, fluorescent lamps or IT/electronic equipment.

The use of multiple electronic reactors for the supply of fluorescent lamps instead generates permanent leakage currents and inrush currents that can cause nuisance tripping of a standard residual current circuit breaker.

IT system loads and other electronic equipment (e.g. dimmers, computers, inverters) with capacitive input filters connected between the phases and ground can also generate permanent earth leakage currents whose sum may provoke the nuisance tripping of a standard residual current circuit breaker. For these situations, the AP-R breakers allow a greater number of devices to be connected to the installation.

Frequency converters include a rectifier section and an inverter section.

In case of fault within a single-phase frequency converter AP-R type RCDs provide complete protection, because an earth fault occurring downstream the inverter, produces an earth fault current with multi-frequency shape with high amount of harmonics.

While, in case of fault within a three-phase frequency converter, B type RCDs ensure complete protection because in case of insulation fault between the rectifier and the inverter or downstream the inverter we can have a smooth DC earth fault current.

Residual Current Devices: AP-R (high immunity)

F202A

F204A

RCCB - F200 series APR type (high immunity)

Function: protection against the effects of sinusoidal alternating and direct pulsating earth fault currents, providing the best compromise between safety and continuity in the service, thanks to the resistance to unwanted trippings; protection against indirect contacts and additional protection against direct ($I_{\Delta n}=30$ mA) contacts.

Application: residential, commercial, industrial

Standard: IEC/EN 61008

Marking: according to EN 61008

RCBO - DS200 series APR type (high immunity)

Function: protection against the effects of sinusoidal alternating and direct pulsating earth fault currents, providing an optimal compromise between safety and continuity of service, thanks to the resistance to unwanted tripping; protection against indirect contact and additional protection against direct ($I_{\Delta n}=30$ mA) contact; protection and isolation of resistive and inductive loads.

Application: residential, commercial, industrial

Standard: IEC/EN 61009

$I_{cn}=10$ kA

RCBO APR type - DS200 series

SA 1

Locking device for MCBs and switches

Prevents unauthorised or dangerous operation of the operating lever. An adaptor makes it possible to block the operating lever whether switched ON or OFF. The lever is blocked with a padlock having a cross bar section of 3 or, as the case may be, 6 mm max. For multipole devices, one lock may be fitted per pole.

The lock adaptor can be used for all MCBs of the SB200M, SB200 DC, switch disconnectors SDB200, RCBO DS201M, DSB201M and E200.

2CSC400465F0201

S2C-S/H6R

Signal/auxiliary contacts:

Signal contacts indicate if a device trips due to a failure (overcurrent/short-circuit for MCBs and RCBOs; earth fault for RCCBs and RCBOs). Auxiliary contacts indicate the position of the contacts, independent if a failure occurred or the device was operated manually.

S2C-S/H6R:

Choice through a selector between signal and auxiliary contact.

S2C-H6R and S2C-HxxR:

Auxiliary contacts with contact configuration according to the following table. All right-side mounted contacts are suitable for MCBs, RCDs, switch disconnectors SDB200 according the "Selection tables" which are displayed at the beginning of chapter 4.

2CSC400465F0201

S2C-H6-...

S2C-HxxL:

Auxiliary contacts with contact configuration according to the following table. These contacts are left-side mounted and fit to SB200 MCBs and switch disconnectors SDB200 according to the "Selection tables". Especially when using a motor operating device, this is a possibility to add a contact as the right side mounted ones do not fit within this combination.

S3C-A1

S3C-A2

Shunt trips
 Function: remote opening of the device when a voltage is applied. Suitable for MCBs SB200 series, Switch Disconnector SDB200 RCCBs FB200, F200, RCBOs DSB200, DS200 series.

Shunt trips use a coil like MCBs for tripping. To trip a shunt, it is necessary to choose the right voltage and make sure the corresponding Ibmax (as mentioned in the table above) is provided by the power supply used. If the power supply can provide higher currents the shunt trip will reduce the current to Ibmax due to its internal resistance.

As soon as the shunt trips, the contact inside is open – the electrical circuit is disconnected even if the shunt trip is still powered on. The free-tripping mechanism of the shunt trip allows a restart of the MCB only after the shunt trip gets no external release signal anymore.

Overvoltage release

Function: monitoring voltage between the neutral and phase; when an overvoltage reaches the threshold value, the OVP device causes the tripping of the associated MCB or RCCB. Suitable for MCBs of the SB200 series up to 63 A, and RCCBs of the FB200 series up to 100 A and RCBOs DS201M, DSB201M Suitable for SDB200 switch disconnectors series.

S2C-Nt

2CSS400055F0201

Hand operated neutral left side mounted

S2C-Nt		
Rated current	A	max. 40
Terminal	mm ²	10; cage terminal
Tightening torque	Nm	1.2
Dimensions (H x D x W)	mm	85 x 69 x 8.8

Hand operated neutral

The hand operated neutral has to be mounted to the left side of the MCB and be snapped onto the DIN-Rail. It is used for measuring duties where the neutral conductor must be in the open position. Due to the special design of the handle - when switching ON the MCB - the neutral will make before the MCB is closed. Suitable for SDB200 switch disconnectors series. The S2C - Nt is not to switch with a tool (screwdriver).

Arc Fault Detection Device

NEW

Test pushbutton to verify the correct functioning of the arc fault detection device.

Twin terminals for separate feeding with busbar and cables. Connection possible both from top and bottom side.

White test pushbutton to verify the correct functioning of RCD.

Information on the device are laser printed to ensure readability over time.

LED troubleshooting indicator to monitor the operation of the AFDD and give indication of the cause of the trip.

To always know the status of the contacts (red: closed; green: open).

Platform suitable for combination with System pro M compact® accessories.

LED for easy troubleshooting

LED to monitor the correct working conditions of the device and have an easier troubleshooting in case of trip. Consequently the downtime for maintenance can be reduced.

- Toggle ON: GREEN LED
- Toggle OFF: LED OFF
- Different indications after the trip, after reclosing the toggle
- Possibility to recall in memory the last tripping due to arc fault and overvoltage

LED color	Blink/sec	Signalling duration	Cause of trip
Green		Permanent	Manual trip, manual test, overcurrent
Red blinking	1	5 sec	Series arc
Red blinking	2	5 sec	Parallel arc
Red blinking	3	5 sec	Over voltage

In case of internal self test failure, the led can switch off or start blinking green/red alternatively.

Dedicated sticker for LED

Dedicated sticker that summarizes the LED function is present in addition to the instructions sheet.

Double slot terminals

Fail-safe terminals to avoid improper connection. Two slots of different dimensions (25 mm² and 10 mm²) available to allow the connection both with cables and busbars. Connection possible both from top and bottom side. Standard System pro M compact® clip ensures a stable fixing on DIN rail and easy and fast mounting and dismount-

Compatibility with busbars

A quick and easy installation is possible in one step using a standard ABB System pro M compact® busbar: no additional cables required for the wiring.

All information on the device

Main technical information are laser-printed on the front and left side of product to ensure long readability.

DS-ARC1 M, B and C characteristics

Function: protection of end user single-phase circuits against short-circuit currents, overload, earth arc faults, parallel arc faults, series arc faults, earth faults currents. (with IΔn=30 mA).

Application: residential, commercial

Standard: IEC/EN 62606; IEC/EN 61009-1; IEC/EN 61009-2-1

Icn = 6kA, 10kA

DBT Timer digital time switches

An ideal range for automating the functions of the installation

Wide range of programs: standard, impulse, cycle, random and holiday

- Permanent or temporary manual deviation, directly activated with a single touch
- LCD Display with back-lighting
- Up to 900 storable events
- Up to 400 pre-defined cities coordinates
- Accuracy of ± 0.5 seconds/24h
- Switching solar time/daylight saving time

Bluetooth communication combined with the DBT Timer App available for Android and iOS ensure smart configuration and quick visualization. This functionality also allows to transfer programs from one device to another simply using the Smartphone.

Time synchronization via DY DCF77 or DY GPS antennas. The DY DCF77 antenna receives scheduled messages transmitted by the atomic clock installed c/o Mainflingen (Germany), near Frankfurt. Thanks to this signal, the time switches are automatically set to: hour, date and proper daylight saving time. The DY GPS antenna receives time from the Global Positioning System, providing an accurate location and time information for an unlimited number of people in all weathers, day or night, anywhere in the world.

DBT Timer digital time switches

An ideal range for automating the functions of the installation

DW1

Digital weekly time switch - DW

DW1 and DW2 are weekly digital time switches with 1 and 2 channels, respectively. They allow exclusion of the normal weekly program in every week with the same mode.

