
CYLON® TECHNICAL BULLETIN NO. 567

Issue Date: 20 April 2026

CEC and UCC v7.09.01

Summary

This is a maintenance update of Engineering and Supervisor software for legacy **Unitron** products.

Background

A number of issues reported from the market on legacy products have been addressed.

Features

RESOLVED ISSUES:

- 41816 (CCB-1592) Removed mention of **CXpro^{HD}** in About box and Splash Screen.
- 41820 (CCB #43957) Fixed issue where UC datalogs were not being uploaded correctly when backing up via **CCReports**.
- 42471 Updated SSL Client Certificate.
- 41821 (CCB-1627) Fixed issue with Virtual Datalogs not scanning **UC32** hardware points.
- 41822 (CCB-1627) Fixed issue with Datalog Groups not displaying if Site Number was changed.
- 44135 (CCB #43986) Fixed issue with **CCReports** time synch for **FBU-nets**.

Customer Impact

Customers should update **UCC** and **CEC** installations if they are affected by any of the issues listed above.
