Introduction
The KSONIK III is an Ultrasonic Level Transmitter capable of measuring two separate levels in liquid or solid applications up to 195 ft./60 meters, or flow rates in all types of open channel flow applications. The unit is available with two 4-20 mADC analog and five relay outputs. A system can consist of up to two transducers and a single transmitter with the transducer(s) installed at the top of a silo or tank, facing down towards the material being measured.

The transmitter’s microprocessor simultaneously fires an electronic pulse to the transducer and starts a timer. The transducer converts this electronic pulse to an acoustic pulse, which is directed toward the surface of the material being measured. When the acoustic pulse contacts the surface of the material, energy is reflected back to the transducer, which converts this reflected energy back to an electronic pulse. This pulse is sent back to the microprocessor, which stops the timer and determines the “time of flight” of the signal. By combining the speed of sound through air and the “time of flight” of the pulse, the microprocessor accurately determines the level of the product. Powerful software removes false echoes from the signal and electronic filters remove ambient noise.

Features
- Long range up to 195 ft./60 m
- Graphic LCD display
- Single or dual channel configuration
- 5 configurable relays/8 amp
- Pump cycling & pump monitoring
- Remote totalizer count outputs
- Configurable as a single or dual open channel flow meter
- Differential level measurement
- Integrated analytical KSCOPE software
- Automatic variable gain & power for difficult applications

Applications
- Great for sumps or lift stations with up to five pumps
- Cost effective level measurement for multiple silo applications
- Versatile: short or long range liquid or dusty solids applications
- Open channel flow measurement in the following configurations: v-notch, flumes or weirs

Options
- Transducers for liquids, solids & corrosive liquids
- Windows based configuration software
- Aiming kit

ORDERING INFORMATION

KSIII/a/b
/a Power Supply
2 120 VAC and 220 VAC
/b Instrument Type
S Single Channel
D Dual Channel

Ordering Notes:
1. Transmitter, Transducer(s) & Accessories must be ordered separately.
2. The listed transducers below are compatible with the KSONIK III transmitter
3. For a dual transmitter type (/D), identical transducers must be used with the KSONIK III

TRANSDUCERS
(order separately; refer to Transducer Data Sheet DS/TRANSDUCERS-EN for complete details)

Note: All transducers are supplied with 16 ft./5 m cable lengths. For temperature compensation add “C”.

AVAILABLE ACCESSORIES

AKIT  Aiming Kit (304 SS Mounting & Clamping Plates)
KSCOPE  KSONIK Scope Software
EXT-CABxxx  Transducer cable length is available up to 328 ft./100 m. If customer requirement is greater than 16 ft./5 m standard length, then specify total cable length in feet (xxx).
**AC Wiring Connections**

**KSONIK III Ultrasonic Level Transmitter**

**DIMENSIONS**

- 7.28 in / 185 mm
- 7.80 in / 198 mm
- 2.28 in / 58 mm
- 1.18 in / 30 mm
- 0.51 in / 13 mm
- 0.39 in / 10 mm

**MOUNTING RECOMMENDATIONS**

**Solids Installation Recommendations**
Aiming Kit is recommended to aim at middle of silo. This helps to get the maximum return echo.

**Liquids Installation Recommendations**
Avoid installations where vessel obstructions or fill lines interfere with beam path.
