COURSE DESCRIPTION

CHH652 – System 800xA Applications for Minerals Operation

Course goal
The goal of this course is to learn the operation of the Extended Automation System 800xA with AC800M controllers and Minerals Library for minerals applications.

Main learning objectives
The participants will be able to:
- Explain the basic architecture of the System 800xA and the function of the different components
- Understand the signal- and data flow through the system
- Log on into the system
- Utilize the operator workplace
- Explain the basic functionality of graphic displays and faceplates
- Navigate in display structures
- Monitor and control the process objects of the plant
- Monitor the event and alarm lists and acknowledge alarms
- Use trend displays and analyze trend traces
- Use the BMI minerals search tool

Topics
- Basic architecture of the System 800xA
- System components and terminology
- Signal- and data flow
- Logon into the system
- Operator interface – operator workplace
- Engineering workplace – Plant Explorer
- Graphic displays
- Display navigation
- Object selection – faceplates
- Operation of
  - Basic objects
  - Consumer objects
  - Group objects
  - Loop objects
- Event- and alarm handling
- Historical data collection and trend displays

Participant profile
This training is targeted to operators controlling and supervising the plant.

Prerequisites
No special knowledge is required. Basic knowledge of personal computers is helpful.

Course type and methods
This is an instructor-led course with lectures, demonstrations, interactive discussions and practical exercises.

Duration
The duration is 2 days:
- 8 hours daily for face-to-face classes
- 5 hours daily for remote sessions

Remarks
This course can be delivered at our Learning Center in Switzerland, at your site or as a remote session.

**Time (face-to-face class)**
- Day 1: 9:00 am – 5:00 pm
- Day 2: 9:00 am – 5:00 pm

**Time (remote session)**
- Day 1: to be defined
- Day 2: to be defined
