## Compliance with standards and technical characteristics – Gemini

### Reference Standards

Standard IEC 62208 ("Empty enclosures for low voltage switch-gear and control gear assemblies. General requirements"), that has implemented at an international level the Standard EN 50298, presently EN 62208, is the prescriptive reference for Gemini switchboards.

The object of Standard CEI EN 50298 is to formulate definitions, classifications, characteristics and test prescriptions for cases designed to be used as part of protection and operating equipment (switchboards) in compliance with the Standards of the EN 61439 series, that have a maximum rated voltage of 1000 V in alternating current for maximum frequencies of 1000 Hz or 1500 V in direct current and are suitable for general use in both internal and external applications.

The Standard applies to empty enclosures, before the user has installed protection and operating devices inside them. The Standard does not apply to enclosures with structural and functional characteristics that make them subject to other prescriptions (e.g. cases for domestic installations and the like). In this case Standards IEC 60670 – CEI 23-48 ("General requirements for enclosures for accessories for household and similar fixed electrical installations") and CEI 23-49 ("Enclosures for accessories for household and similar fixed electrical installations. Part 2: particular requirements for enclosures for protection devices and accessories dissipating a considerable power in normal use") apply. On the basis of the indications of the ABB SACE technical characteristics' table, the installer may have to certify compliance with Standards CEI 23-51 – EN 61439 – CEI 17-13-1 ("Part 1: standard equipment subject")

- Max. dispersible power with over-temperature of 40 °C	62 W	100 W	118 W	143 W	221 W	355 W
<b>Impulse withstand (par. 8.2.2)</b>						
- Rated service voltage <sup>(4)</sup>	≤ 800 V					
- Rated impulse withstand voltage	8 kV					

<sup>(1)</sup> Limits of applicability of the standard CEI 23-51

The standard may be applied only when the wired switchboard meets all the following conditions:

- fixed installation with average ambient temperature up to 25 °C, occasionally up to 35 °C;
- alternate current with rated voltage up to 440 V;
- input rated current up to 125 A;

- assumed short circuit rated current up to 10 kA or liming current devices protection with limited current up to 15 kA at their rated breaking capacity.

<sup>(2)</sup> Maximum dissipation power data was obtained following the indications of Standard CEI 23-49, with a temperature difference of Dt=30 °C.

<sup>(3)</sup> Note to paragraph 8.2.1 of Standard CEI EN 61439-1

The table gives the thermal dissipation values of Gemini switchboards when they are wall-mounted. The dispersible power figures (in Watts) vary according to the overtemperature allowed in the accessible parts of the switchboard and must be compared with the total amount of power dissipated by all the components installed inside the switchboard taking into account the factor of contemporaneity.

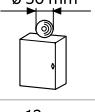

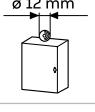

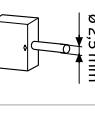

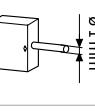

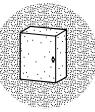

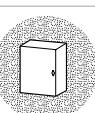

<sup>(4)</sup> Rated service voltage according to CEI EN 61439-1 1000V AC and 1500V DC

## Automation boards - technical details

### IP degree of protection – Gemini

As indicated in the following table, the IP degree of protection is expressed by two characteristic numbers depending on the behavior of the product to which it refers according to the prescriptions of CEI 70-1 and IEC 529 Standards.

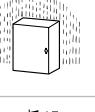

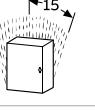

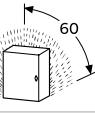

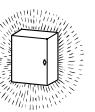

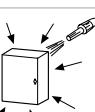

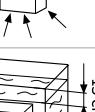

#### First number: protection against the penetration of solid bodies

IP	
0	No protection
1	 Protection against the penetration of solid bodies with a diameter of over 50mm
2	 Protection against the penetration of solid bodies with a diameter of over 12 mm or a length of over 80 mm
3	 Protection against the penetration of solid bodies with a diameter or thickness of over 2,5 mm
4	 Protection against the penetration of solid bodies with a diameter or thickness of over 1,0 mm
5	 Protection against the penetration of dusts
6	 Total protection against the penetration of dusts

1<sup>st</sup> number defined by Standards CEI 70-1 – IEC 60529

With IP66 degree of protection, Gemini switchboards are totally protected against the penetration of dusts and sprays of seawater.

