Auburn, Maine

Facility Overview

Location
135 Rodman Road,
Auburn, ME 04210

Operational since
1967

Number of employees
196

Offering
Components for distribution equipment

What we do in Auburn

Manufacture copper, aluminum and steel components for circuit breakers and switchgear used in commercial, industrial and residential applications. Auburn has a large electroplating operation and a world-class tool and die shop. The parts produced here support manufacturing processes at over 16 ABB facilities, including North Carolina, Tennessee, Iowa, Puerto Rico, and Mexico. These components are used in electrical equipment to ensure reliable electricity supply.

Who we serve

Auburn's components are used in electrical products that support industries with a need for efficient and continuous electrical transmission. This includes a

wide range of customers from utilities and oil and petrochemical operations to residential homes and commercial buildings. Our equipment provides predictable and reliable electricity, so our customers can go through their day uninterrupted.

ABB in the U.S.

ABB is a pioneering technology leader that works closely with utility, industry, transportation and infrastructure customers to write the future of industrial digitalization, increasing productivity and boosting efficiency.
