

This document is intended to describe some general features of the e-learning program for the **Authorization process Level 1 Service** and how it is possible for students to enroll and attend it.

The program for the Authorization process Level 1 Service is composed of 4 e-learning courses plus a final test, as follows:

- F300e - Tmax circuit breakers**
- F310e - Emax circuit breakers**
- F311e - Emax DC circuit breakers.**
- F312e - Emax X1 circuit breakers**
- F316e - Authorization process L1 Service final test**

The delivery platform for this program is the ABB University Learning Management System (LMS) called Training Partner. ABB personnel who wish to attend the e-learning program for the Authorization process Level 1 Service can apply online through the Training Partner Online, kindly following these illustrated steps.

To get access to Training Partner Online, please go to the e-learning site:

## Welcome to Training Partner Online

Please enter your user name and password

If you do not have a password you may [enter](#) yourself now.  
If you have forgotten your password we may [e-mail](#) it to you.

**Login**

User Name:

Password:

In the case the students had already registered themselves, they may login using their **User Name** (the ABB e-mail address) and **Password** (if Password is forgotten, it can be sent by e-mail, clicking on the dedicated [e-mail](#) link).

Otherwise, by clicking the [enter](#) link, the student can register himself (see below).

Students have to fill in the registration form. In the “E-Mail” field, the correct choice is the ABB e-mail address. The registration will be successfully carried out, if a person with the same ABB e-mail address exists in the system. The student will then receive an automatic e-mail from Training Partner Support including login information, User Name and Password.

This window appears after the login to the system. Some previous courses can be present.

**Authorization process e-learning level 1 Service**

**Details**

Name: Authorization process e-learning level 1 Service  
 Code:  
 Type: Service

**Description**

The authorization process L1 Service is an e-learning training program structured in 5 parts (4 courses about Tmax, Emax, Emax X1 and Emax DC plus a final test) and will require approximately 12 to 16 hours to be completed.

To pass this e-learning program, you need to score more than 70% for each individual course.

The purpose of e-learning is basically to offer via the web consistent training opportunities, in an easy and inexpensive way, in order to considerably increase the knowledge level within ABB personnel, channel partners and end customers.

This is one of the alternative objectives to be met under level 1 authorization process and is a prerequisite to participate to level 2 training.

BEFORE STARTING, IT IS STRICTLY MANDATORY TO REGISTER TO:

Every e-learning course regards a single topic and is structured on a series of e-learning modules; basically 2 different kinds of modules are available:

- narrated virtual lectures, based on Power Point slides, with the voice of a speaker in English language;
- test modules (Test you knowledge), comprising a set of questions (kinds of question types are true-false, multiple-choice and drag & drop), suitable to permit the student to check his learning.

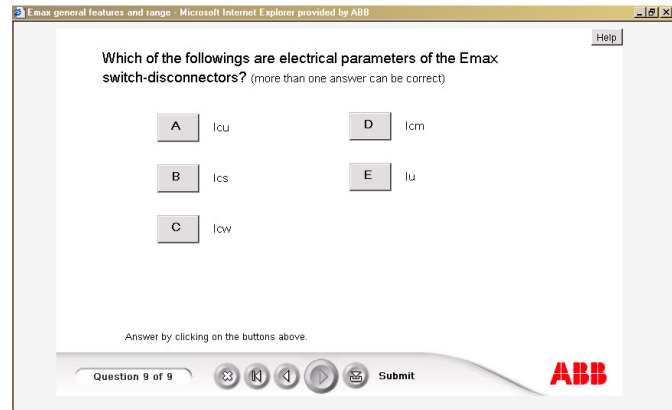

The content of each module is loaded by clicking the name of the unit itself. If a window does not open in your view, kindly allow pop up windows in your browser settings.

This is an example of a lectured module. If needed, the presenter’s speech can be seen as text on the left side.

This is an example of a testing module (“Test your knowledge” unit).

It is necessary to choose the correct answer and click the push-buttons to go through the questions.

The test modules make available a **Total score** as a result; then it is possible to review the answers. After pressing Exit and have closed the window, the results are updated in the learning management system. This score can be reset only by the system administrator and is not binding on the continuation of the course.

Note: kindly bear in mind that once you have opened the test you must finish it.

To complete each course, it is necessary to pass the relevant **final exam**; the score of this last module must be higher than 70%.

To complete the whole program, it is necessary to pass the **Authorization process L1 Service final test**; also this score must be higher than 70%.
