ABB PSR softstarters
24 Volt AC/DC one unit

The PSR softstarter is the most compact of all the softstarter ranges, thereby making it possible to design compact starting solutions. The system concept with Manual Motor Starters and the PSR provides a far more compact starting solution than conventional star delta starter configurations.

Built-in by-pass reduces the energy loss and makes the connection easier and with only three potentiometers, the set-up couldn't be simpler. The optimized ramping characteristics will ensure a very smooth start and stop for all applications.