Description	Ordering code	Unit L.P. (₹)
DW weekly digital time switches-DW1, 1 channel	2CSM222531R1000	13,450
DW weekly digital time switches-DW2, 2 channel	2CSM222521R1000	21,030

DWA1

Digital weekly astronomical time switch - DWA

The astronomical switches DWA1 and DWA2, respectively, with 1 and 2 channels, automatically control lighting circuits depending on the time of sunrise and sunset, greatly increasing energy efficiency. The programming is in fact based on a mathematical algorithm able to calculate the time of the rising and setting of the sun in a certain location for each day of the year. Once powered the device, simply insert date, time, geographical coordinates and time zone so that it is ready to work. These settings can also be automatically defined using the DBT Timer App. The installation of astronomical digital time switches is particularly useful when using a twilight switch with external sensor is not recommended because it may be subject to malfunctions caused by air pollution, excessive brightness or vandalism. DWA1 and DWA2 are also indicated for the control of public lighting, shop windows of shops, neon signs, monuments, facades, illuminated fountains.

Description	Ordering code	Unit L.P. (₹)
DWA twilight astronomical switches DWA-1, 1 channel	2CSM222511R1000	29,140
DWA twilight astronomical switches DWA-2, 2 channel	2CSM222501R1000	36,370

TL1

TL1 Pole

TL Line modular twilight switches

TL1 twilight switch allows to switch ON and switch OFF lighting devices according to a scheduled level of the ambient light. It is used in combination with an external sensor to detect if the ambient light is higher or lower than the set level. A switching delay prevents them from operating unnecessarily when the light intensity suddenly changes (e.g. lightning, moving vehicles, etc.). The TL1 twilight switch 1 channel is preset with a 10 LUX from factory and it is equipped with 2 signalling LEDs that indicate the setpoint value and display the status of the contact. The operating instructions are printed on the side of the product.

Description	Ordering code	Unit L.P. (₹)
TL1 modular twilight switches 1 channel with external sensor TL1	2CSM229921R1341	12,010
TL1 pole twilight switches, installation on the pole/wall TL1 Pole	2CSM229911R1341	11,170

AD1CO-15m

AG Timer electro-mechanical time switches

These analog timers are designed for installation on DIN-Rail. They control circuit opening and closing according to the scheduled program. Available both on daily and weekly versions and equipped with a 16 A contact. They can be set on the scheduled program or on the permanent ON-OFF function. The AD1NO-R-15m, AD1CO-R-15m, AW1CO-R-120m, AD1CO-R-30m, AW1CO-R-210m versions are equipped with a built-in battery, charged by the network voltage, which allows the devices to maintain the set time also in case of long (up to 150 h) power supply failures. The products fit applications such as control of lighting systems of shops or commercial buildings, heating and ventilation systems as well as control of automatic irrigation systems of private or external gardens.

Description	Ordering code	Unit L.P. (₹)

Control and automation components

Description	Ordering code	Unit L.P. (₹)
E 232-230 staircase lighting time-delay switches, Staircase lighting time-delay switches are usually operated by pushbuttons, often fitted with a glow lamp. Switches are designed for a glow lamp current of up to 150 mA and thus perfectly suitable for installations in multi-storey buildings.	2CDE110000R0501	8,340
The E 232-230 staircase lighting time-delay switch includes an electro-mechanical timer with a synchronous motor drive to ensure high operational safety in whatever mounting position. The time range is adjustable in increments of 15 seconds from 1 to seven minutes. Resettable after 30 seconds.	2CDE110003R0511	10,830

SMISSLINE TP plug-in system

Changes have never been easier

SMISSLINE TP ensures that load-free devices and components can be snapped on and off under voltage without the need for additional personal protective equipment to guard against electrical hazards.

It opens up to completely new prospects for you when it comes to installation, operation and flexibility.

The world's first pluggable socket system.

SMISLINE TP plug-in system

Changes have never been easier

Even safer: protection against electrical hazards

We have upgraded our unique SMISLINE socket system even further through the addition of a pioneering innovation. With the new SMISLINE TP system, components can now be plugged in or unplugged load-free without any risk from electrical current running through the body.

The SMISLINE TP pluggable socket system is completely fingersafe (IP2XB) – when devices are plugged in and unplugged, the system is always touch-proof. This means that SMISLINE TP prevents any danger to personnel from switching arcs or accidental arcing.

Even more flexible: make additions and changes during on-going operation

Pluggable devices can be added and changed quickly, safely and simply during on-going operation. And this can be done without any need for personal protective equipment.

This means that you benefit from more flexibility, savings on installation and maintenance – and improved safety. SMISLINE TP provides greater availability and operating safety than conventional systems.

ELR, Earth leakage relay - (DIN & front panel mountable)

Front panel residual current relays are electronic devices used in combination with an external toroidal transformer. They are according to the protection standard IEC/EN 60947-2 Annex-M. The sensitivity can be set from 0.03 A to 30 A, while the tripping time from 0 to 5 seconds. Residual current relays are available in versions 48x48 mm, 72x72 mm, and 96x96 mm. The Fail Safe function is available for versions ELR48P, ELR72P and ELR96P: the contacts switch when there is no auxiliary power. The ELR96PF version is equipped with Fail Safe function, fault memory LED, and a frequency filter, that ensure continuity of service in the presence of harmonics. ELR96PD has (in addition to these functions) a digital display for an instantaneous view of the residual current $I_{\Delta n}$.

RD3, residual current relays - (DIN-Rail mountable)

The RD3 family of electronic residual current relays provides residual current protection and monitoring functions according to IEC/EN 60947-2:2006 annex M and can be used in conjunction with all S 200 automatic devices and Tmax range moulded case devices up to T5, for industrial installations.

The RD3 residual current relays can provide status indications through two output contacts.

Measurement made simple

Value proposition

Simple to use

- Intuitive visualization of the parameters on the bright LED display
- Enhanced clarity in data reading and device configuration

Easy choice

- Maximum 2 steps to select the correct product for your application

Easy to install and stock

- Compact product design and optimized volumetric weight of packaging
- No tools required for product mounting, thanks to mounting clips

System integration

- Remote monitoring in any Modbus RTU supervision system thanks to the optional RS485 port

M1M DS

Your benefits

For distributors

- Save space needed for internal stock
- Fast selection of the correct product for your orders
- Handle a minimum set of order codes

For panel builders

- Reduce the time needed for meter installation on the panel
- Fast selection of the correct product for your application
- Increase the number of projects covered with the same product

M1 Single Function Measurement Devices

M1A, M1V and M1M 11

Ordering codes

M1A

M1A

M1A is a digital ammeter for Current measurement, providing the measurement of the single-phase or three-phase Current and allowing easy replacement of different analog meters.

Accuracy Class	Communication protocol and interface	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.	Unit L.P. (₹)
Class 1	-	M1A 1-1 Ammeter 1Ph	1SYG235145R4051 ■	0.19	1	1,720
Class 1	-	M1A 3-1 Ammeter 3Ph	1SYG235135R4051 ■	0.19	1	2,630
Class 0.5	-	M1A 3-05 Ammeter 3Ph	1SYG234905R4051 ■	0.19	1	3,100

M1V

M1V

M1V is a digital voltmeter for Voltage (and Frequency) measurement, providing the measurement of the single-phase or three-phase Voltage as well as Frequency (for 3Ph Voltmeter) and allowing easy replacement of different analogue meters.

Accuracy Class	Communication protocol and interface	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.	Unit L.P. (₹)
Class 1	-	M1V 1-1 Volt Meter 1Ph	1SYG233965R4051 ■	0.19	1	1,720
Class 1	-	M1V 3-1 Volt Meter 3Ph	1SYG233955R4051 ■	0.19	1	2,630
Class 0.5	-	M1V 3-05 Volt Meter 3Ph	1SYG233695R4051 ■	0.19	1	3,100

M1M 11

M1M 11

M1M 11 is a digital kWh meter for energy measurement, providing the measurement of the single-phase and three-phase energy consumption.

Accuracy Class	Communication protocol and interface	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.	Unit L.P. (₹)
Class 1	Modbus RTU RS485	M1M 11-1 kWh Meter Modbus	1SYG233685R4051 ■	0.22	1	8,760

M1M Multi-function Measurement Devices

M1M 10, M1M 12 and M1M DS

Ordering codes

M1M 10

M1M 10

M1M 10 is a VAF meter for basic electrical system monitoring, providing the measurement of the main single-phase and three-phase electrical parameters and allowing easy replacement of different analogue meters.

