

Services note

Protect your investment – register your ABB drives

1. Find the Drivebase app in the Apple App Store or Google Play.

2. Register your drives and get access to global contact details, service recommendations and notifications.

3. Registration gives you peace of mind that your drive's support is in safe hands.

Anyone can now register any ABB drive, anywhere and at any time. When a drive is registered, ABB can provide services applicable to that drive, regardless of application, size or type.

You can register your drive using the Drivebase smartphone app. Drivebase lets you read product manuals and find ABB contact details, sends you service recommendations, and allows quick troubleshooting through fault code analysis.

Just provide the drive's serial number and location, together with your company name, contact details, application and industry.

To encourage registration, ABB is offering a six-month extended warranty comprising drive repair or replacement with labor covered for the following drive types: ACS880-01, ACS800-01, ACS800-U1, ACS580-01, ACS550-01, ACS550-U1, ACH550-01 or ACS510-01.

When ABB knows the location of the drive, it is better positioned to advise you of optimal life cycle services.
