Case Study: Motorbike and Scooter Frames

Client
- MT, Italy

Application
- Arc welding of aluminum
  System installed by ABB Italy

Key Drivers & Benefits
- Fine-tuning throughout the production process
- Improving the look of the weld on motorbikes with visible frames
- Mass production with handmade quality
- One producer to specialize in several different models/products

“When building motorbike frames, the tiniest error is enough to turn a product designed to support and withstand extremely high stress without breaking into a vulnerable product that is unfit for use.”
Guido Giovenzana, owner of MT
