1. Important safety instructions

THIS CHAPTER CONTAINS IMPORTANT SAFETY INSTRUCTIONS. READ IT CAREFULLY BEFORE STARTING DISASSEMBLING THE UNIT.

1.1. Symbols and warnings

The following symbols are used in this manual, the list below explains each symbol.

- **DANGER**
  - THIS SYMBOL IN CONJUNCTION WITH THE SIGNAL WORD “DANGER” INDICATES AN IMMINENT ELECTRICAL HAZARD.
  - FAILURE TO OBSERVE THE RELATED SAFETY NOTE MAY CAUSE INJURY, DEATH OR EQUIPMENT DAMAGE.

- **WARNING**
  - THIS SYMBOL IN CONJUNCTION WITH THE SIGNAL WORD “WARNING” INDICATES A POTENTIALLY DANGEROUS SITUATION.
  - FAILURE TO OBSERVE MAY CAUSE INJURY, DEATH OR EQUIPMENT DAMAGE.

- **Do not dispose of with ordinary trash.**

© Copyright 2019 ABB. All rights reserved.
1.2. Safety rules

**DANGER**

RISK OF ELECTRIC SHOCK:
BEFORE DISASSEMBLING THE UNIT, MAKE SURE THE UPS IS COMPLETELY SWITCHED OFF AND INTERNAL CAPACITORS HAVE BEEN DISCHARGED BY WAITING AT LEAST 5 MINUTES AFTER SHUTDOWN THE UNIT.

THE UNIT MAY CONTAIN BATTERIES. A BATTERY CAN PRESENT A RISK OF ELECTRICAL SHOCK AND HIGH SHORT CIRCUIT CURRENT. THE FOLLOWING PRECAUTIONS SHOULD BE OBSERVED WHEN DISASSEMBLING A UNIT THAT CONTAINS BATTERIES:

A) REMOVE WATCHES, RINGS OR OTHER METAL OBJECTS.
B) USE TOOLS WITH INSULATED HANDLES.
C) WEAR RUBBER GLOVES AND BOOTS.
D) DO NOT LAY TOOLS OR METAL PARTS ON TOP OF BATTERIES.
E) DISCONNECT THE CHARGING SOURCE PRIOR TO CONNECTING OR DISCONNECTING OF BATTERY TERMINALS.
F) ESTABLISH IF THE BATTERY IS INADVERTENTLY GROUNDED. IF INADVERTENTLY GROUNDED, REMOVE SOURCE FROM GROUND. CONTACT WITH ANY PART OF A GROUNDED BATTERY CAN RESULT IN ELECTRICAL SHOCK. THE LIKELIHOOD OF SUCH SHOCK CAN BE REDUCED IF SUCH GROUNDS ARE REMOVED DURING INSTALLATION AND MAINTENANCE (APPLICABLE TO EQUIPMENT AND REMOTE BATTERY SUPPLIES NOT HAVING GROUNDED SUPPLY CIRCUIT. A BATTERY CAN PRESENT A RISK OF ELECTRICAL SHOCK AND HIGH SHORT CIRCUIT CURRENT.

KEEP OUT OF BATTERY POLES WHICH CONTAIN DANGEROUS DC-VOLTAGES CAUSING FATAL ACCIDENTS.
INAPPROPRIATE MANIPULATIONS OF THE BATTERIES CAN CAUSE LIGHTNING SPARKS.
2. Introduction

2.1. Related to the document

The document contains information for end of life recyclers or treatment facilities in accordance with the EU Directive 2012/19/EU about waste electrical and electronic equipment (WEEE). Necessary dismantling information are detailed, together with indication of WEEE materials and components requiring selective treatment are located.

Substances of very high concern under Regulation (EC) No 1907/2006* are typically used but not reported in this document: contact ABB to get the latest declaration available.