Accuracy Class	Communication protocol and interface	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.	Unit L.P. (₹)
Class 1	-	M1M 10-1	1SYG235081R4051 ■	0.3	1	3,060

M1M 12

M1M 12

M1M 12 is a Multi-function meter, providing what is needed to monitor the electrical system and allowing statistical metering of active energy consumption.

M1M 12 product range includes option with built-in communication protocol (Modbus RTU) through RS485 communication port, allowing easy integration with Modbus supervision systems.

Accuracy Class	Communication protocol and interface	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.	Unit L.P. (₹)
Class 1	-	M1M 12-1	1SYG207591R4051 ■	0.3	1	9,880
Class 1	Modbus RTU RS485	M1M 12-1 Modbus	1SYG207581R4051 ■	0.3	1	10,940

M1M DS

M1M DS

M1M DS is a digital dual source meter for the measurement of basic electrical parameters along with power parameters for two source measurement such as EB/DG.

Accuracy Class	Communication protocol and interface	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.	Unit L.P. (₹)
Class 0.5	-	M1M DS-05	1SYG232385R4051 ■	0.21	1	8,480
Class 0.5	Modbus RTU RS485	M1M DS-05 Modbus	1SYG232375R4051 ■	0.21	1	8,750

M1M Power Meters

Introducing the new ABB power meter ranges M1M 15, M1M 20B, M1M 30B, M1M 20 and M1M 30 an easy solution for any standard application in buildings and industry.

M1M 15, M1M 20B, M1M 30B, M1M 20 and M1M 30 are the new ABB ranges of power meters, offering exactly what is needed to monitor the electrical system and analyze the power quality in a single device.

The new M1M power meters offer allows to easily and cost-effectively cover the main submetering and power quality monitoring requirements in commercial and industrial buildings, either small or mid/large-sized, e.g. inside power factor correction boards, motor control center or sub-distribution switchboards.

ABB's complete multifunction meters product line, now including M1M 15, M1M 20B, M1M 30B, M1M 20

and M1M 30 ranges, are capable to cover all needs, from basic electrical parameters measurement to advanced power quality analysis.

ABB's power meters are simple to use, with a common and intuitive user experience from installation to operations, allowing to fully exploit the reliable, IEC-compliant measurements.

Thanks to their connectivity capabilities, M1M can get leverage on the integration in ABB scalable energy and asset management solutions to monitor, optimize and control the complete electrical system, such as System pro M compact® InSite and ABB Ability™ Energy and Asset Manager cloud-computing platform.

M1M 30B

M1M 20

M1M 30

Measurement made simple

The complete M1M range, offering all the measurement features required for basic power quality monitoring and submetering in a single power meter; making measurement simple.

Complete offer

ABB meters to cover all needs

Select in maximum 2 steps the right and most competitive power meter to cover all basic electrical system measurement needs. Thanks to integrated functionalities and communication protocols, the same product version fits an increased number of projects and wide applications range.

Easy to use

Common user experience

Common and intuitive menu structure all over the different ranges on clear and large backlit LCD/LED displays, helping to reduce the time needed to operate the power meters. Feedback on correct operations and quick reactivity on the system events are ensured by alarms icons and frontal LEDs on all product versions.

Easy to install

Optimized installation process

Compact power meters, ensuring a very limited footprint inside the panel, provide a common, vertical disposition of the terminals for easy wiring of cables directly from the sides. No special tool is required for product mounting, thanks to mounting clips.

Energy Efficiency

Reliable and accurate measurement

Complete set of measurement functionalities, from Multi-function meters to intermediate power meters, compliant with accuracy standard IEC 61557-12 to allow improving energy efficiency of the electrical system. Remote communication on main communication protocol, Modbus RTU and Modbus TCP/IP.

Your benefits

For distributors

- Reduce selection time of the correct product, thanks to reduced range complexity
- Manage a limited number of order codes from a single supplier
- Save space needed for internal stock
- Have the product on stock when needed and reduce delivery time

For panel builders

- 1 supplier only for all measurement products covering a wide range of projects
- Increase competitiveness in projects
- Reduce time needed for product selection, thanks to simple range composition
- Reduce time for installation and operations
- Minimum space requirements in the panel

M1M Power Meters

M1M 15, M1M 20B, M1M 30B, M1M 20 and M1M 30

Ordering codes

M1M 15

M1M 15

M1M 15 is a complete multi-function meter for electrical system monitoring, mainly targeting measurement of basic electrical parameters and applications for cost allocation of energy consumptions.

Accuracy Class	Communication Protocol	I/O	Order details Type code	Order code	Weight 1 piece kg	Pack unit pc.	Unit L.P. (₹)
Class 1	-	-	M1M 15-1	2TAZ661010R2000	0.31	1	24,040

M4M Network Analyzers

Discover the benefits

M4M as a stand-alone network analyzer guarantees all power monitoring needs in the energy distribution system: from high-accuracy energy efficiency monitoring of electrical parameters to complete power quality analysis. Thanks to its connectivity capabilities, M4M can get leverage on the integration in ABB scalable energy and asset management solutions. Thanks to MID certification, M4M allows now to fulfil all legal requirements for accounting and energy acquisition.

—
-50% Time for integration
in the ABB turnkey solution

Full connectivity

Natively integrated in sub-distribution management System pro M compact® InSite and ABB Ability™ Energy and Asset Manager cloud-solution, M4M benefits from the scalability of the ABB digital solutions: from stand-alone visualization and commissioning to monitoring, optimization and control of the complete electrical system.

—
Reliable and accurate power
monitoring

Energy Efficiency

ABB's M4M range of network analyzers gathers data from the electrical system and provides a complete power quality analysis and high accuracy energy monitoring. MID certification available to ensure certified and tamper-proof measurement for billing applications and fulfilment of legal requirements for accounting and energy acquisition.

—
-40% Time for installation
and commissioning

Simple and Intuitive

M4M makes configuration and operations simple and fast, from easy installation and wiring, thanks to compact dimensions, all-removable terminals and Rogowski coils, to intuitive use and data access thanks to touchscreen color display, mobile app and desktop software.

—
Improve reactivity and reduce
uncoordinated maintenance

Realtime supervision

M4M network analyzers make information easy to access from any area of the system, providing a comprehensive range of accurate data and notifications that enhance reactivity to the events on the electrical system and allowing to avoid overloads, outages and un-coordinated maintenance.

Explore the M4M ranges

M4M network analyzers are available in different versions which ensure all power monitoring needs, from basic to more complete power quality analysis.

EQUIPPED WITH GRAPHIC COLOR DISPLAY AND 5 PUSHBUTTONS KEYBOARD, M4M 20 RANGE ALLOWS COMPLETE MONITORING AND BASIC POWER QUALITY ANALYSIS.

EQUIPPED WITH TOUCHSCREEN COLOR DISPLAY, M4M 30 RANGE ALLOWS COMPLETE POWER QUALITY ANALYSIS AND ENERGY EFFICIENCY EVALUATIONS.

M4M 2X ON DIN-RAIL WITHOUT DISPLAY, ENSURING HIGH FLEXIBILITY TO PROJECT SPECIFICATIONS COMPARED TO STANDARD NETWORK ANALYZERS.

MID-certification

Availability of MID approval to ensure certified and tamper-proof measurement for billing applications.

Graphic color display

M4M 20 and M4M 30 are equipped with a graphic color display and common app-based menu for an intuitive visualization.

Bluetooth-enabled

All M4M network analyzers are equipped with Bluetooth module for smart commissioning via mobile app.

Full communication

A complete set of embedded communication protocols, including Modbus RTU, Modbus TCP/IP, Profibus DP-V0 and BACnet/IP

Input/Output

Control on the system, thanks to I/O options including digital outputs, programmable I/O or programmable analogue outputs.

Datalogger

M4M 30 data logging features are available, from complete notification logs to flash memory and RTC for 1-year data logging of trends.

Rogowski version

M4M Rogowski versions are compatible with ABB's R4M Rogowski coils for easy retrofit in existing installations.

Energy meters

The details that make the difference

NEW

Energy meters

Selection framework

The below framework is designed to streamline the process of choosing the right energy meter tailored to individual needs. By considering factors such as accuracy of energy measurement and desired features, the framework guides customers towards optimal selections. With a focus on accuracy, efficiency, and compatibility, users can confidently identify the perfect energy meter solution for their residential, commercial, or industrial requirements.

