PRODUCT LIFE CYCLE STATEMENT

ACS6000 (Generation 2)

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Product subtypes concerned

ACS6000 (Generation 2)

Current life cycle status
The mentioned product subtype of ACS6000 drive is in Classic phase according to the ABB life cycle model outlined above since 01.01.2023.

Life cycle plan
The mentioned product subtype of ACS6000 drive will be transferred to the Limited life cycle phase 01.01.2033.

Product availability in Classic phase
The mentioned product subtype is not available for sale.

Recommended actions
In Classic life cycle phase complete life cycle services are available for the mentioned product subtype.

Maintenance recommendations are presented in the ACS6000 preventive maintenance schedule document.

ABB highly recommends combining the upgrade to the next generation control platform (“ACS6000 Modernized UCU-26” upgrade service) with the 10-year preventive maintenance. With the modernization the state-of-the-art control platform will be implemented that is used in current ACS6080 product and that has many benefits such as extended life cycle support, improved ARU robustness, reduced motor harmonics, extended portfolio for Service agreements.

After the modernization action the drive will again return into Active life cycle phase.
Service availability in Classic phase

ABB Motion OneCare agreements
Installation & Commissioning
Trainings (e-learnings, classroom, on-site, virtual)
Spare parts
Preventive Maintenance
Inspection and Diagnostics
On-site repair
