Plug and play microgrid for mature and emerging markets
Modular, scalable and containerized solution for fast deployment

Cloud-based remote service system to manage operations and maintenance

Integration of renewables

Benefits

Uninterrupted power supply
- seamless transition between grid connection and islanded mode

Reliable power
- stabilizing frequency and voltage when using 100% renewables

Reduced operational costs
- reduction of fossil fuel consumption and/or electricity bills* 

*if grid-connected

Remote Communities
Plug & Play Microgrid: Hybrid

Industrial/Commercial Operations, Defense, Institutions & Campuses
Plug & Play Microgrid: Station, Integrated or Stand Alone

Urban Communities
Plug & Play Microgrid: Integrated or Stand Alone

ABB
