Product Life Cycle Announcement
Entellisys Low Voltage Switchgear

ENTELLISYS UL 1558 LOW VOLTAGE SWITCHGEAR

This notice is to inform you that ABB will cease production of the Entellisys Low Voltage Switchgear, using the Entelliguard E air circuit breaker, in accordance with the timeline below. Entellisys has been replaced by the ReliaGear LV SG product line using the Emax 2 circuit breaker.

The ReliaGear LV SG platform, introduced in 2022, provides many incremental benefits, incorporating the best of both: the all in one innovation Emax 2 ACB with Ekip trip unit technology, integrated into the proven AKD switchgear platform.

LIFE CYCLE CHANGE SCHEDULE

	Classic	Limited	Last Shipment	Obsolete
Entellisys Low Voltage Switchgear	10/2/2022	05/31/2023	04/30/2024	TBD

	Last Quote Date	Last Quote Revision	Last Order Date	Final Release to Manufacture
	02/28/2023	03/31/2023	04/30/2023	7/30/2023

Once production of Entellisys ceases, its Limited life cycle will begin. During this process, the Entellisys product line will be supported by renewal parts and technical support for 10 years or as long as is feasible. The length of time for continued support after obsolescence is dependent upon numerous items including: supplied parts and components, design automation tools, test equipment, technical expertise, and manufacturing facility.

Thank you for your attention to this important product notice and your continued support.

Rodrigo Morales
Global Product Manager Low Voltage Switchgear

LIFE CYCLE PHASE DESCRIPTIONS

	Active	Classic	Limited	Obsolete
Status	Product is actively marketed and sold.	Product will be replaced but is still available for sales, mainly for spares and expansion projects.	Limited manufacturing/stock availability	Product is no longer available nor saleable.
Product available for sales	✓	✓	**Not guaranteed**	**X**
Spares availability for sales	✓	✓	✓	**Not guaranteed**
Product on stock	✓	✓	**Not guaranteed**	**X**
Available in online tools	✓	✓	✓	**X**
Maintenance and repair	✓	✓	✓	**Not guaranteed**
