Subject: 600A Multi-point Junctions and Straight Receptacle manufacturing location transfer

Dear Valued Customer,

As part of our quality and service improvement projects, the manufacturing of 600A Multipoint Junctions and Straight Receptacle will be transferred to the Albuquerque, NM facility from the Hackettstown, NJ facility in May 2019.

Reference product families included in this move:

- Multi-point junctions (ie, J5 - - - -25-sv)
 - o J2, J3, J4, J5, J6
 - o 15, 25/28 and 35kV
 - o 4" and 6 ½" interface spacing
- 600 Series Straight Receptacles (25/28 and 35kV)
 - o K655/656SR-W0X, K655/656DSR-W0X
 - o K655/656YSR-W0X
 - o M655/656YSR-W0X, M656/565YDSR-W0X

The Albuquerque facility has excellent competencies in rubber molding cable accessory products as evidenced by over 40 years' experience producing 200A separable connectors, splices, terminations, 600A ETP & LRTPs, arresters, and other products. The Hackettstown facility will continue to produce and supply 600A separable connectors and other cable accessory products.

The product design, manufacturing processes, and catalog numbers will remain unchanged. Both facilities will maintain our high-quality standards while Albuquerque will bring on line new production equipment expected to generate improvements in lead times for these products which will be the subject of a separate announcement.

Please consult your local sales representative with any questions or concerns.

Regards,

Guillermo Cruz
