A new revision of the IED Connectivity Package for the Relion 670 series has been released. The designation of this IED Connectivity Package is 3.3.0.0.

The following feature has been included in the new revision:

- Communication security using TLS 1.2
  
  Communication will use TLS version 1.2 for communication security when this connectivity package is used together with:
  
  - PCM600 version 2.9 with Hotfix 20181219 or newer
  - a Relion 670 series version 2.2 (or newer) that is supporting TLS version 1.2.
  
  Otherwise, TLS version 1.0 will be used for communications security.

The following issue has been corrected in the new revision:

For Relion 670 series version 2.2:

- Error when writing all parameters to the IED from parameter setting tool
  
  This happens rarely and have now been corrected.
Please note that in order to use the IED Connectivity Package version 3.3.0.0, PCM600 version 2.9 with PCM600 2.9 Hotfix 20181219 or later must be installed.

**Installation of this IED Connectivity Package**
To install the IED Connectivity Package for Relion 670 series, please use the Update Manager of PCM600 version 2.9 or later.

Kind regards,