InSite energy management system - SCU100

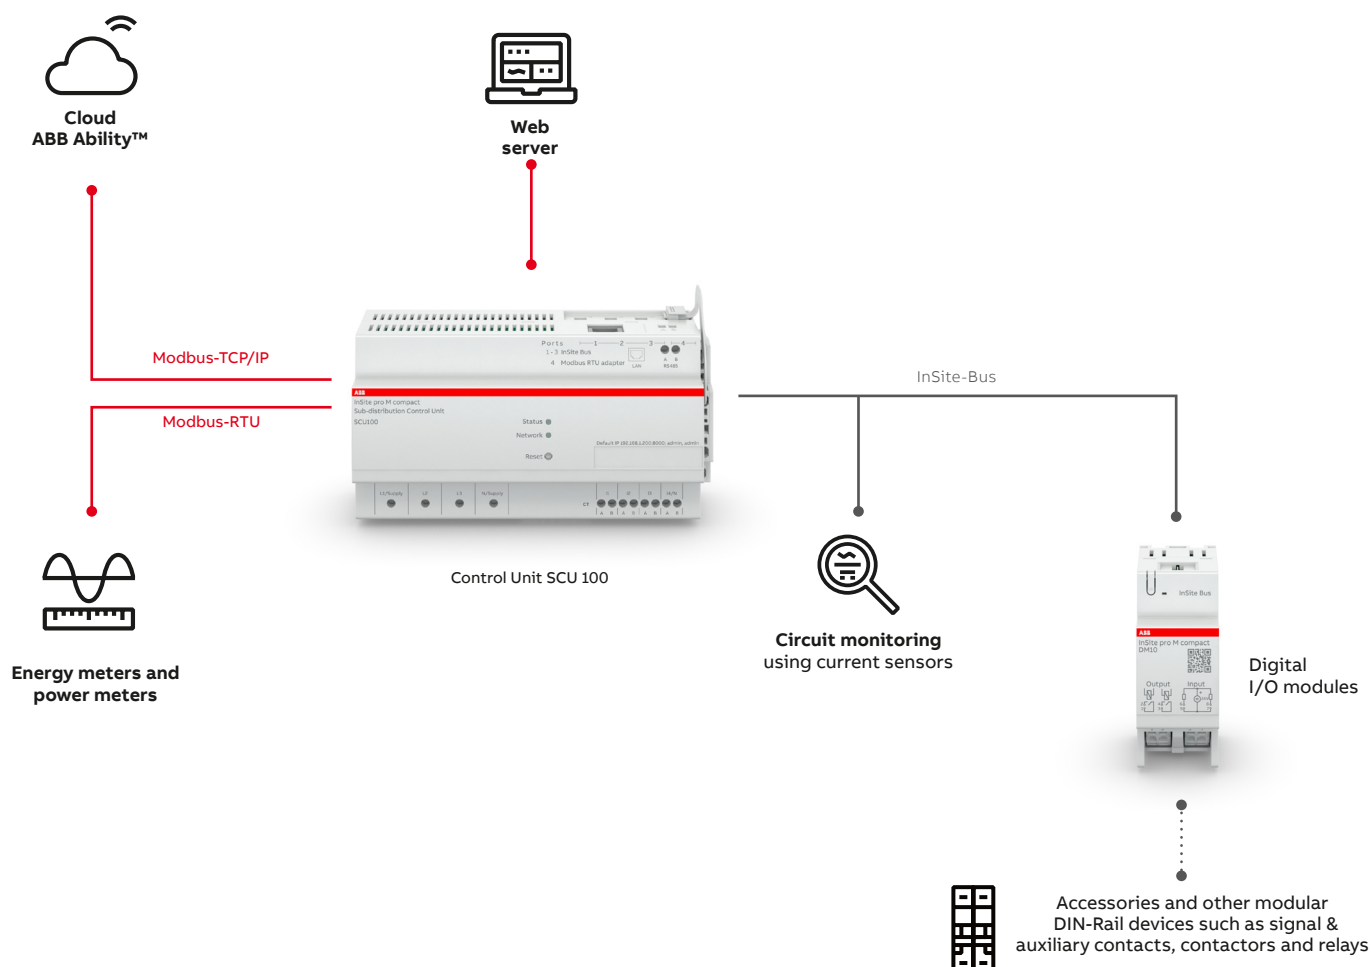

Connected solution for sub-distribution

The InSite energy management system allows you to collect data from field devices in electrical distribution, as well as control and automate them through the use of accessories. Specifically recommended for large commercial and industrial applications, the SCU100 control unit is capable of simultaneously gathering measurement data from up to 16 energy and power meters, as well as 96 current sensors and digital sensors.

Thanks to its modular system, InSite is designed to easily upgrade new and existing installations, reducing installation and configuration time to near zero and minimizing disruption and costly downtime.

In addition to the current sensors, the range is complemented by a selection of Digital Input and Output Modules that can be easily connected to ABB System pro M compact® protection devices and accessories, as well as to pulse meters such as gas or water meters to collect consumption data.

Based on a variety of data, the available functionalities range from simple monitoring of the plant to analysis of historical data, customized alarms and implementation of automatic measures to reduce energy consumption identify potential risks and ensure business continuity.

InSite energy management system

The evolution of the system - SCU200

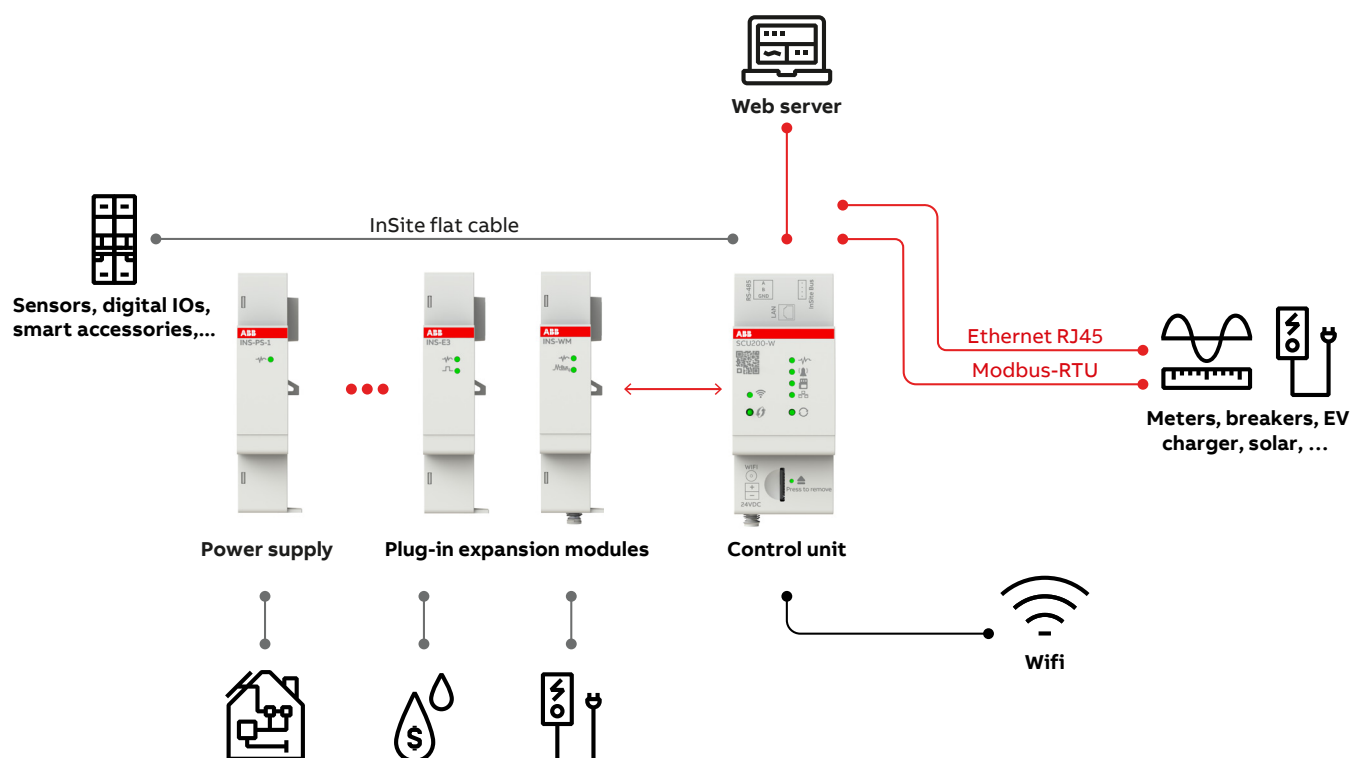

The InSite system takes smart energy and load management to the next level, providing a complete solution to optimize energy usage in both sub and final distribution. Through the compact control unit SCU200, data is gathered from the field devices, and then can be accessed via the InSite web server, the ABB Ability™ Energy & Asset Manager or any third-party application.

