The ABB DC wallbox is a compact 24 kW DC fast charger for use at offices, shopping areas and car dealerships.

Applications
• Office, workplace
• Hotel and hospitality
• Parking structures
• Dealerships
• Urban fleets
• Public or private campus
• Sensitive grid applications

Main features
• 24 kW peak, 22.5 kW continuous fast charging
• 60 A high output current
• Future proof due to DC output voltage range from 150 to 920 VDC supporting todays and tomorrows cars
• Single or dual outlet: CCS and CHAdeMO
• Daylight readable 7” full color touchscreen display
• Future proof connectivity:
  • OCPP
  • Capability for remote services
• Compact design
• Robust all-weather enclosure for indoor and outdoor use
• RFID reader

DC wallbox preferred over AC wallbox
When charging with AC equipment, charging power is often limited by the onboard converter of the EV. Onboard converters are usually rated rated 3 to 7 kW. Any additional power the AC charging station could provide, remains unused. With the DC wallbox, 24 kW peak DC power is provided directly to the battery, bypassing the limitations of the EV’s onboard converter.

Operating the wallbox is easy thanks to a 7” full color, daylight readable touchscreen display. This includes starting and stopping of charge sessions, progress indication during charging, help menus, language selection, and PIN code access.

Connectivity is key to success in EV charging. The DC wallbox features ABB Ability Connected Services to enable authentication, payment, monitoring, remote diagnostics and repair, as well as over-the-air updates and upgrades.
Key optional features
• On-screen PIN code authorization
• Input current limiting software to match site requirements
• Web tools for statistics, configuration, access management, remote diagnostics and repair
• Integration with back offices and payment platforms
• Customized branding possibilities

Configurations
The DC wallbox is available in the following configurations:
• Single outlet CCS1
• Single outlet CCS2
• Dual outlet CCS1 + CHAdeMO
• Dual outlet CCS2 + CHAdeMO

General specifications
