

## Maximum freedom thanks to the most modern technology

Creating a perfectly lit atmosphere at the click of a button has never been easier, thanks to ABB's new Friends of Hue smart switch.

You can position the switch in any part of the room yourself. This is made possible because the smart switch does not require a power supply connection for switching and dimming your Philips Hue lights. A mere press of the button is sufficient for the energy required to operate the maintenance-free smart switch. Thanks to the battery free innovative Zigbee-Mesh technology without battery you also experience maximum safety.

Enjoy complete freedom and colourful light scenes with the Friends of Hue smart switch.

- Smart light switches for switching/dimming of Philips Hue lamps
- Requires Philips Hue Bridge v2 (square shape) and the latest Philips Hue app (v3.2 or later)
- Recall individual light scenes
- Control of a maximum of 50 lamps/25 friends of Hue switches
- Maximum reliability due to Zigbee Mesh technology
- Battery-free technology
- Zigbee green power, radio frequency 2.4 GHz
- Place an extra light switch anywhere in your home without the need for wiring
