

ABB Repair-a-thon

Maximize your system's reliability while cutting your repair costs in half

Stay out of the shop and on the road. Ignore your vehicle's maintenance schedule and you will eventually end up stranded on the side of the road. Ignore the maintenance of your automation investment and suffer far more grave consequences such as unplanned downtime, lost production, and shortened system life. Inspect your spare parts, and let ABB perform a no obligation test on any questionable parts.

The road to reliability

There won't be a better time this year to have the ABB Repair Center test parts in an unknown condition, and repair if needed. Right now, each **qualified part repair service is half off** with the purchase of another repair of equal or greater value. The savings are applied instantly at the point of sale. Use the [ABB 'Repair in box'](#) for free boxes, prepaid shipping and to have the test fee waived.

Combine modules and tensioners, power supplies and controllers. Ensure the reliability of your automation systems and protect your investment from inconvenient breakdowns and expensive emergency repairs today.

How to take advantage of this offer

Call 800 HELP 365 (Option 2, Option 2 for parts repair)
