

Product Life Cycle Announcement

ReliaGear™ lighting panelboards - Branch circuit monitoring ASPMETER BCM

In accordance with the ABB global strategy, this product is in the Life Cycle Management Process. For process details please visit Life Cycle Management (LCM).

Within the ReliaGear™ Lighting Panel offering, Branch Circuit Monitoring - ASPMETER becomes Obsolete in Jan 2025. It is replaced by the RGLPM BCM. We will continue to offer the ASPMETER BCM as supply allows through Q1 2025. The New RGLPM BCM will be available Q2 2025.

Please reference LCM phase out below.

This announcement initiates the move of ReliaGear ASPMETER to Obsolete.

Key Replacement Product Benefits

The RGLPM BCM provides Class 0.5 energy accuracy and advanced power quality features.

The meter has extensive memory for storing load profiles, system events, limits, and alarms. It has either BACnet, Modbus TCP, or Modbus RS485 communication that brings data back to existing software for energy analytics and predictions.
