

Course description

G200e

ABB Solar inverters, PVS300 Fundamentals, Internet course

Course Type

Internet course

Course Duration

The course duration is 0.5 hour.

Course Goal

The goal of this course is to teach students the basics of PVS300 string inverters.

Student Profile

This course is intended for electricians, technicians, and engineers who commission and operate PVS300 string inverters.

Prerequisites

- Experience in using a computer and Internet browser. The recommended browser is Microsoft Internet Explorer version 5.0 or later.
- An Internet connection

Description

The course includes self-study material as voice-recorded lectures, control panel simulator and interactive self-assessment questions.

Course Objectives

Upon completion of this course, students will be able to:

- Explain in which application types the PVS300 is used
- Explain the construction, key features and optional accessories of the PVS300
- Use the PVS300 control panel

Main Topics

- PVS300 product presentation
- Control panel functions
- Exercises with the control panel simulator

Low voltage drives training