The new plug-in expansion modules allow the system to be adapted even better to the respective application needs.

Depending on measurement and optimization goals, Wireless M-Bus and Energy Meter modules can be used and plugged to the control unit without tools.

With more automation logics available, load prioritization is optimized, enabling the most efficient use of energy in any residential, commercial or industrial space. And thanks to the openness to third-party integration, loads such as heat pumps, Electrical Vehicle chargers or energy storage units can also be easily connected to the system, further increasing the potential for energy savings.

The integrated InSite web server has evolved to now include a cost calculation feature, a step-by-step installation wizard and advanced options for setting automated actions to control loads in residential, commercial and industrial buildings, enabling energy savings of up to 20%.

Integrate however you want, thanks to multiple mounting options.

Depending on the application, choose between up to four different mounting options to make integrating the CMS sensors in your installation as simple and as uncomplicated as possible.

Sensors for ABB devices

System pro M installation, SMISSLINE

The sensors of the CMS-120LA and CMS-120FH series allow easy retrofit installation on S200 MCBs, SMISSLINE devices and E90 fuseholders (1000VDC).

Universally usable sensor designs

Cable tie mounting

If space is at a real premium, CMS-120CA, CMS-100CA, and CMS-200CA series sensors can be secured directly to the cable(s) to be measured by means of cable ties.

Tangible value-addition for you ABB circuit monitoring pays off two-fold

Early warning system (predictive maintenance) for increasing the availability of critical consumers

Continuous monitoring of the current flow at the circuit breaker makes it possible to detect overloaded lines before they lead to a service interruption. Apart from this, monitoring individual circuits indicates whether the loads are in the desired operating mode or not. In this way, system deviations can be ascertained instantaneously. What's more, the CMS can be used to detect unbalanced loads before they result in failure of the neutral conductor and consequently load failure.

Cost analysis to reduce and assign energy costs

The cost of energy will rise continuously. In order to cut costs, you first have to know where they arise. The Control Unit helps illustrate and analyze the instantaneous energy consumption levels. Furthermore, the calculated active energy can be used to roughly allocate the costs at the output level.

Ordering data

System pro M compact® InSite

Accessories

The Control Unit needs a flat cable to gather information from current sensors and digital I/O modules. The flat cable should be a 4-pin cable, flexible in length. Devices can be placed at customizable distances required by the specific application.

ABB ITUS Distribution boards

Performance redefined

At ABB, our unwavering commitment is to redefine the very boundaries of innovation. Enter our latest masterpiece, the ITUS improved design meticulously designed to cater to the diverse utility demands of residential, commercial, and industrial domains. Going beyond mere functionality, it introduces a groundbreaking design that seamlessly integrates with the essence of any architectural milieu.

Tested and proven

MIVAN compatible

As new interiors use advanced construction procedures and methods, ABB ITUS Distribution Enclosures have been designed to meet MIVAN type of construction with following features.

ITUS Distribution boards comes with individual packing for door/frame & inner shield which can be stored safely until Installation.

1. Back box provided with Top and Bottom rectangular cutout with removable gland plate to increase the strength the DB.
2. Removable chassis with neutral bar mounted on it and earth bar is also removable which can be store separately.

3. Cement spill protector for protection of DB interiors from cement splashes during civil activities.

4. Removable frame is provided to facilitate adjustments owing to civil work like plastering.

Once plastering is completed, frame and door are installed. Since thickness of plaster itself is 8 mm to 10 mm, the screws used to fix frame with the DB box have to be long enough, Hence long screws are provided to meet the requirement.

ABB ITUS Distribution boards

SPN-SHC

Horizontal single-phase consumer unit with provision for 2 pole (MCB/Isolator/RCD) incoming and single phase outgoing. These distribution boards come with earth link, shrouded neutral link and tinned electrolytic copper insulated busbar. Top and bottom, removable gland plates with knockouts. Mounting of these boards can be flush or surface.

Millenium

Features and benefits

Innovation, design and technology

Millenium's design and functionality convert into numerous technical and installation advantages

- Modern and contemporary 8 finishes
- Real stainless steel material **AISI 304**
- 2 finishes made in **CSG glass**
- Slim line design : only **4 mm**
- Rocker with attractive **chrome profile**
- **Screwless** front plate ultra slim design

Mounting plate

Premium rocker switch

Frame

Millenium collection is a grid type system enabling combination of colours and products of different dimension and functionality. The three type of switch dimensions together with the ABB i-bus® KNX, ABB-free@home® sensors and other functions, have to be composed with the required frame in order to have the right assortment of functionality and design. In ABB i-bus® KNX sensors, we have the possibility to adjoin to the frame the special metal mounting plate that allows to reduce the height so as to maintain the ultra slim line for KNX functionalities.

ABB warranty policy for Zenit collection:

- 10 years for mechanical switches and socket outlets
- 1 year for electronic devices

Zenit

Switch to endless possibilities

Zenit is the most comprehensive modular range for all kinds of homes and commercial buildings. A number of appreciated designs and beautiful finishes that add value to the facility, with advanced features that provide greater comfort and performance level. With Zenit you can make any type of installation, can enjoy benefit of technical advantages that make it easier and faster. This range has the guarantee of a brand renowned for its quality such as ABB.

- Premium modular light switch range
- Multi-standard: fitting in European, American and Italian boxes
- Eco-designed
- More than 100 functions in four finishes

Zenit

Features and benefits

The top in design and performance

Simple, elegant, the top in design.

Zenit is born with a high-rise design. With rectilinear lines, very trendy finishes and full of details that enhance its aesthetics. It reaches the highest levels in quality and infinite values.

Eco-design

The Zenit switch range has been designed following the Product Design and Development Environmental Management regulations: Eco-design.

Zenit float

7,5 mm height. Visually lightened through the 2 piece floating effect.

Switches as per BIS standards
and with ISI marking.

Zenit

Applications

Zenit is based on a combinable concept which creates a very comprehensive range, suitable for any type of needs. This makes it the ideal collection for all types of homes, hotels, offices, shops, etc.

Homes

Its simple and minimalist design integrates in any type of architecture, regardless of the decoration. It provides a wealth of features and value, thanks to its wide range of functions and benefits.

Zenit is the perfect match to improve living space.

Hotels

Zenit is specially suitable for hotel projects, thanks to its modern design, fashion materials and functionalities that provide high comfort level to the hotel guests. Its ABB i-bus® KNX, ABB-free@home®, access control, sound system and more functions make a special contribution to the Guest Room System in the daily management of the hotel, achieving energy savings and high tech comfort.

Commercials

The Zenit collection offers elegance and distinction to commercial spaces designed for different purposes; restaurants, coffee shops, stores, offices, etc.

Zenit

Functions for all spaces

Zenit can be installed everywhere, in spaces that require new solutions, with new applications and all installation facilities.

Up to 40% savings

- Contacts with an automatic connection terminal providing ease and up to 40% savings in installation time.
- The standard Zenit light switches are 16 AX and they offer top quality with a reduced number of reference to stock.
- More robust and compact mechanisms to be inserted from the front.
- Designed to hold the switches firmly, avoiding balancing problems.
- They have reduced depth, only 21 mm, which allows more connection space for wires.
- With larger press clamps and smoother to make the automatic connection more comfortable and safer.
- They have been manufactured with high quality and recyclable material.

Automatic connection

1. Strip the cable about 14 mm and introduce it into the terminal.

2. Press the push button and insert the cable.

3. Release the push button and check fixation. To disconnect the cord, press the push button again on top and bottom.

IVIE

Switch to the future

IVIE is the latest premium modular range of wiring accessories designed to address various functionalities. These include basic switching, controlling, comfort and energy saving.

IVIE installation system

IVIE series is a grid type system enabling combination of colours and products of different dimensions and functionalities, together with ABB-free@home® sensors that have to be composed with the required frame, in order to have the right assortment of functionality and design.

- All switches are marked with IS 3854:1997
- Captive screw terminals
- Bi-metal silver contact tips for less spark and longer life
- 6A & 6/16A marked with IS 1293, up to 16A
- Sockets designed to match 2 pin & 3 pin plug tops

IVIE

Switch to the future

The IVIE range innovatively matches your interiors and aesthetically brings out the best in your comfort zone. The enhanced design for reliable performance of this range is for the passionate, compassionate, intuitive and magnetic personality within each one of us.

