Product change notification
Sentry TSR20(M)

Change of default initial setting of the switch (1) for Off-delay time on TSR20 and TSR20M

The default initial setting for Off-delay time on the switch (1) has been 1.5 s (2) on Sentry TSR20 and TSR20M.

New default initial setting is 0.5 s (3) on the switch (1) on both models. The relays will automatically start up if the switch is unchanged and set on 0.5 s (3), when they receive power on the A1/A2 terminals.

Change date in production: 2020-07-06.

1. Switch for Off-delay time setting.
2. Setting 1.5 s (previous default setting)
3. Setting 0.5 s (new default initial setting)

The following procedure is required to change the setting from 0.5 s to 1.5 s:
1. Connect power to the A1/A2 terminals
2. Move the switch (1) to the “t 1.5 s” position (2)
3. Move the switch (1) back to the “t 0.5 s” position (3)
4. Move the switch (1) to the “t 1.5 s” position (2)
5. Power cycle (power off and on) the safety relay
