### New ABB Training Vouchers, buy bulk and save...

ABB are always ready to support their customer's and in these uncertain times we can now offer training vouchers to help you maximise your training budget to the best possible advantage. With the introduction of this new training voucher scheme, you can buy courses in bulk at a reduced price to use over a 12 month period enabling you to plan your budget and schedule your courses, which can be booked on the production of a voucher. Please click on the link below for more information.

### ABB offers new training course

ABB Training has added a NEW 1 day course called **RobotStudio Online** which fully covers the online features of RobotStudio 5, which is part of the RobotStudio 5 suite and is in addition to their present 3 day RobotStudio 5 – Certified User course. This course covers all the online aspects of RobotStudio 5, from building, downloading and managing a robot operating system for IRC5 controllers. Other topics include file management; setting up users and passwords; creating and editing parameters and RAPID code, to name but a few. Please click on the link below to see a full course outline.

### On-site courses -

As an alternative to ABB's Scheduled Training courses here in Milton Keynes, perhaps an on-site course might be more suitable for your company and the individuals to be trained. This can be more cost effective than you probably think, especially if you are training a number of employees at a time where savings could be made on travel, accommodation and all those hidden costs.

**Please note ABB are also more than happy to tailor-make courses to suit your own requirements held either at Milton Keynes or on-site.**

As ever the invitation to visit our Training Centre at Milton Keynes is open to you, just give us a call and we will be pleased to show you around our superb facilities.

**For booking any of the above courses or for further information  
Please contact Sue Bond on 01908 350499 / 350309**

*The centre provides both customised and broad-based training on ABB robotic products, within an extremely comfortable, air-conditioned, learning environment*
