

# Extend drive lifetime without spiralling repair costs.

Keeping your plant, process or building running is the number one priority for the ABB services team. To help achieve around the clock uptime, ABB offers two services suitable for variable-speed drives: preventive maintenance [www.abb.com/drives](http://www.abb.com/drives) and [www.abb.com/drivespartners](http://www.abb.com/drivespartners)

and reconditioning. The benefits of these services include higher drive reliability, lower operational costs, improved productivity, extended drive lifetime and reduced environmental impact. To find out more, call ABB.
