ABB offers an environmental legislative review service covering a wide range of industry sectors and processes.

The ABB approach offers our:
- Experience and expertise in environmental legislation for a variety of sites and industry sectors
- Extensive knowledge of process industries and other businesses
- Pragmatic approach which ensures that all aspects of the client’s business are captured in the review
- Detailed understanding of environmental legislation and the requirements of regulators
- Acceptability to regulatory bodies – Environment Agency (EA), Scottish Environment Protection Agency (SEPA), Health & Safety Executive (HSE), etc.
- Expertise in environmental permit management

ABB’s environmental legislation review service includes:
- Identification of legislation applicable to the client’s operations
- Review of legislation to determine the potential impacts on the client’s operations and the predicted requirements of the relevant regulators
- Review of the client’s operations to identify areas of non-compliance and recommendation of appropriate pollution control measures or operational improvements to meet the regulator’s requirements.
- Identification and demonstration of industry best practice and Best Available Techniques (BAT) for both new projects and existing operations
- Assistance with environmental permit management where required
