DIMENSIONS IN INCHES

DURING THE INITIAL INSTALLATION PLACE 0.0787" SHIMS UNDER THE FEET OF THE MOTOR.
The customer is responsible for the design and construction of the foundation.
It shall be sufficiently rigid to withstand short circuit forces. To avoid resonance
vibrations, the foundation shall be designed so that the natural frequency
of foundation together with machine is not within ±20% of running speed frequency.
The customer is also responsible for lateral and torsional critical speed analysis of
the complete installation.
