

ABB Power Care – 4. Self-Maintenance Services

4.3 File storage

ABB Low Voltage Service offers secure storage of files or data relevant to the ABB Power Care agreement. This gives ABB Power Care customers one-stop access and management of historical documents related to the equipment covered in the agreement.

This option of the ABB Power Care agreement offers customers secure and backed-up data storage on ABB servers for all data related to the ABB Low Voltage equipment covered in the scope. In the ABB Power Care portal, data is organized into the different categories as required by the customer – some examples include the electrical drawings, wiring diagrams, parameter files, electronic device configurations, and reports related to the ABB Power Care agreement. These files are kept current for accurate reference.

This solution ensures that data and information is available at all times of its life cycle, and especially in times of disaster recovery.
