CP600-eCo, CP600 and CP600-Pro
Control panels
CP600-eCo, CP600 and CP600-Pro

Key features

Various options for tailor made HMI solutions:
- PB610 Panel Builder 600 HMI applications
- Visualization of AC500 web servers (V3)
- Mobile remote access to HMI applications
- PB610-R PC runtime for Windows platforms
- Drivers for integration into automation systems
- OPC UA client and server

CP600
- Brilliant display
- Aluminium enclosure
- Operating temperature: -20...+60 °C
- Three different screen sizes
- Usable as web panel

CP600-Pro
- Multi-touch
- Brilliant real glass screen
- Aluminium enclosure
- Fast ETH 10/100/1000
- Operating temperature: -20...+60 °C
- Five different screen sizes from 5" to 21.5"
- Usable as web panel

CP600-eCo
- Slim design for easy installation even in compact spaces
- Robust plastic enclosure
- Three different screen sizes
- CP610 usable as web panel
Visualization options

PB610 Panel Builder 600 in combination with the CP600 HMI platform provides flexible possibilities for visualization.

Your interface to the application
Whether you prefer to use your smart device anywhere, stand in front of a control panel at your application or want to inform yourself about an installation abroad e.g. via the cloud: CP600 platform control panels with PB610 Panel Builder 600 provide you with the free selection of how to get the information you need, let you operate your application easily and support the effective analysis of your processes.

Tailor-made for easy, intuitive operation
PB610 Panel Builder 600 supports the design of easy to use and reliable to operate graphical user interfaces for all control panels of the CP600 platform, mobile smart devices and notebooks. Standardized faceplates are easily realized by means of so called custom widgets and structured tags.

User management and cyber security
Configuration of users and user groups allows to define access rights and permissions for and from different devices and media according to your needs. Devices and software are regularly tested accordant latest known possible vulnerabilities.

Web panels
CP600 control panels with PB610 provide web servers for HTML5 based visualization on various users‘ devices. The majority of the control panels comes with a browser for using them for
• visualization of AC500 web server (V3)
• nearly unlimited information through general web access
• easy combination of PB610 user interface with information from the web.

Mobile / remote access to HMI
HTML5 based graphical user interfaces enable remote access and operation via mobile devices like smartphones, tablets etc.
PB610 Panel Builder 600

Engineering tool for easy design of tailor-made graphical user interfaces for the entire CP600 platform
PB610 Panel Builder 600 software is integrated in the ABB Ability™ Automation Builder engineering suite and can be downloaded via Automation Builder installer.

Tailor-made human machine interface (HMI)
- For the efficient design of flexible HMI applications in versatile automation solutions.
- Vector graphics (*.SVG) for precise, easily scalable and dynamic HMI design.
- Alpha blending for realistic transparency effects.

- Libraries including rich sets of widgets – ready-to-use graphical objects.
- Easy creation of customized widgets through the combination/modification of standard widgets.
- Customized widgets clearly arranged in user galleries.
- Page templates for professional design.
- Numerous configuration options for all HMI elements.
- Realization of customized functions and individual dynamic manipulation via Java Script with debugger.
- Easy data acquisition and trend presentation.
- Reliable user management and secure access control.
- Rich set of configurable features: dynamic objects, data acquisition, alarm handling, multi-language applications, recipes, ...
- HMI simulation for efficient commissioning.
- Numerous drivers for easy connection to e.g. PLCs, drives, robots.
- OPC UA client and server for future-orientated cloud connectivity and IoT.
- Gateway function for easy data exchange between different protocols and systems.
CP600-eCo, CP600 and CP600-Pro
Control panels at a glance ...

ABB offers a wide range of scalable PLCs and robust HMI control panels.

With comprehensive but easy-to-use functionalities, ABB control panels stand out from competitor products. At one single touch, they intuitively provide operators with tailor-made operational information for production plants and machines. CP600-eCo, CP600 and CP600-Pro control panels make machine operation efficient, predictable and user-friendly.

New comprehensive CP600 control panels platform for different applications
CP600-eCo, CP600, CP600-Pro
Wide range of control panel offerings in three assortments. Ideal choice for visualization of AC500 PLC platform automation solution.

The economical CP600-eCo control panel is aimed for standard functions and high usability for clear interaction with the operation process.

The robust CP600 HMI provides state-of-the-art performance, versatile communication and representative design for machines and systems.

The CP600-Pro HMI comes with high end visualization performance, multi-touch operation, versatile trendsetting communication and representative design.

Due to the good scalability between CP600-eCo, CP600 and CP600-Pro, CP600-eCo HMI applications can be re-used easily for CP600 or CP600-Pro control panels and vice versa.

PB610 Panel Builder 600
PB610 Panel Builder 600 is the engineering tool for the entire CP600 control panels platform. PB610 Panel Builder 600 software is integrated in the ABB Ability™ Automation Builder engineering suite. For integration into a couple of third party automation systems, drivers are available. OPC UA client and server support future-orientated communication solutions.

**CP600-eCo**  
Control panels

**Economic HMI range for basic applications**  
Control panels in three different screen sizes from 4.3” to 10.1” in ABB design or just black provide HMI functions typically required for basic applications. The engineering tool PB610 Panel Builder 600, part of Automation Builder, ensures easy scalability on the CP600 platform.