2.2. Applicability

This document covers the environmental information of the following products:

<table>
<thead>
<tr>
<th>Product</th>
<th>Part number</th>
</tr>
</thead>
<tbody>
<tr>
<td>UPS PowerValue 11LI Pro 600VA</td>
<td>4NWP100175R0001</td>
</tr>
<tr>
<td>UPS PowerValue 11LI Pro 800VA</td>
<td>4NWP100176R0001</td>
</tr>
<tr>
<td>UPS PowerValue 11LI Pro 1000VA</td>
<td>4NWP100177R0001</td>
</tr>
<tr>
<td>UPS PowerValue 11LI Pro 1500VA</td>
<td>4NWP100178R0001</td>
</tr>
<tr>
<td>UPS PowerValue 11LI Pro 2000VA</td>
<td>4NWP100179R0001</td>
</tr>
</tbody>
</table>

2.3. Target audience

This document is intended for ABB customers and for professional recyclers. “Professional” refers to the expertise in implementing selective treatment according local National laws. That includes also the understanding of immediate or long term safety risks related to exposure to substances.

2.4. Disclaimer

The information presented in this publication does not form part of any quotation or contract, is believed to be accurate and reliable and may be changed without notice. No liability will be accepted by the publisher for any consequences of its use. Publication thereof does not convey nor imply any license under patent - or other industrial or intellectual - property rights.
3. Recycling advice

The following table is intended to guide selective treatment and recycling, showing where which substances of concern are used and where they are located [ref. Directive 2012/19/EU Article 15 and Annex VII].

Substances of very high concern under Regulation (EC) No 1907/2006(1) are typically used but not reported in this document due to changing nature: contact ABB to get the latest declaration available.

<table>
<thead>
<tr>
<th>Substance(s)/Component(s)</th>
<th>Where used (potential)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Batteries</td>
<td>Used as VRLA block(s).</td>
</tr>
<tr>

<td>Brass,</td>
</tr>
<tr>
<td></td>
<td>PVC,</td>
</tr>
<tr>
<td></td>
<td>Nylon,</td>
</tr>
<tr>
<td></td>
<td>PBT</td>
</tr>
</tbody>
</table>

The following electrical components require further separation after removal from UPS. They might contain materials or components requiring selective disposal. Contact the manufacturer to get proper instructions:

- 50Hz Transformer;
- fan.
4. Dismantling and recycling instructions

**DANGER**
- **RISK OF ELECTRIC SHOCK:**
  - Capacitors and other UPS components may store non-lethal energy for long time: handle every conductive part with care, avoiding short circuit causing sparking or arcing.
  - Before disassembling components requiring further recycling, contact the manufacturer to get necessary disposal information.

This section describes the procedure to follow for disassembly. At the end of each subsections, relevant WEEE or recycling information are reported.

Remove the UPS from the carton box and make sure it’s powered off.

UPS is delivered with external cables requiring selective disposal.

![External cables provided](image)

Make sure UPS is powered off the UPS.

**WARNING**

VRLA battery blocks contain hazardous substances as:
- Inorganic lead, lead compounds (Pb – CAS 7439-92-1);
- Sulfuric acid (CAS 7664-93-9 - Causes severe burns).

The concentration may change, depending on the manufacturer. Cutting or damaging the plastic case, will expose environment to further hazardous substances as lead monoxide (CAS 1317-36-8 - Harmful by inhalation and if swallowed).
Steps for Models 600VA/800VA

1. To remove the front panel (A), insert a flat screwdriver (B) in the gap between front panel and body case.
2. Remove the battery protection (C).
3. Pull out the battery (D).
4. Disconnect the battery wires (E).
5. Dispose of the battery properly (D).

Figure 4-2: Remove the battery (600VA/800VA)
Steps for 1000VA/1500VA/2000VA

6. To remove the front panel (A), insert a flat screwdriver (B) in the gap between front panel and body case, NOTE

7. Remove the battery protection (C).

8. Pull out the batteries (D1/D2) and remove the two flat spacers (F1/F2) between the batteries (D1/D2).

9. Disconnect the battery wires (E).

10. Dispose of the batteries properly (D1/D2).

Figure 4-3: Remove the battery (1000VA/1500VA/2000VA)
Remove all the screws on the base, opening the cover (Error! Reference source not found.).
