Commissioning
Professional startup for your drive

Optimize availability and performance of a new drive application with professional commissioning.

Ensured safety
The commissioning will be performed following local safety regulations and functional safety requirements. Safety related tests will be documented separately.

Cost awareness
An agreed scope of the commissioning will ensure efficient operation, energy savings and best value for money.

Operational reliability
Highly-qualified expert will perform the commissioning using the latest tools and instructions. Parameter adjustments based on application will ensure reliability.

Drive registration
Serial number based records of the commissioning and installation are stored in the ABB database. They are available later for maintenance support.

Check the service availability for your drive types with your local ABB representative.

Need help?
Contact ABB or third party channel company.

Your drive needs to be taken into use

Contact your local ABB

Optional Installation service
Drive installed at your site according to the manufacturer’s instructions.

Drive commissioning at your site
An ABB-certified engineer carries out the commissioning tasks according to the manufacturer’s instructions and local safety regulations. The drive is commissioned to optimize the performance of your application.

User guidance
During the commissioning work, the engineer can guide your personnel on the basic drive usage and explain the future maintenance actions. More extensive training is available separately as an option.

Drive registration
Your drive with its serial number is registered and commissioning information is recorded in the ABB database for later maintenance actions.

ABB commissioning report
ABB delivers you the commissioning report, including backup files and safety documentation.
