Innovation

Humans have always been fascinated by the future. What will the world look like some years or decades from now? How will we live our lives? What will infrastructure and the workplace look like?

Researchers and developers are in the exciting position of being able to influence, lay the groundwork for, and even bring about some of these changes. In the first issue of every year, *ABB Review* takes the opportunity of looking over the shoulders of the company's scientists and engineers and sharing recent achievements.
