## Box support AS101

The most efficient and fastest solution for concrete elements on the market

Thanks to its innovative solution, it is the most efficient and fastest solution on the market.

Box support AS101 is used at concrete element factories with casting tables when installing mounting boxes or junction boxes into the upper side of the element.

### Made from 100% recycled plastic

Box supports are made from plastic packaging collected from households (post consumer plastic waste).

### Benefits and features

#### Most efficient and fastest solution on the market

Time saving in element preparation work compared to old solution (tuning with wire and wooden planks- lot of time and effort).

#### Reliable

In general, the concrete mass can easily push the box up or out of place during concrete casting. With the AS101 box support, the strong construction ensures that the product does not move during concrete casting.

#### No tools required

Mounting boxes can be attached to the box support quickly and simply by snap fit function.

#### Environmentally friendly

The Box support is 100% recycled plastic. Locally collected and produced.

# Assembling

**The support is assembled from two AS101 plastic parts.**

The top one is equipped with the box (compatible with most boxes in the market). Mounting boxes can be simply attached to the box support by snap fit. Box support also has several holes for connecting boxes with screws or metal wire, if snap fits cannot be used.

The bottom part is fixed to the casting table with threaded bushing magnet (vemo magnet). The magnet is fastened to the box support by screwing with hexagon wrench.

Bushing magnet

## Rebars

The plastic parts are connected to each other's with two rebars, either Ø10 or Ø8 mm.

The length of the rebars is dependent on the thickness of the element and the box used (separate chart for dimensioning can be found in installation instruction).

## Order information

Type	Product ID	EAN	Description	Package size
AS101	2TKA00004251	6438199008257	Box support for concrete elements	60 pcs