**Designed for basic applications**  
- The widescreens available in 4.3”, 7” and 10.1” are suitable for many applications.  
- Protocols for ABB PLCs, machinery and motion drives for Ethernet and serial connection make these control panels first choice for ABB automation solutions.  
- OPC UA client and server functions make them well prepared for future communication solutions.  
- Engineering by means of PB610 Panel Builder 600, part of Automation Builder, facilitates integration into automation packages and enables good scalability on the CP600 platform for different applications.

**Slim industrial design**  
The slim plastic enclosure in attractive industrial design with a mounting depth of 29 mm enables installation even in narrow spaces. All connectors are located on one side. Landscape and portrait mounting options provide installation flexibility and various HMI presentations. These devices are available either in ABB design or in black.

**State-of-the-art connectivity**  
- Ethernet interface 10/100 Mbit for easy connectivity to ABB automation components.  
- Flexible serial connectivity to automation components without Ethernet interface.  
- USB host for flexible data storage and easy updating.
The CP600 platform is many customers’ first choice for their individual visualization projects.
State-of-the-art HMI range for diverse applications
The CP600 control panels in screen sizes of 7”, 10.4” and 15” provide comprehensive HMI functions for a wide range of applications. The engineering tool PB610 Panel Builder 600, part of Automation Builder, ensures easy scalability on the CP600 platform. Same front dimensions, cutouts and screen resolutions support an easy replacement of former CP600 control panels.

Tailor-made for your needs
- Three different screen sizes with standard aspect ratio or widescreen from 7” to 15” are suitable for a lot of different applications.
- Protocols for ABB PLCs, machinery and motion drives for Ethernet and serial connection make these control panels first choice for ABB automation solutions. The IRC5 protocol enables easy direct communication with ABB robot controllers.
- OPC UA client and server functions make them well prepared for future communication solutions.
- Integrated chromium browser usable e.g. for AC500 V3 web visualization
- Engineering by means of PB610 Panel Builder 600, part of Automation Builder, facilitates integration into automation packages and enables good scalability of the CP600 platform for various applications.

Solid design, wide operating temperature range
The robust aluminum enclosure in attractive industrial design, providing all connectors on one side, enables installation in various environments. Wide operating temperature range from -20 up to +60 °C makes these panels suitable for even challenging environments. Landscape and portrait mounting options provide installation flexibility and various HMI presentations.

Various options for flexible connectivity and data storage
- 2 Ethernet interfaces 10/100 Mbit with configurable bridge mode for easy connectivity with ABB automation components.
- Flexible serial connectivity with automation components without Ethernet interface.
- USB hosts for the flexible connection of accessories or data storage and easy updating.
- Memory card slot for easy data storage and updating.
Benefits of the new CP600 generation

- Increased performance for applications of up to 150 MB
- Improved network capabilities: 2x ETH with different physical layers (PHY)
- Extended operating temperature: -20...+60 °C
- Increased brightness: 400 cd/m²
- Black, neutral front foils suitable for most applications
- Harmonized with CP600 platform:
  - Operation system LINUX
  - Enhanced features
- Three most requested screen sizes: 7", 10.4" and 15"
- Easy replacement of former CP600 devices

CP600 control panels are your interface to the application.
CP600-Pro
Control panels

Outstanding HMI range designed for challenging applications
Control panels in screen sizes from 5” to 21.5” provide comprehensive HMI functions with multi-touch operation for a wide range of applications. Real glass fronts and an increased operating temperature range of -20...+60 °C make them first choice even for harsh environments. The engineering tool PB610 Panel Builder 600, part of ABB Ability™ Automation Builder, ensures easy scalability on the CP600 platform.

Multi-touch control panels for high-end applications
- The portfolio includes five screen sizes from 5” to 21.5”, all widescreen, with multi-touch real glass screens for demanding high-end applications.
- The wide range of operating temperatures of -20...+60 °C makes them suitable for versatile applications and first choice for demanding ones.
- Protocols for ABB PLCs, machinery and motion drives for Ethernet and serial connection make these control panels preferred option for ABB automation solutions.
- OPC UA client and server functions make them well prepared for future communication solutions.
- Engineering by means of PB610 Panel Builder 600, part of Automation Builder, facilitates integration into automation packages and enables good scalability on the CP600 platform for versatile applications.

Real glass front and solid aluminum enclosure
CP600-Pro control panels have real glass fronts and robust aluminum enclosures in attractive industrial design, with all connectors located on one side, for installation in various even demanding environments. Landscape and portrait mounting options support installation flexibility for various HMI presentations.

Flexible connectivity and data storage with a view to the future
- Up to 3 Ethernet networks with different physical layers for easy connectivity to ABB automation components for upcoming networking concepts.
- Flexible serial connectivity to automation components without Ethernet interface.
- USB hosts for connecting printers and accessories, data storage and updating.
- Memory card slot for easy data storage and updating.
The CP600-Pro control panels (7"... 15") can also be used to trigger safety actions in combination with AC500-S.
