ABB NEMA Motors
Facts & Figures

ABB is the leading global marketer, designer and manufacturer of NEMA motors. For more than 100 years, Baldor-Reliance® industrial electric motors have been designed for quality, reliability and efficiency. Motors like those we make keep almost everything around us moving. We believe that building a sustainable tomorrow takes all of us doing our part. We are making long-term investments in our customer-first culture with technology, processes and people to ensure industry can rely on us to deliver the NEMA motors they require, today and tomorrow.

Revenues
$750–1,250 million

Market position
No. 1 global manufacturer of NEMA motors

Key market drivers and trends

- By 2040, the number of installed electric motors will double. To support this growth with less impact on our communities, we must design and manufacture motors which consume less electricity.
- 45% of the world’s electricity is used to power electric motors in buildings and industrial applications. Upgrading the equipment used in these systems will yield significant rewards in terms of efficiency and sustainability.
- Customers are investing in digitized products and services. Therefore, we are investing in online tools and monitoring solutions to make it easier for customers to access data and information.
