PRODUCT PRESENTATION, 2018

RB1000i Series Presentation

ABB Ability™ Connected Atomizer

Carrie Zou – Global Product Manager - Paint

Content

- First in class in terms of performance
- Target customer & markets
- Customer merit
- Data sheet

First in class in terms of performance

Key features and benefits

- Modular concept – easy to maintain
- Better pattern control for higher T.E.
- Longer life time of parts
- Low contamination
- Reduced energy consumption
- Easy to maintain
- Less weight
- MTTR improvement

First in class in terms of performance

Smart thanks to the multiple sensors

- RFID for all critical parts checked at application
 - Individual follow-up of components
 - The right part in the right condition with the right parameters for the perfect application
- Vibration sensors
 - Gyroscope
 - Temperature
- Modular embedded sensor

New technology

Sensor and RFID

- **IoT (Internet of Things) - the first function in the coating industry**
 - RFID (Radio Frequency ID) equipped
 - Vibration and gyroscope sensors equipped
- **Air motor shaft lock function**

First in class in terms of performance

Improvement on performance

- RFID
 - Bell cup
 - SA nozzle
 - Air motor
- Vibration, gyro sensor
- Air motor shaft lock

Differentiated value proposition

ABB Ability™

Improvement on performance

- RFID
 - Bell cup
 - SA nozzle
 - Air motor
- **Vibration, gyro sensor**
- Air motor shaft lock

Target customer& markets

RB1000i

Multiple sensors

Customer merit

Modular design concept

Customer Merit

Improved conventional atomizer performance + IoT function

Atomizer

- Modular concept, common spare parts
- Light weight 8.7kg
- BOC (Bell Outside Cleaning)
- SFC (SA nozzle Face Cleaning)
- Super pattern control
- 6 bar air pressure motor
- Paint waste 6.7cc inside atomizer
- Bell cleaning 25cc / 1.5sec
- Built-in FO cable
- 1-step Bell cup removal
- Robust and long life Air Motor
- Quick valve replacement
- Zone 1 certification

ABB Ability

- Identification of parts number
- Before production;
- Confirmation of right bell cup, air motor, SA at right place;
- Genuine parts identification;
- Parts Life Management;
- Predictive maintenance;
- Smart diagnostic;

Customer Merit

BOC - Bell Outside Cleaning & SFC - SA nozzle Face Cleaning

Items

- BOC & SFC

Merit

- Keep clean, keep good quality
- Less maintenance cycle

Customer Merit

BOC - Bell Outside Cleaning & SFC - SA nozzle Face Cleaning

- Clean the following 3 parts simultaneously
 - Bell cup front surface
 - Bell cup outside (BOC; Bell Outside Cleaning)
 - SA nozzle face (SFC; SA nozzle Face Cleaning)
- Contaminate the bell cup intentionally and demonstrate the cleaning

Customer Merit

BOC - Bell Outside Cleaning & SFC - SA nozzle Face Cleaning

Cleaning conditions: Flushing solvent flow rate: 1000 cc/min, Flushing time: 1.0 sec, Usage: approx. 17 cc

Customer Merit

Merit

- Less over spray, less paint waste
- Reduce paint usage
- Less booth cleaning
- Less contamination

- Spray both interior & exterior car body available by D40mm

Items

- Super Pattern Control: Large pattern
- 40mm Bell cup
 - Effective pattern size: 400 mm
 - 70mm Bell cup
 - Effective pattern size: 500 mm

Items

- Super Pattern Control: Small pattern
- 40mm Bell cup
 - Effective pattern size: 60 mm
 - 70mm Bell cup
 - Effective pattern size: 250 mm

Customer Merit

Items

- Built-in FO cable & Mixer

FO cable

Mixer

Merit

- Less damage risk of Fiber cable by solvent
- Easy rotation adjustment
- Less paint stuck risk, shorter mixing area
- Less cleaning time and flushing solvent consumption
- Easy replace mixer

Customer Merit

Items

- 1-step Bell cup removal

Shaft Locking Cylinder

Merit

- Quick removal bell cup (1 min.)
- No tool required to remove bell cup
- Safety by interlock, no risk touch rotated bell cup

Customer Merit

Items

- Quick valve & Mixer replacement

Merit

- 2 minutes valve replacement
- Mixer replace without disassemble air motor
- Quick recovery
- Easy maintenance

Customer Merit

Items

- IoT
 - RFID (Radio Frequency Identification)

Merit

- Easy; parts management
- Alarm; incorrect parts assembly
- RFID Parts
 - Bell cup
 - SA nozzle
 - Air turbine

Customer Merit

Items

- IoT
 - Sensor (option)

Merit

- Gyro
- Vibration
- Detect; unbalance of bell cup
- Detect; damaged air motor
- Detect; gyro speed (considering air motor damage)

Data Sheet

Specification

Bell cup			φ70(BOC), φ40(BOC)
Shaping air nozzle	Function		Super pattern control function SA nozzle face cleaning (SFC) function
	Effective spray pattern width	φ70	250~500mm
φ40		60~400mm	
High voltage	Charging type		Internal charge
	Voltage applied		Max. -90 kV
	HV current		Max. 150 μA
Rotation speed	Set rotation speed		Max. 60,000 rpm
Weight ^{*01}			Approx. 8.8~9.0 kg
Total air consumption ^{*02}		φ70	695~1565 NI/min
Flow rate ^{*03*04}	Paint	φ70	100~1000 cc/min
Sensor ^{*05}			Vibration sensor
			Gyroscope
			Temperature sensor
RFID tag ^{*06}			Bell cup
			SA nozzle
			Air bearing motor

*01 The weight differs depending on the specification

*02 These are the values when the flow rate is 400 cc/min. For other conditions or details, please contact ABB.

*03 The maximum flow rate differs depending on paint viscosity or built-in paint tube

*04 These are general values and do not necessarily guarantee quality.

*05 The sensor is optional

*06 A reader of the RFID tags is optional

RB1000i – connected atomizer for ABB Ability

Will help you secure high paint quality and uptime
