Instrument transformers and sensors

Types VOY-15 and VOY-15G
Outdoor voltage transformers

Product features
- 25 kV outdoor, 150 kV BIL, 60 Hertz
- Electrical clearances:
  VOY-15:
  Strike: 16.0" (406 mm)
  Creep: 27.25" (692 mm)
  VOY-15G:
  Strike: 16.0" (406 mm)
  Creep: 27.5" (698 mm)

Application
The VOY-15 and VOY-15G outdoor voltage transformers are designed for solid-state relaying and electronic metering where the burden of the device is negligible. Both units are designed to minimize susceptibility to destructive ferro-resonance by increasing the primary resistance and leakage reactance.

Construction features
The layer wound and shielded high voltage winding is designed to withstand continuous operation at 1.9 times the line-to-ground voltage level when applied on a 25 kV, 150 kV BIL system. The core and coil assembly is cast under a vacuum in a polyurethane resin formulated for outdoor service.

Terminals
The primary line terminals are electro-tin plated copper and accommodate #10 to 250 MCM conductors. The H2 neutral terminal of the VOY-15G is insulated to withstand a 19 kV test level and can be disconnected from the external ground cable for power factor measurement.

Secondary terminals are clamp-type and are sized for #14 through #3 wire. A ground terminal is also provided for grounding the secondary circuit at the transformer.

Junction box
The molded junction box has a 1" conduit hub on either end and a knock out for a 1" conduit fitting on the bottom. The box is anchored to the body of the transformer with screws and can easily be detached, simplifying installation and change out procedures.

Baseplate
The base is constructed of corrosion-resistant aluminum and is secured to the encapsulated base support.

Mounting
The VOY-15 and VOY-15G can be mounted in the upright or cantilever positions.

Test reports
IEEE test reports are stored electronically and can be e-mailed in various formats at the time of shipment.

Standards
This unit can be tested to all applicable IEEE, CSA, or IEC standards as requested.
