**PM 10 Compact**

- 10kA
- 5kA
- 1kV
- 275V
- 230V

**Notz**

1. 105°C
2. 45°C
3. 23°C

**Attention ! Hazardous voltage ! Installation by person with electrical expertise only**

**Safety Instructions**

The device may only be connected and installed by an electrically skilled person. National standards and safety regulations must be observed (IEC 60364-5-534...).

The device must be checked for external damage prior to installation. If any damage or other defects are detected in this check, the device must not be installed.

Its use is only permitted within the limits shown and stated in these installation instructions. The device and the equipment connected to can be destroyed by loads exceeding the values stated.

Opening or otherwise tampering with the device invalidates the warranty.

**Information on safety**

- All installation and mounting of the apparatus can only be performed by a qualified technician. Sensitive to the risk of injury or the risk of electric shock, the apparatus can only be installed in authorized areas.
- Before installation, the apparatus must be checked for external damage. In case of damage or other defects, the apparatus must not be installed.
- The use of the apparatus is only permitted within the limits shown and stated in these installation instructions. The apparatus and the equipment connected to it can be damaged by loads exceeding the values stated.
- Opening or otherwise tampering with the device invalidates the warranty.

**Indications of security**

- The connection and the mounting of the apparatus should only be carried out by a technically qualified person. National standards and safety regulations must be observed (IEC 60364-5-534...).
- Before installation, the apparatus must be checked for external damage. In case of damage or other defects, the apparatus must not be installed.
- The use of the apparatus is only permitted within the limits shown and stated in these installation instructions. The apparatus and the equipment connected to it can be damaged by loads exceeding the values stated.
- Opening or otherwise tampering with the device invalidates the warranty.

**Instructions for service and maintenance**

Service and maintenance work on the apparatus may only be carried out by a technically qualified person. National standards and safety regulations must be observed (IEC 60364-5-534...).

- Before service and maintenance work on the apparatus, the apparatus must be checked for external damage. In case of damage or other defects, the apparatus must not be serviced or maintained.
- The service and maintenance work on the apparatus is only permitted within the limits shown and stated in these service and maintenance instructions. The apparatus and the equipment connected to it can be damaged by loads exceeding the values stated.
- Opening or otherwise tampering with the device invalidates the warranty.

**Rules of technical safety**

- The apparatus must not be used for any other purpose than that stated in the instruction manual. Any use not specified in the instruction manual is dangerous and can result in damage to the apparatus and/or personal injury. Therefore, the apparatus must only be used as specified in the instruction manual.
- Service and maintenance work on the apparatus can only be carried out by a technically qualified person. National standards and safety regulations must be observed (IEC 60364-5-534...). Before service and maintenance work on the apparatus, the apparatus must be checked for external damage. In case of damage or other defects, the apparatus must not be serviced or maintained.
