### **ABB Group Annual Report 2003** Financial summary

# ABB at a glance

# Sharpening our focus on power and automation technologies

The Power Technologies division has merged two business areas into one to pursue productivity and efficiency gains. The former Distribution Transformers and Power Transformers business areas, which shared many locations, were merged to form a single Transformers business area. The merger should help reduce product overlaps, enable more efficient research and development, and improve supply chain management.

The Automation Technologies division has merged six business areas into three, also to increase productivity and cut costs. The former Control Platform and Enterprise Products, Paper, Minerals, Marine and Turbocharging, and Petroleum, Chemicals and Consumer business areas were combined to form one Process Automation business area. The former Drives and Motors and Low-Voltage Products and Instrumentation business areas were combined to form one Automation Products business area. And, lastly, the Robotics, Automotive and Manufacturing business area was renamed Manufacturing Automation.

The organizational changes took effect January 1, 2004.

ABB signed a final agreement to sell the upstream business in its Oil, Gas and Petrochemicals division to a consortium of equity investors, which is expected to be complete in 2004. The downstream business is also intended for divestment in 2004. Both are reported under Discontinued operations, which do not contribute to ABB's revenues and earnings before interest and taxes (EBIT), but are used in the calculation of net income.

## Power Technologies

ABB Power Technologies serves electric, gas and water utilities, as well as industrial and commercial customers, with a broad range of products, systems and services for power transmission, distribution and power plant automation.

#### **Business** areas

- Transformers
- Medium-Voltage Products
- High-Voltage Products
- Power Systems
- Utility Automation Systems

### **Automation Technologies**

ABB Automation Technologies blends a customerfocused product, service and system portfolio with end-user expertise and global presence to deliver solutions for measurement, control, motion, protection, and plant optimization across the full range of process, discrete and utility industries.

### **Business** areas

- Automation Products
- Manufacturing Automation
- Process Automation

### Other activities

### Discontinued operations

- Reinsurance
- Oil, Gas and Petrochemicals
- Asbestos
- Other divested businesses

#### Non-core activities

- Equity Ventures
- Remaining Structured Finance
- Building Systems
- New Ventures

### Corporate

- Headquarters/stewardship
- Research and development

See accompanying Notes to the Consolidated Financial Statements, available in the ABB Group Financial review 2003.

# Important information regarding the ABB 2003 Annual Report consolidated figures

During the second quarter of 2004, an internal inquiry uncovered an overstatement by the medium-voltage business in Italy of its earnings before interest and taxes (EBIT) of approximately \$70 million from the first quarter of 1998 through the first quarter of 2004. That corresponds to 1.4 percent of ABB's total reported consolidated EBIT during the period.

According to the company's initial review, the annual impact on EBIT over the period ranged between about \$2 million in 1998 to a maximum of some \$20 million in 2002.

ABB has stated it would take corrective action regarding its consolidated results for the period in question and intends to file an amended 2003 Annual Report on Form 20-F with the United States Securities and Exchange Commission later in 2004 with restated consolidated financial statements. Therefore, the accompanying financial statements should be read taking into account the impact of such overstatements on the results of operations and financial position.
