

Product life cycle announcement

Cyberex® SuperSwitch®1 and SuperSwitch®2 products (SS1 and SS2)

In accordance with the ABB global strategy, this product is in the life cycle management process. For process details, please visit [Life Cycle Management](#).

Legacy product

Replacement product

Cyberex SS1 and SS2 products

Cyberex® SS4 200A - 4000A STS

Life cycle phase status for Cyberex SS1 and SS2 products will be changed to Obsolete Phase starting from 2023-03-31.

Product/Support availability in Classic phase

The Classic status means the product will still be available for sales, but the replacement product is recommended for new sales. Service and spares are still guaranteed for installed base.

Product/Support availability in Limited phase

The Limited status means that product is no longer manufactured or actively promoted by the sales force. Complete life cycle services, including spare parts and support services, will continue to be available until product status changes to obsolete.

Product/Support availability in Obsolete phase

As part of the Obsolete stage, spares and service support for Legacy products will no longer be guaranteed.

For further information on the replacement product please contact your local regional sales manager, technical support, or the related product manager.

ABB North America Electrification Services

Available 24/7/365
