

BUSINESS AREA: ELECTRIFICATION

ABB Power Conversion

Facts & Figures

ABB's Power Conversion division supports global 5G/telecom, data center and industrial applications, designing, developing and manufacturing solutions to power and safeguard life's everyday moments. Our customers are in industries where power reliability, efficiency, and quality matter most, and they rely on us to solve their most difficult power challenges. For decades, we've led the way with advanced power solutions that enable innovation and technological evolution. **Power is the ultimate enabler**, connecting everyone and everything...and we know power.

Revenues

\$250–750 million

Market position

No. 4 DC Power Solutions
No. 3 Board-Mounted Power

Key market drivers and trends

- Move from wired to wireless, increasing speed with low latency enabled by 5G.
- Shift to processing and hosting data in the cloud, with computing moving closer to the source (edge and mobile edge computing).
- Increased need for information, with data and analytics being utilized to run and optimize operations (healthcare, industry 4.0, transportation).
- Focus on sustainability (EV, operations, greater efficiencies in product development, greener data centers).

Market

~\$5 billion
