Honeywell

_____

This will help you to get information's about device Interoperability Testing.

Device & Its DD Information	For detailed information about the device and DD e.g. Device type, Model, Dev & DD version, CFF Details, Firmware Revision etc refer below link: https://www.fieldcommgroup.org/registered-products/e3bdb882-37b8-e811-8158-e0071b66cfe1
Host Name	Honeywell ExperionPKS
Release /Version	R500.2
FIM Info	FIM 4
Tested by	JAGADEESH S
Date	10-Oct-2019

Note and Tips:

1. For observation & issues refer ''Notes and Issues" Section.

2. For Configuration of Transducer Block Parameters & its Values, User needs to refer Device Configuration Manual/ Contact Device Vendor to get more information about Vendor Specific Parameters.

3. For Conditional related Parameters, i.e., For Parameters value listed as Uninitialized, user need to enter proper cross reference parameters to get values exposed. Refer User Manuals or contact device vendor for setting cross Reference values for device Parameters.