The IVIE range, includes the tastefully selected color options, caters to the needs of various segments like residential, commercial and hospitality.

IVIE with its ability to integrate home automation solutions in your existing switch box, makes the range future proof.

IVIE truly makes you want to switch to the future.

Sleek and convex design in different finishes

Thanks to the complete system, the IVIE series provides a comprehensive range of solutions for building concepts. The convex and sleek design not only provides quality and style to the overall building, but is easy to install.

01

02

03

04

Different finishes and combinations:

- 01 Anthracite grey mechanisms in Silver plate
- 02 Silver mechanisms in Anthracite Grey plate
- 03 Anthracite grey mechanisms in White plate
- 04 Anthracite grey mechanisms in Anthracite Grey plate

IVIE

Flexibility in design which provides total control

The IVIE range is the first Indian range to incorporate wired and wireless home automation systems together. This range can be integrated with

ABB-free@home® home automation system, which is the most intelligent way of managing spaces with energy saving.

Great comfort, safety and energy efficiency for buildings

ABB-free@home® sensor for switching control, blind control, dimming and scene control.

IVIE

Features and benefits

Innovation, design and technology range with real international concepts

IVIE's design and functionality convert into numerous technical and installation advantages.

Modern and latest finishes in white, silver, anthracite and colours of your choice.

Convex profile plate with less projected sleek design is a perfect match for any architecture. Dust free surface and a slim design, not only add to the quality, but also provide a stylish look.

Double shrouded internal mechanism under the rocker, totally preventing visibility of sparks.

Terminal screws with Combihead for star/flat screw drivers.

Large variety of sockets, equipped with shutters for increased safety. Compatible for 6/16A two pin plug.

Universal regulator with 360 degree rotation.

1,00,000
On/Off Tested

Switches with
double shrouds

Knobs with
360° rotation

IVIE

Features and benefits

IP20 Finger Proof for total safety, user friendly terminal design-easy terminal accessibility by top entry to load connection.

ISI marking on switch socket and fan regulator.

Visual signs provided in inner grids to guide proper fitment of easy installation and easy removal during fitment of mechanism with inner grid.

Resin frame with extra ribs provides better mechanical strength, insulation resistance and corrosive proof.

Independent shutter for earth and phase+neutral for child safety and easy connection.

Captive screws in IVIE for switches and sockets to avoid free falling and missing of screws

ISI marking Switch /
Socket / Regulator

Socket with
separate shutter

Captive screws

IVIE

Features and benefits

Mounting screws press fitted in back side screw holder to prevent losing of the screws.

Two module partition is provided for sturdiness with extra ribs to ensure better strength of the frame.

Laser marking and arrow showing the correct orientation of the mechanism.

IVIE incorporates full range of ABB-free@home® home automation and gives answers to the future by providing comfort, safety and energy savings.

Suitable design for a variety of plug tops - no overlapping on the mechanism fitted next to the socket.

ABB warranty policy for IVIE range

- 10 years for mechanical switches and sockets
- One year for electronic devices

Tvisha

Switch on simplicity

Tvisha is a range of wiring accessories with simple flat surface design that creates a trend on the wall with its elegant Euro white finish. The range covers a large variety of functionalities that cater to most of the applications beyond the normal switching functions like USB chargers, HDMI ports, communication sockets, foot lamps and dimmers. Tvisha is ideal for residential and commercial requirements.

- Plastic parts which hold current carrying parts are made of PA6 20% glass filled rating upto 16A
- All switches are marked with IS 3854:1997
- Terminals are designed in such a way that wire is tightened without damage
- All fan regulators are marked with IS 11037:2019
- Bi-metal silver contact tips for less spark and longer life
- 6A & 6/16A marked with IS 1293, up to 16A
- Non-flammable thermoplastic resin parts and a very high insulating resistance after humidity test

Tvisha

Features and benefits

Internal arc shield provided in switch mechanism

Terminal screws with Combihead for star /flat screw drivers.

Top entry

Easy terminal accessibility by top entry to load connection.

ISI marking on switch socket and fan regulator and laser marked.

Laser marking and arrow showing the correct orientation of the mechanism.

20A DP switch in one module (space optimisation)

**1,00,000
On/Off Tested**

**Switches with
internal arc shield**

**ISI marking Switch /
Socket / Regulator**

Tvisha

Features and benefits

Large variety of sockets, equipped with shutters for increased safety.

Universal regulator with 360 degree rotation.

6/16A sockets are equipped with dual shutters which can take two pin plugs.

HDMI modular ports equipped with female connector for easy termination.

USB charger current rating 1A and 2A, visible LED indication, dual color LED indication for on load & without load operation.

Communication mechanisms – RJ-11, RJ-45 cat6. Self-moving shutter to screen the jack when it is not in use.

Switches current carrying parts are made of PA6 20% glass filled

Knobs with 360° rotation

Socket with separate shutter

Tvisha

Features and benefits

Mounting screws press fitted on the screw holder on inner frame to avoid losing the screws.

Two module partition is provided for sturdiness with extra ribs to ensure better strength of the frame and overlap of plugs.

Visual signs provided in inner grids to guide proper fitment for easy installation and easy removal during fitment of mechanism with inner grid.

USB charger current rating 3A 15W USB C type 1M and 3A 15W USB A+C type 2M for on load & without load operation.

Resin frame with extra ribs provides better mechanical strength, insulation resistance and corrosion proof.

ABB warranty policy for Tvisha range

- 10 years for mechanical switches and sockets
- Two year for electronic devices

ROHS compliance

Ease of
installation

Frame with
partition

LIORA **NEW**

Indulge in excellence: Switch to perfection!

Experience the perfect blend of modernization and aesthetics with LIORA. Designed for diverse environments, LIORA delivers unmatched style and functionality, making it the ideal choice for urban interiors.

Crafted with smooth edges for a perfect wall fit, LIORA delivers superior safety, performance, and aesthetics.

Designed for residential, commercial, and hospitality spaces, it's the ideal solution for both upgrades and new installations, offering reliability, efficiency, and style.

- **Diamond cut design: Shimmering edges that stay flawless; tough yet refined**
- **6.5mm thickness mounting surface for a sleek & sturdy appearance**
- **PC material plate for safe and easy installation**
- **A diverse range of plates to suit commercial, residential, and hospitality applications**

LIORA

range of switches

Crafted to meet the demands
of modern residential
& commercial buildings

Sleek and sturdy
With its ultra-slim 6.5mm profile, **Liora** redefines modern elegance

Non-flammable PC material
Offering high insulation resistance for better safety

Superior endurance

Diamond-cut design
Shimmering edges that stay flawless; tough yet refined

Horizontal and vertical installation

Designed for versatility, our plates can be mounted both vertically and horizontally, with vertically mounted plates ideal for spaces with constraints

Front removal mechanism

Simplify your setup with front removal, allowing for easy and tool-free maintenance

Healthcare

LIORA

Features & benefits

Switches come with an internal arc shield for added safety

Switch, socket, and fan regulator are ISI marked

Extra space for easy cable termination provides added convenience.

Terminal screws with combined for flat screw drivers

Tested for 1,00,000 On/Off operations

Switches with internal arc shield and PC material

ISI marking Switch /Socket/Regulator

LIORA

Features & benefits

Our switches also feature an LED light to enhance visibility (an energy saving feature)

Top engraving provided for correct orientation

Sockets are equipped with shutters for increased safety

6/16A sockets equipped with dual shutters to accommodate 2-pin plugs

Universal fan regulator with 360° rotation & ISI certified

Integrated USB A+C ports (3A) for convenient charging of devices

LIORA

Features & benefits

Energy saving foot lamp in 2M with LED illumination

Communication mechanism: RJ11, RJ45, CAT6. Self-moving shutter to screen the jack when it is not in use

Modular MCBs in 1M and 2M, ranging from 10A to 32A, with front easy fixing for overload and short circuit protection

Easy snap-fit and front removal

WARRANTY POLICY

10
YEARS

- 10 years for mechanical switches and sockets
- Two years for electronic devices

Certifications & Standards

Our new range of wiring accessories meets the highest standards of electrical safety and performance

- **IS3854:2023** - Switches for domestic purposes.
- **IS1293:2019** - Plug & Socket outlets for household use.
- **IS11037:2023** - Electronic type fan regulators
- **IS13252(Part 1) / IEC 60950 - 1** - USB Chargers
- **IEC 60898-1** - Modular MCB
- **Fire retardant materials:** Built with fire-resistant materials to ensure safety in the event of electrical faults or fires
- **IP ratings:** Select products feature IP ratings for moisture and dust resistance, making them ideal for use in kitchens, bathrooms, and outdoor spaces. IP20 protection prevents finger-sized objects from touching the conductive area

Busch-Presence detectors

Energy saving the easy way

Presence detectors automatically detect the presence of someone inside the room. Their precision is far superior to that of conventional movement detectors. Not only lighting systems but heating systems and air-conditioning systems can be controlled intelligently and efficiently with presence detectors. Empty rooms in which the lights are on and the air-conditioning runs at full power are now history. There is one presence detector for each need.

