Non-contact safety sensor

Eden

Eden is a non-contact safety sensor used as interlocking device for e.g. doors and safe position monitoring.

Eden consists of two parts: Adam and Eva. Adam senses the presence of Eva without mechanical contact and therefore without any wear. The compact size of Eden and its 360° mounting possibility make it easy to use in most applications.

Different models of Eden are available for different types of control modules. All Eden models make it very easy to reach PL e, often using fewer components than other solutions.

All Eden models have an IP67/IP69K sealing.

Continuous operation

Easier troubleshooting

Extensive LED indication and status information reduce downtime.

No wear, no mechanical breakage

Non-contact sensing means no mechanical wear and the large sensing tolerance gives a better tolerance to vibrations, resulting in fewer unwanted process stops.

Affordable range

Local reset function

The integrated reset function reduces the number of cables and PLC inputs.

PL e with fewer components

Series connection with PL e, local reset and DYNlink signal allow to considerably reduce the number of components needed to reach PL e.

Easy to install

Large mounting tolerance

A 360° mounting possibility with generous tolerances facilitates mounting.

Fast connection

M12 connectors, local reset and accessories speed up installation.
