Subject: Knox discontinuation

To whom it may concern,

We ABB, regret to inform that safety lock Knox is no longer possible to manufacture and will become obsolete by end of December 2018.

The reason behind the quick discontinuation is obsolete components; The Eden sensor that is integrated in Knox is no longer available and it has not been possible to replace it with any other safety sensor.

We sincerely apologize for any inconvenience and assure that we are doing everything we can to find a possible replacement solution.

Affected products are:

2TLA020105R2200 Knox 2A v2 Framepart, safelock
2TLA020105R2300 Knox 2X v2 Frame part, processlock