#### Second number: protection against the penetration of water

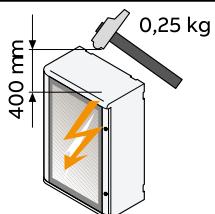

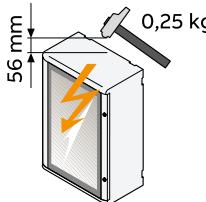

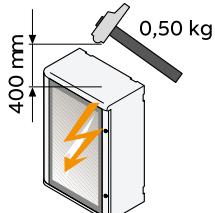

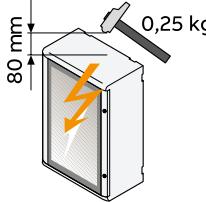

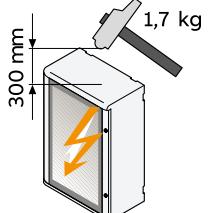

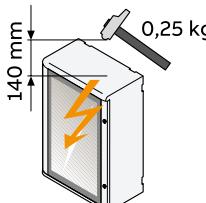

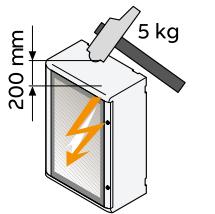

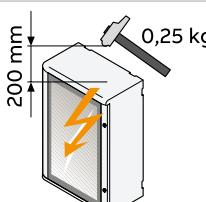

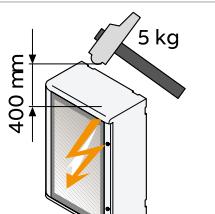

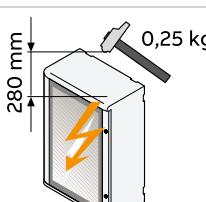

IP	
0	No protection
1	 Protection against the penetration of drops of water falling vertically
2	 Protection against the penetration of drops of water falling at an angle of up to 15° from vertical
3	 Protection against the penetration of drops of water falling at an angle of up to 60° from vertical
4	 Protection against the penetration of splashes of water from all directions
5	 Protection against the penetration of water sprayed by a hose from all directions
6	 Protection against the penetration of sea water
7	 Protection against the penetration of water during temporary immersion
8	Protection against the penetration of water during continual immersion

2<sup>nd</sup> number defined by Standards CEI 70-1 - IEC 60529.

## Automation boards - technical details

IK degree of resistance to impacts – Gemini

The IK degree is expressed in Joules in compliance with Standard CEI EN 50102.

<b>IK 0</b>		No protection against impacts	<b>IK 06</b>		Resistance to impacts with impact energy up to 1,00 J
<b>IK 01</b>		Resistance to impacts with impact energy up to 0,150 J	<b>IK 07</b>		Resistance to impacts with impact energy up to 2,00 J
<b>IK 02</b>		Resistance to impacts with impact energy up to 0,200 J	<b>IK 08</b>		Resistance to impacts with impact energy up to 5,00 J
<b>IK 03</b>		Resistance to impacts with impact energy up to 0,350 J	<b>IK 09</b>		Resistance to impacts with impact energy up to 10,00 J
<b>IK 04</b>		Resistance to impacts with impact energy up to 0,500 J	<b>IK 10</b>		Resistance to impacts with impact energy up to 20,00 J
<b>IK 05</b>		Resistance to impacts with impact energy up to 0,700 J

Double insulation and self-extinguishing tests – Gemini

### Double insulation

Double insulation guarantees that Gemini is protected against indirect contacts on condition that the manufacturer's instructions are observed when carrying out mounting

and wiring operations on the switchboard and that the appropriate accessories are used (e.g. screw-cover caps). Double insulation is indicated by the graphic symbol 

### Self-extinguishing tests

Test text	Equipment required	Compliance with Standards	Purpose	Test results of the test	Test conditions		
					Heat source	Test period	Characteristic elements
Glow-wire test		IEC 695-2-1 CEI 50-11	To assess the danger of fire by simulating thermal stresses produced by heat sources or by ignition (e.g. glowing elements, resistances overloaded for short intervals)	If a flame is generated, it must go out within 30 seconds of removing the glow wire.  The test is conducted at temperatures of: - 650 °C - 750 °C - 850 °C - 960 °C	Glow wire ø 4 mm	30 sec.	Assessment of the time it takes for the flame to go out

## Automation boards - technical details

### Resistance to chemical agents – Gemini

#### Resistance to chemical agents

The behavior of Gemini switchboards in the presence of chemical agents is indicated in the table with the symbols:

Cold water	■
Hot water	■
Sulfuric acid 50%	■
Hydrochloric acid 36%	■
Acetic acid 60%	■
Benzol	▲
Gasoline	▲
Acetone	■
Ethyl alcohol	■
Ammonia	■
Dichloromethane	▲
Diesel oil - naphtha	▲
Mineral oils and greases	■
Food oils and greases	■
Perchloroethylene	▲
Trichlorethane	▲

Integration with ABB products – Gemini

### Installation of Tmax XT moulded-case circuit breakers

The table indicates the type of installation required for the different versions of Tmax XT moulded-case circuit breakers in Gemini switchboards.