Description	Type	Ordering code	Unit L.P. (₹)
Busch-Watchdog Presence tech BasicLINE mini - 6 Metres For switching lighting systems that depend on brightness and movement. Ceiling installation using integrated spring bracket. Switch-off delay: approx. 1 sec - 15 min or short-time pulse adjustable.	6811 EB-500	2CKA006800A2517	7,890
Busch-Watchdog Presence tech BasicLINE - 8 Metres For switching lighting systems that depend on brightness and movement. For semi-automatic and fully automatic operation. Ceiling installation using integrated spring bracket. Switch-off delay: approx. 5 sec - 30 min or short-time pulse adjustable.	6814 U-500	2CKA006800A2518	6,840
Busch-Watchdog Presence tech BasicLINE Corridor - 24 Metres For switching lighting systems that depend on brightness and movement. Ceiling installation using included dust protection socket. Switch-off delay: approx. 10 sec - 30 min or short-time pulse adjustable. Remote control possible via IR service remote control 6843. Use outdoors possible due to combination with surface mounted housing 6888.	6818 U-500	2CKA006800A2519	14,580
Surface-mounting box -6818U For Busch-Watchdog Presence tech BasicLINE Corridor 6818 U-500. For surface mounting and increase of the protection type. Protection class (Device): IP 54	6888	2CKA006899A2305	2,800

6817/32-24-500

Description	Type	Ordering code	Unit L.P. (₹)
Presence Comp. e-contact - 8 Metres Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. Detection range (for installation height of 3 m): circular: Seated persons: up to Ø 6,5 m, walking persons: up to Ø 8 m. Ceiling installation using integrated spring bracket. Switch-off delay: approx. 1 min - 30 min or short-time pulse adjustable. Remote control possible via IR service remote control 6843. Suitable for false ceilings with a board thickness from 9 to 25 mm.	6817/62-24-500	2CKA006800A2737	27,410
Presence Uni. e-contact - 12 Metres Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. Detection range (for installation height of 3 m): circular: Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Ceiling installation using integrated spring bracket. Switch-off delay: approx. 1 min - 30 min or short-time pulse adjustable. Remote control possible via IR service remote control 6843. Suitable for false ceilings with a board thickness from 9 to 25 mm.	6817/32-24-500	2CKA006800A2739	32,770
Presence Uni. Bluetooth e-contact - 12 Metres Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. Detection range (for installation height of 3 m): circular: Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Ceiling installation using integrated spring bracket. Switch-off delay: approx. 1 min - 30 min or short-time pulse adjustable. With selectable dynamic switch-off delay. Suitable for false ceilings with a board thickness from 9 to 25 mm.	6817/33-24-500	2CKA006800A2743	36,240

6819/51-24-500

Description	Type	Ordering code	Unit L.P. (₹)
Presence Comp. rel - 8 Meters Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. With power relays for LED operation. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 6.5 m, walking persons: up to Ø 8 m.	6819/60-24-500	2CKA006800A2733	25,590
Presence Uni. Rel - 12 Meters Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. With power relays for LED operation. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m.	6819/30-24-500	2CKA006800A2735	31,200
Presence Uni. rel. Bluetooth - 12 Metres Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. With Bluetooth interface for parameterization and operation. Adjustment of all setting options via smartphone or tablet. Light control via smartphone or tablet app. With power relays for LED operation. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m.	6819/31-24-500	2CKA006800A2741	35,340
Presence Corr. rel. Bluetooth - 20 Metres Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. With Bluetooth interface for parameterization and operation. Adjustment of all setting options via smartphone or tablet. Light control via smartphone or tablet app. With power relays for LED operation. Detection range (for installation height of 3 m): rectangular Walking persons: crosswise to the detector 30 m x 3 m, frontal 20 m x 3 m. Extension of the detection range by means of master/slave combination. Mounting height 27 mm.	6819/51-24-500	2CKA006800A2745	45,600
Presence Uni. DALI Bluetooth -12 Metres Master presence detector with mixed light measurement. For regulating and switching of DALI operating devices that depend on brightness and movement. Suitable for up to 45 DALI operating devices. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m.	6819/35-24-500	2CKA006800A2747	44,030

Description	Type	Ordering code	Unit L.P. (₹)
Presence Corr. DALI Bluetooth - 30 Metres Master presence detector with mixed light measurement. For regulating and switching of DALI operating devices that depend on brightness and movement. . Detection range (for installation height of 3 m): rectangular Walking persons: crosswise to the detector 30 m x 3 m, frontal 20 m x 3 m.	6819/55-24-500	2CKA006800A2749	59,450
Presence Comp. Slave - 8 Metres Slave presence detector for extension of the detection range of master presence detectors. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 6.5 m, walking persons: up to Ø 8 m. Visible height 23 mm.	6819/68-24-500	2CKA006800A2751	20,470
Presence Uni. Slave - 8 Metres Slave presence detector for extension of the detection range of master presence detectors. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Visible height 23 mm.	6819/38-24-500	2CKA006800A2753	24,970
Presence Corr. Slave - 30 Metres Slave presence detector for extension of the detection range of master presence detectors. Detection range (for installation height of 3 m): rectangular Walking persons: crosswise to the detector 24 m x 3 m, frontal/lengthways to the detector 14 m x 3 m.	6819/58-24-500	2CKA006800A2755	33,700
Presence Uni. DALI Slave - 12 Metres DALI slave presence detector for extension of the detection range of DALI master presence detectors. For the supply of operating voltage via the DALI master. Power consumption on the DALI bus: max. 10 mA, corresponds to approx. 5 DALI operating devices. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Visible height 23 mm.	6819/39-24-500	2CKA006800A2759	32,460
Presence Corr. DALI Slave - 30 Metres DALI slave presence detector for extension of the detection range of DALI master presence detectors. For the supply of operating voltage via the DALI master. Detection range (for installation height of 3 m): rectangular Walking persons: crosswise to the detector 24 m x 3 m, frontal/lengthways to the detector 14 m x 3 m. Mounting height 27 mm.	6819/59-24-500	2CKA006800A2761	33,700
Presence Corr. Rel - 30 Metres Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. With power relays for LED operation. Detection range (for installation height of 3 m): rectangular Walking persons: crosswise to the detector 24 m x 3 m, frontal/lengthways to the detector 14 m x 3 m. Switch-off delay: approx. 1 min. - 30 min. or short-time pulse adjustable.	6819/50-24-500	2CKA006800A2797	42,130
IceLight set ceiling module, Busch-iceLight Consisting of LED/FM insert, power module (neutral white) 2067/12 U. Consisting of ceiling module, one light direction 2068/21. For ambient lightning. Light outlet downward. Not dimmable. Light intensity can be switched between 100% and 25% using front service switch. Colour temperature: 4,000 K (neutral white) System power consumption: 5 W Rated voltage: 230 V~, + 10% / - 10% Current consumption of LED: 350 mA (secondary) Secondary: SELV	2069/21	2CKA001510A0018	46,140
IceLight Night light set, studio white, Busch-iceLight Complete set consists flush-mounted LED insert Night light (cold white) 2067/14 U. Wall module with one lighting direction, design future® linear 2068/11-84. Cover frame design future® linear 1721-184K. With one lighting direction. Not dimmable. For low brightness (night light). Colour temperature 6,500 K (cold white) System power consumption: 0.15 W Rated voltage: 230 V~, + 10% / - 10% Current consumption of LED: 40 mA (secondary) Secondary: SELV	2069/11-84	2CKA001510A0015	22,930

Service portfolio

ABB Service

ABB Service is more than a simple Service!

ABB is a pioneering technology leader for utilities, industries, transportations and infrastructures.

The company was founded in 1988 by the merger between ASEA and Brown Bover & Cie (BBC), two of the most important electrical companies of the last century.

ABB has extensively invested in Service developing advanced solutions aim to guarantee the continuous revamping of products and systems according to the technology progress.

Spare Parts

Spare Parts availability is the key of a successful Service!

A spare part is a replaceable product's component fundamental to ensure the functioning of the system to which it belongs.

