# Floor, room and combination thermostat

## All in one product

Combination thermostats in different designs for precise control of heating.

The new thermostat has an extremely low insert, thanks to which there is plenty of room for the connections. The mounting depth of the device is only 20 mm.

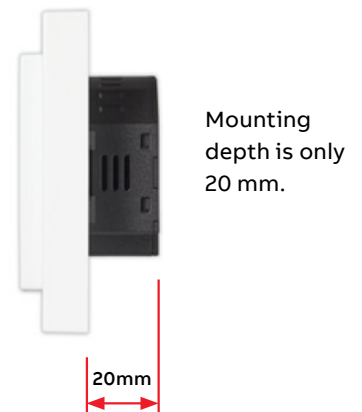

The thermostat is pre-programmed and quick and easy to install. Also compatible with sensors from other manufacturers. Enclosure class is IP21.

The thermostat can be controlled with an external input (home/away switch).

### Benefits:

- The thermostat is pre-programmed and is quick and easy to install.
- Flat insert guarantees plenty of connection space in the mounting box.
- External floor sensor included in the package.
- Meets the requirements of the EU ecodesign directive.

Mounting depth is only 20 mm.