Before carrying out wiring operations check compliance with Standards on the basis of the technical characteristics of the switchboard and circuit breaker (CEI EN 60439-1).

### Disposal instructions

#### Information about how to dispose of Gemini switchboards when they reach the end of their life

Instructions are given below about the procedures to adopt when disposing of Gemini switchboards at the end of their life cycle.

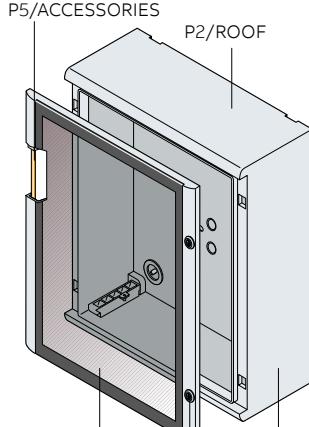

The text is drafted in the form of a table referring to Standard CEI 308-1 "Information table concerning the end of life of electric and electronic products and a compilation guide", 2002 -04, ed. 1, pamphlet number 308-1 6454.

### Section I – Global product specification

Name	Type of product			External dimensions WxHxD (mm)
Size	With transparent door	With opaque door	Rated weight (kg)	
1	1SL0211A00	1SL0201A00	4,3	335x400x210
2	1SL0212A00	1SL0202A00	7,9	460x550x260
3	1SL0213A00	1SL0203A00	9,5	460x700x260
4	1SL0214A00	1SL0204A00	12,0	590x700x260
5	1SL0215A00	1SL0205A00	17,8	590x855x360
6	1SL0216A00	1SL0206A00	21,1	840x1005x360

### Section II – Global product table

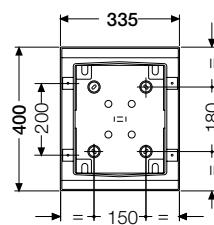

General code: CER 17 02 03 plastic (more than 95% of the product's weight)

Part (P1, P2 ecc.)/ Component number	Diagram	Quantity % over total weight	Material description	Symbol	Dangerousness (Yes/No)	CER code
P1/BOX		~ 80%	Polypropylene	No 	No	17 02 03
P2/ROOF			Polycarbonate	No 	No	17 02 03
P3/DOOR		~ 20%	Steel	No 	No	17 04 05
P4/ACCESSORIES		< 5%	Brass	-	No	17 04 01
P5/ACCESSORIES		< 5%	Polypropylene	-	No	17 02 03

71,5	84	96,5	109	121,5	134	
71,5	84	96,5	109	121,5	134	
71,5	84	96,5	109	121,5	134	
71,5	84	96,5	109	121,5	134	
71,5	84	96,5	109	121,5	134	

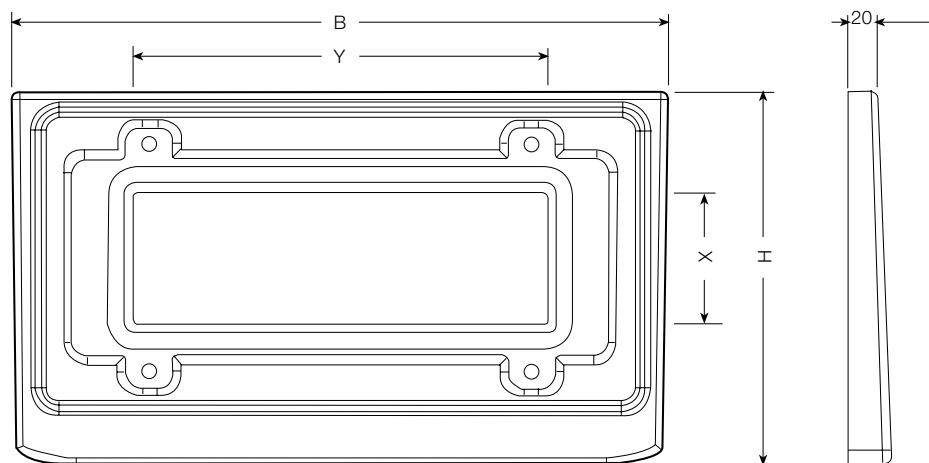

d = distance drilled panel/plate						
pos. 1	pos. 2	pos. 3	pos. 4	pos. 5	pos. 6	
54,7	67,2	79,7	92,2	-	-	
54,7	67,2	79,7	92,2	104,7	117,2	
54,7	67,2	79,7	92,2	104,7	117,2	
54,7	67,2	79,7	92,2	104,7	117,2	
54,7	67,2	79,7	92,2	104,7	117,2	
54,7	67,2	79,7	92,2	104,7	117,2	

The distance of the panels from the modular plates depends on the depth at which the DIN rail is regulated by using fixing devices.