Having original spare parts always at your disposal means guarantee of the highest level of performance to your plant, reducing significantly the risk of failure as well as the down-time due to the maintenance.

ABB guarantees 100% of compatibility of all Spare Parts that are going to replace the defective components of your equipment.

All Spare Parts are equipped with instruction sheets to enable a correct and safety assembly and are delivered in short times in order to fulfill customer's needs.

Life Cycle Management

Active standard development, production and sale.

Classic maintenance phase of the product: spare parts availability is guaranteed for replacing in existing plants.

Limited spare parts are available. The production of the CB's whole range is not guaranteed, and the technical support is limited.

Obsolete technical support is no more guaranteed. The production of the CB's whole range has ended but spare parts might be available. Retrofit solutions are available.

Service portfolio

Low voltage products division delivers a vast range of services to cover the whole product lifecycle. The services offered by ABB's low voltage products and systems span the entire value chain, from the moment a customer makes the first enquiry to disposal and recycling of the product. Throughout the value chain, ABB provides training, technical support and customized contracts. All of this is supported by one of the most extensive country sales and service network.

Installation and commissioning

ABB provides comprehensive installation and commissioning services to achieve a problem-free start up, by following installation and commissioning procedures. The use of service personnel from ABB LP service ensures that the switchgear is installed in a safe and correct way.

Operation and maintenance

ABB can guide the customer through a fast and efficient fault finding procedure as well as analyze the operation of the product and the customer's process. From site surveys to preventive, predictive maintenance and reconditioning, ABB has all the options covered to keep its customers' processes operational.

Upgrade and retrofits

An existing ABB product can often be upgraded to the latest software or hardware to improve the performance of the application. Existing processes can be economically modernized by upgrading with the latest technology.

Retrofits

Replacing old LV Switchgear of any make with ABB's latest versions can be done using the ABB special conversion kits which enable quick installation without structural modifications to the original compartment. In addition, complete "turnkey" solutions are available. Specific conversion kits have been developed in order to replace old components with new ones that can be found in the latest switchgears.

Replacement and Recycling

ABB can advise on the best replacement products while ensuring that the existing products are disposed of in a way that meets all local regulations.

Entire value chain services

The main services available throughout the entire value chain include:

Training and learning – Hands on

ABB LP service carries out training programs. Those trainings can be either general or bespoke and have the aim of providing the personnel in charge of management/maintenance with the necessary know-how to achieve an excellent level of operating ability in certain situations. The manager of an electrical site can find it convenient to have certain maintenance capabilities available within his own team.

The courses mainly cover:

- Operating equipment
- Maintenance principles
- Repairs for small faults

Technical support

At each stage of the value chain, an ABB expert is available to offer advice to keep the customer's process or plant operational.

Spare parts

Availability of original spare parts is essential for fast and efficient maintenance activities. This becomes even more critical when the product was produced some years ago and has components in it which are no longer in production. ABB LP service is the only one able to supply original and guaranteed spare parts. These can be easily selected and ordered through the authorized channel.

Maintenance contracts

In addition to the corrective maintenance of a faulty unit, which includes any type of emergency intervention, there is a complete preventive maintenance service package, ensuring those who manage the plant gain considerable advantages in terms of reliability, safety and reduction of costs. Also customized contracts can be devised between the customer and ABB. Depending on the severity of the intervention needed, it can often be done on-site by our skilled and experienced engineers and is a faster way of resolution. ABB LP service has an effective service network across the country and dedicated service workshops. For all your service requirements, contact our nearest Sales office.

Benefits of maintenance contracts

Materials

Technical material - SOC

Selected optimized coordination (SOC) tables
ABB provides coordination tables for the selection of low voltage equipment, specifically tested for starting and protecting IE3 motors in the SOC tool.

Essential, enhanced and advanced solutions as introduced in this brochure can be selected there. Product selection for different types of starting methods are available as well, including direct-on-line, star-delta and softstarters. Usage of coordination tables helps reduce the time for selection and design of solutions as well as the risk of unwanted downtime, e.g. caused by nuisance tripping. This provides protection and safety, further driving down the total cost of ownership.

Technical material - e-Configure

e-Configure is a product and application configuration tool for low voltage products and solutions that provides customers a quick and easy configuration process.

- Browse for products by categories, product code or description
- Retrieve product related information (specs, prices, availability)
- Select and configure products and accessories
- Create, modify and order the bill of material
- Re-order custom configured units

You can find e-Configure [here](#)

eMart

B2B & B2C Online Marketplace

Customers has easy access to purchase 10,000+ Residential and industrial products and solutions in one of the fastest growing e-commerce markets in the world.

This unique B2B & B2C platform is the first of its kind in the industry, owing to its dynamic, price transparent model. It aims to provide an equally fair and favorable experience to both ABB distributors and customers. ABB eMart also provides a dynamic model to empower our partners to set their own competitive pricing for the products they sell on the platform, while simultaneously providing customers with a choice of the best deals to suit their specific needs.

Warranty policy

ABB guarantees the supply according to the law. Upon expiration, the warranty expires even if the devices have not been operated for any reason. In the case of faults, as long as this does not depend on assembly errors by the customer or third parties, on incorrect use of the materials, lack of or incorrect maintenance, normal wear and tear, faults caused by inexperience or negligence by the purchaser or by transport, by the improper storage of the materials, or failure by the customer to adopt measures to reduce eventual dysfunction, overload with respect to the contractual limits, by unauthorized intervention, by tampering or action effected by the customer, to force majeure, ABB will, throughout the warranty period, repair or replace any defective part of supply free of charge, in the shortest possible time, at its premises. Where the repair cannot be executed at ABB premises, except as otherwise agreed, all the supplementary or relevant expenses shall be borne by the customer.

Repair or replacement will be executed only if the customer has performed all the obligations to that date. The customer may not suspend performance of the obligations in any case in which this warranty is invoked. The term for the repair or replacement of the faulty supply will be agreed by ABB and the customer. The shipment of any supply claimed to be faulty by the customer to ABB and subsequently by ABB to the customer, shall be at the risk and under the responsibility of the customer, who shall arrange adequate insurance coverage. The supply repaired or replaced is shipped at the expense and risk of the customer. Any dispute about a shipment has no effect on the remainder of the supply. The products replaced by ABB become the property of ABB.

General conditions of sale

Any claim regarding the supply, machinery, plant or components not compliant with the specifications or the contractual documentation must be raised in writing, within a maximum term of 8 days from delivery, when the time limit for action expires. In the case of systems, this term is 60 days from execution of the disputed service when the time limit for action expires.

In the case of latent defects, the terms indicated above run from the date of discovery. Once the warranty period has expired, claims are not accepted, even for latent defect. Where the claim is timely and justified, ABB's obligation is limited to replacement of the goods found not in compliance or repetition of execution of the non-compliant service, excluding all rights to the Customer to seek termination of the contract and/or compensation of damages.

With reference to the provision of spare parts, ABB reserves the right to provide materials either from the original supplier or from equivalent supplier.

Warranty period:

1. **Breakers & switches:** The warranty period is 12 months from the date of commissioning or 18 months from the date of ABB's invoice, whichever is earlier.
2. **Control products:** The warranty period is 12 months from the date of commissioning or 18 months from the date of ABB's invoice, whichever is earlier.
3. **Enclosures & DIN-Rail components:**
 - Components of SB200M and SDB200 will have 5 Years warranty from the date of ABB's invoice, if mounted inside the ABB Distribution boards. If non-ABB enclosure is used, Warranty period is 12 months from the date of commissioning or 18 months from the date of ABB's invoice, whichever is earlier.
 - All other range of products : 12 months from the date of commissioning or 18 months from the date of ABB's invoice, whichever earlier.

- If products are altered, dismantled, rectified or tampered. Warranty states is not company's entire liability. This does not extend to cover consequential losses or damage or installation cost arising from defective products. Since product improvement is a continuous process, the data furnished in this brochure may undergo revision. For the latest information, you may contact our nearest sales office.

4a. Wiring accessories:

- Standard Switches & Sockets (without LED Lamp) : 10 years from the date of ABB's invoice.
- Electronic Products (with LED Lamp) : 12 months from the date of commissioning or 24 months from the date of ABB's invoice, whichever earlier.
- ABB mounting boxes are not covered under warranty.
- If products are altered, dismantled, rectified or tampered. Warranty states is not company's entire liability. This does not extend to cover consequential losses or damage or installation cost arising from defective products. Since product improvement is a continuous process, the data furnished in this brochure may undergo revision. For the latest information, you may contact our nearest sales office.
